

5 Ict Strategy Hodder Education

The Guided Reader to Teaching and Learning History draws on extracts from the published work of some of the most influential history education writers, representing a range of perspectives from leading classroom practitioners to academic researchers, and highlighting key debates surrounding a central range of issues affecting secondary History teachers. This book brings together key extracts from classic and contemporary writing and contextualises these in both theoretical and practical terms. Each extract is accompanied by an introduction, a summary of the key points and issues raised, questions to promote discussion and suggestions for further reading to extend thinking. Taking a thematic approach and including a short introduction to each theme, the chapters include: The purpose of history education; Pupil perspectives on history education; Assessment and progression in history; Inclusion in history; Diversity in history; Teaching difficult issues; Technology and history education; Change and continuity; Historical Interpretations; Professional development for history teachers. Aimed at trainee and newly qualified teachers including those working towards Masters level qualifications, as well as existing teachers, this accessible, but critically provocative text is an essential resource for those that wish to deepen their understanding of History Education.

Talk for Writing across the Curriculum takes a dynamic and creative look at how writing non-fiction can be taught across the curriculum.

This edited book not only makes a much-needed contribution to research in arts education but also provides a strong grounding of evidential support for Singapore arts education, in contrast to the current state of affairs in arts education in many parts of the world where severe cuts in funding, lackluster support for the arts and imperialist agendas are pervasive. The case of and for Singapore – presented in this edited book through rich descriptions of the dedicated, contextualized practices of arts educators, artists and researchers – offers readers many valuable lessons and reflections on the continued survival and advancement of arts education.

Exam board: Eduqas Level: GCSE Subject: History First teaching: September 2016 First exams: June 2018 Endorsed by Eduqas Help every student to achieve their best, with bespoke support for Eduqas GCSE History from the leading History publisher for secondary schools. Structured around the key questions in the 2016 specification, this book:

This book explores key contemporary issues in education, featuring the latest theoretical perspectives and policies, aimed at supporting the professional development and understanding of those working or intending to work in the education sector. Both school- and college-based education have faced rapid change over the last few years. A strong research base around the impact of these changes is emerging, enabling a critically informed debate on policy and practice developments. The book provides an up to date evidence-based overview of key changes, their underlying rationale and an examination of alternative viewpoints. The content is concise and focused while still developing readers' critical thinking skills through tasks embedded within each chapter as well as a distinct section on critical reflective thinking. Other key topics include inclusion, leadership, community education, comparative education, research and education futures.

Exam board: Cambridge Assessment International Education Level: IGCSE Subject: Economics First teaching: September 2018 First exams: Summer 2020 This title is endorsed by Cambridge Assessment International Education to support the full syllabus for examination from 2020. Discover Economics as a real-world subject through case studies from around the world and provide in-depth coverage of the latest Cambridge IGCSE and O Level Economics syllabuses (0455/2281). - Trust an experienced author team to navigate the syllabuses confidently with clearly-defined learning objectives throughout. - Deepen understanding by applying knowledge to real-life global case studies. - Extend learning beyond the classroom by reflecting on skills learned and applying them to local and global environments. - Check understanding with engaging activities that thoroughly integrate deep learning skills. - Benefit from language support with an accessible text and definitions of technical terms throughout. - Consolidate learning with chapter reviews and examination-style questions, as well as useful links to extra activities and answers to the questions which are available in the Boost Core Subscription. Rural Development in the Digital Age explores current theoretical and policy developments in EU rural policy during the 4.0 period. The book offers an analysis of the contradictory and complex drivers and multiple impacts of Period 4.0 policy within the specific territorial context of its implementation. It is commonly agreed within academic and policy circles that the contexts, trends, drivers and impacts which are currently morphing have the potential to determine the nature and boundaries of rural areas in the longer-term. The authors examine inconsistencies in the design and implementation of EU rural development policy driven largely by intensifying neo-productivist pressures. The importance and novelty of the book lie in defining and critically examining the territorial impacts of neo-productivism as an ideology, a practice and a set of policy imperatives during the EU's 2014-2020 programming period. The authors argue that such a paradigm shift in EU rural policy may reduce its effectiveness and ability to meet its goals of balanced territorial development and cohesion. This book will be of interest to advanced students, researchers and policymakers in rural policy, regional studies, economic geography and EU policy.

Providing guidance that helps students practice and troubleshoot their exam technique, these books send them into their exam with the confidence to aim for the best grades. - Enables students to avoid common misconceptions and mistakes by highlighting them throughout - Builds students' skills constructing and writing answers as they progress through a range of practice questions - Allows students to mark their own responses and easily identify areas for improvement using the answers in the back of the book - Helps students target their revision and focus on important concepts and

skills with key objectives at the beginning of every chapter - Ensures that students maximise their time in the exam by including examiner's tips and suggestions on how to approach the questions This title has not been through the Cambridge International Examinations endorsement process.

