Dankzij de technologie kunnen we voor de werkelijke productiebehoefte ongeveer met een vijftienurige werkweek toe, en toch werken we allemaal volle dagen. Een groot deel van ons werk moet dus wel bullshit zijn, stelde antropoloog David Graeber in een online artikel. De reacties waren explosief: heel veel mensen – over de hele wereld – bleken het fenomeen te kennen. Nota bene: een bullshit job is een baan waarvan de persoon zelf weet en vindt dat het een onzinbaan is. Graeber beschrijft in dit boek het hoe en waarom van deze banen, die voortkomen uit het kapitalisme maar er eigenlijk haaks op staan (ze zijn niet productief en lijken dus meer op de werkverschaffing in het voormalige Oostblok). Een andere bron van onzinbanen is onze calvinistische overtuiging dat werkeloos zijn slecht is. De geciteerde verhalen zijn hilarisch en tragisch

tegelijk, en Graebers betoog is uniek in zijn helderheid en scherpte. Voor iedereen die anders wil kijken naar werk, kapitalisme en zingeving is dit boek een must-read.

Digital financial services have been a key driver of financial inclusion in recent years. While there is evidence that financial inclusion through traditional services has a positive impact on economic growth, do the same results carry over for digital financial inclusion? What drives digital financial inclusion? Why does it advance more in some countries but not in others? Using new indices of financial inclusion developed in Khera et. al. (2021), this paper addresses these questions for 52 developing countries. Using cross-sectional instrument variable procedure, we find that the exogenous component of digital financial inclusion is positively associated with growth in GDP per capita during 2011-2018, which suggests that digital financial inclusion can accelerate economic growth. Fractional logit and random effects empirical estimation identifies access to infrastructure, financial and digital literacy, and quality of institutions as key drivers of digital financial inclusion. These findings are then used to help inform policy recommendations in areas related to the digitization of financial services to promote financial inclusion.