Exam board: OCR Level: GCSE Subject: Design and Technology First teaching: September 2017 First exams: Summer 2019 Target success in OCR GCSE (9-1) Design and Technology with this proven formula for effective, structured revision. Key content coverage is combined with exam-style tasks and practical tips to create a revision guide that students can rely on to review, strengthen and test their knowledge. With My Revision Notes, every student can: - plan and manage a successful revision programme using the topic-by-topic planner - consolidate subject knowledge by working through clear and focused content coverage - test understanding and identify areas for improvement with regular 'Now Test Yourself' tasks and answers - improve exam technique through practice questions, expert tips and examples of typical mistakes to avoid - get exam ready with extra quick quizzes and answers to the practice questions available online.

"In most countries, some form of curriculum has been designed by a government agency or the private sector. So why is it that the concept is so confusing and why is what is contained in the various curricula around the globe so different and highly contested? As Kiri said in the vignette, 'Surely the people who wrote those curriculum documents know what they are about?' Designing a curriculum document is a complex task and involves the use of a robust curriculum model which has been built upon a particular theoretical perspective. When you read through Chapter 2 you will be introduced to a range of curriculum theories and curriculum models. That chapter will help you as you think about and solve the issue of what is a curriculum document - at the macro level"--

Exam Board: Cambridge Level: KS4 Subject: Digital Media First Teaching: September 2016 First Exam: June 2018 Support your teaching of the new Cambridge Technicals 2016 suite with Cambridge Technical Level 3 Digital Media, developed in partnership between OCR and Hodder Education; this textbook covers each specialist pathway and ensures your ability to deliver a flexible course that is both vocationally focused and academically thorough. The nature of literacy is an issue of global debate. When the National Literacy Strategy [NLS] was introduced into UK schools it was arguably the most ambitious educational reform programme in the world, and the controversy necessarily intensified. How can the impact of such reforms be assessed? In its ten year history the NLS affected every primary and secondary teacher in the country and, therefore, every child. The initiative provoked a widespread recognition of the importance of literacy for all children and attracted the attention of many other governments. This book is the first definitive and objective review and evaluation of the impact of these literacy reforms. With contributions from the most respected experts on literacy and English from the UK and from across the world, this unprecedented critical examination explores: How teaching policy and practice were impacted by the reforms How the NLS came into being, how it was operated, what it did and did not achieve What we can learn from its successes and failures The most important aspects of the reforms, from policing grammar to the impact of 'The Literacy Game' and 'informed prescription' on teaching. Whether you are a policy maker or classroom teacher, this book is an invaluable resource to anyone concerned about literacy. It provides readers from around the world with a genuine and evidence-based perspective on this immense initiative, lucidly evaluating the lessons learned from both its ambitions and its failures.

Do you want to get to grips with your camera? Do you want to take some great photos and make them even better using your computer? Do you want to learn how to create great photo albums, share photos on the internet, even create slideshows to share with family and friends? Teach Yourself Photography for the Over 50s shows you how to choose a digital camera, become familiar with its functions and use it to produce some memorable photos. The book uses clear instructions, useful hints and tips and illustrations to show you all the essential techniques. Avoiding jargon and computerspeak, it also shows you how to use your computer with your camera and explores opportunities for producing great photos without a computer. NOT GOT MUCH TIME? One, five and ten-minute introductions to key principles to get you started. AUTHOR INSIGHTS Lots of instant help with common problems and quick tips for success, based on the author's many years of experience. TEST YOURSELF Tests in the book and online to keep track of your progress. EXTEND YOUR KNOWLEDGE Extra online articles at www.teachyourself.com to give you a richer understanding of digital photography. FIVE THINGS TO REMEMBER Quick refreshers to help you remember the key facts. TRY THIS Innovative exercises illustrate what you've learnt and how to use it.

Fear and Fantasy in a Global World is a collection of essays which examines the processes, meanings and relations between fear and fantasy in the globalized world, from bold interdisciplinary and comparative perspectives.

In 2016 the UCL Centre for Holocaust Education published a landmark study, What do students know and understand about the Holocaust? Almost 10,000 students aged 11 to 18 participated in the research. It was the largest of its kind anywhere in the world. The study indicated that the vast majority of young people found the subject interesting and relevant. However, it also revealed that many students did not have clear knowledge and understanding of the Holocaust. Written in direct response to the findings of the 2016 national study, this textbook significantly improves understanding of the Holocaust by: This textbook is supported by additional materials and teacher guidance notes on the UCL Centre for Holocaust Education website (holocausteducation.org.uk). The original design, development and distribution of this textbook was funded by the Toni Schiff Memorial Fund and the Pears Foundation. The Centre is enormously grateful for their support. The Wiener Holocaust Library also provided considerable assistance in developing the textbook.

Today, information and technological developments grow at a rapid pace. Social and political life becomes more and more complicated and, in this process, active citizenship becomes more essential. Knowledge-driven changes in society and economies require individuals to quickly acquire new skills. Otherwise, it is increasingly difficult for employees to adapt to business life and to find a job. Education has to take account of these circumstances, adapt to the rapid developments in the world and educate individuals to continue lifelong learning. For this, skills such as active and independent learning, assertiveness, creativity, self-improvement, lifelong learning are important. Skill teaching differs from knowledge teaching. Skill is the transfer of knowledge to practice. This process involves a learning process that requires the steps of researching, planning, controlling and correcting. The knowledge should be organized, integrated, transferred into practice, mental and physical resources should be activated, and knowledge use should be demonstrated in practice in order to improve the skill. This book contributes to the teaching of skills and includes basic concepts and skills, language skills, science and mathematics skills, psycho-social skills and visual arts skills. It also explains how to teach skills, how to prepare for activities and how to implement activities in educational settings. These applications are intended to draw attention to skill teaching, to raise educators, to increase the success of education, to improve the skills of students, and to enable them to use the skills they have learned in school outside of school and in complex tasks.

ATH: About the series This series is part of Access to History, a most popular and trusted series for advanced level students. This sub-series is designed for A2 students studying the OCR A Historical Themes Unit. The narrative is structured thematically to enable students to view similarities and differences across time, to draw conclusions from these comparisons, and therefore to develop their synoptic skills. Each chapter includes: * exam-style questions and marked answers to help students understand and develop their synoptic skills * key terms to improve students' historical vocabulary * key questions to consider throughout * summary diagrams as helpful revision tools Russia and its Rulers

1855-1964 This title examines the nature of Russian government and its influence on society and people. The theme is explored under the following headings: * The Nature of Russian Government * The Opposition to Regimes * The Impact of the Dictatorial Regimes on Economy and Society * War and Revolution and the Development of Government
Understand Shakespeare's play immediately with engaging images that reinforce the text and aid preparation for the CSEC English B examination. - Build understanding of the play through images and text that work together - Check understanding of the text by answering the guided reading questions at the end of each scene. - Build literary knowledge with the section on comedy which explains the way Shakespeare uses comic effect in this play and others. - Improve and practise essay-writing skills using CSEC-style essay questions and a sample essay. - Consolidate learning and exam preparation with detailed and rigorous study notes.

Unlock your full potential with this revision guide which focuses on the key content and skills you need to know.

This title has been endorsed by Cambridge Assessment International Education Master the essential scientific concepts that underpin the new Cambridge Primary Science curriculum framework (0097), with specifically sign-posted tasks, activities and investigations rooted in the mastery approach. - Get learners thinking scientifically, with engaging activities designed to show Science in Context; including topics on how science is used in the home and the impact it has on our environment. - Focus on key concepts and principles with starter activities at the beginning of each unit, allowing teachers to establish current knowledge and plan future lessons. - Extend student's knowledge with 'Challenge yourself!' activities to push problem-solving further.

While many facets of our lives are rapidly becoming more digital, educational institutions are now faced with the task of finding new and innovative ways to incorporate technology into the classroom. Examining the latest trends in digital tools provides a more effective learning environment for future generations. The Handbook of Research on Digital Content, Mobile Learning, and Technology Integration Models in Teacher Education is a pivotal scholarly reference source that outlines the most efficient ways for educators to employ technology-enhanced lesson plans in their classroom. Featuring pertinent topics that include blended learning environments, student engagement, artificial intelligence, and learner-centered pedagogy, this is an ideal resource for educators, aspiring teachers, and researchers that are interested in discovering recent trends and techniques related to digital learning environments and technology-enhanced classrooms.

This book constitutes the refereed proceedings of the 7th International Conference on Games and Learning Alliance, GALA 2018, held in Palermo, Italy, in December 2018. The 38 revised regular papers presented together with 9 poster papers were carefully reviewed and selected from 68 submissions. The papers cover the following topics: games for skills training; game design; methods and tools; gamification and innovative game approaches.

This proceedings book captures a wide range of timely themes for readers to be able to foresee the digital era's impact on English teaching in non-English speaking countries. English used in the global environment, the frequent mobile communication, and the use of AI-based translators are bringing about dramatic changes in our English language learning and teaching. Who can provide us the wisdom to know what to do? Those scholars going through these complex environmental changes! A collection of puzzle pieces may bring us a better contour for the future than a perfectly edited book. It's indeed a pleasure reading these insightful pieces to gain wisdom for the future of ELT practices in global contexts.

Endorsed by Cambridge Assessment International Education. Support students in mastering the ideas and skills needed to proceed successfully through the Cambridge Primary Science curriculum framework with a wide range of activities and investigations to help you deliver the science mastery approach. - Establish previous knowledge, skills and understanding of concepts through engaging activities at the start of each unit - Determine whether students have properly mastered the objectives for each unit with investigations and recap activities at the end - Expand vocabulary and understanding with key scientific words to learn and practice - Encourage peer assessment with talk partner activities throughout - Inspire students to predict and question outcomes and concepts with investigations that demonstrate and test key scientific points - Evaluate learning with a self-assessment checklist at the end of each unit and a practice test at the end of each chapter for summative assessment purposes
