The financial markets are a reflection of the psychological emotions of traders and investors. These emotions ebb and flow in harmony with the forces of nature. In the early years of the 20th century the most successful traders on Wall Street, including the venerable W.D. Gann and the mysterious Louise McWhirter, recognized the link between the financial markets and psychological emotion. They repeatedly used their knowledge of Astrology to profitably trade the markets at certain key dates when the shifting emotion of market participants would cause price fluctuations and trend changes. This 2016 Financial Astrology Almanac provides the reader with key astrological dates to watch for each month. These dates align to particular astrological occurrences that have been shown time and again to have a high propensity to

result in short term trend changes on the Dow Jones Average and the S&P500. These key dates have been determined using exactly the same analytical process that Gann and McWhirter would have used. This Almanac also provides the reader with key dates that align to astrological occurrences which have been shown to have a strong correlation to short term trend changes on selected Commodity Futures contracts.

The scientific, historic, and popular basis behind the ancient art of astrology is explored in this comprehensive reference. The guide also includes a table of astrological glyphs and abbreviations, a section on casting a chart, and a chapter that explains and interprets every planet in every house and sign.

The role of the Sun, planets and stars and their influence on global markets is intriguing to traders and investors alike. Christeen Skinner's research shows very definite links between major stock market movements and the position of the planets. This book will be of interest to those with little understanding of astrology as well as to those well-versed in the subject. The work includes charts, graphs and horoscopes and explanation of some of the techniques used for astro-financial forecasting. In Exploring the Financial Universe, financial astrologer Christeen Skinner covers solar rhythms and the intricacies of commodity, property and currency price movements with planet cycles. The role of the planets in mastering the relationship between time and price is considered. There is a chapter on the natal horoscope and financial rhythms set from birth. The book concludes with forecasts covering 2017-2024. Chapters include: Solar activity and the markets Stock Market Crashes of the 20th Century One Day gains versus losses Currencies and major planetary configurations Commodity price movements Property Price cycles and the role of the Moon and planets The link between planet cycles, time and price Financial timing indicators in your own chart Forecasts 2017-2024 The author presents case studies in business astrology and an explanation of some astro-finance trading techniques and uses financial charts taken from the Market Analyst software program for astro-traders.

This book focuses on structural changes and economic modeling. It presents papers describing how to model structural changes, as well as those introducing improvements to the existing before-structural-changes models, making it easier to later on combine these models with techniques describing structural changes. The book also includes related theoretical developments and practical applications of the resulting techniques to economic problems. Most traditional mathematical models of economic processes describe how the corresponding quantities change with time. However, in addition to such relatively smooth numerical changes, economical phenomena often undergo more drastic structural change. Describing such structural changes is not easy, but it is vital if we want to have a more adequate description of economic phenomena – and thus, more accurate and more reliable predictions and a better understanding on how best to influence the economic situation.

Market analysts and financial media commentators have led individual investors to believe that daily news, quarterly earnings reports and corporate events drive stock prices. Nothing could be further from the truth. The reality is - the financial markets are a reflection of the mass psychological emotion of traders, investors and fund managers. When market participants are feeling positive, they are driven to buy. When they are feeling uncertain or negative, they are driven to sell. So what then drives human emotion? In the opinion of stock trader and author M.G. Bucholtz, the ever-changing configurations of orbiting planets and other celestial bodies in our cosmos influence our body chemistry and thereby drive human emotion. The Sun is the centre of our

planetary system. The Sun emits massive amounts of solar radiation in all directions into the vastness of space. This radiation is called solar wind. This solar wind interacts with the magnetic fields around Mercury, Venus, Moon, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto. These planets accept and then disburse the solar wind radiation. As the radiation is disbursed, a goodly amount of it finds its way towards the magnetic field around planet Earth. Changes in the density and speed of solar wind mean that the amount of radiation reaching Earth's magnetic field on a daily, weekly or monthly basis will be ever-changing. As a result, the intensity or flux of the Earth's magnetic field is also constantly changing. The alignment of the orbiting planets in our cosmos plays a significant role in determining how much solar radiation is deflected towards Earth's magnetic field. We all have an electrical field that runs through our tissues. Hence, basic physics demands that changes to the Earth's magnetic field will then induce subtle changes to our bodily electrical circuitry. These subtle changes are what drive our emotional responses. Human emotion changing in response to events in the cosmos is not a new concept. In the early 1900's, the venerable W.D. Gann recognized the connection between changing emotions and price fluctuations on the stock and commodity markets. His trading success realized from applying astro phenomena to the markets is legendary. The astro models pioneered by other figures from this era including Louise McWhirter and Donald Bradley are as powerful today as they were back then. This Almanac begins by offering the reader an overview of the science of Astrology. The detailed examination that then follows will show the reader how: aspect angles between the various planets and the New Moon can set the tone for the equity markets each month. the Moon transiting past certain key points in the zodiac each month aligns to short term trend changes on the New York Stock Exchange. times when Mercury, Venus and Mars are Retrograde align to trend changes on equity and commodity markets. times Mercury, Venus, Mars and Jupiter registering maximum and minimum declination levels equate to trend changes on equity and commodity markets. times when transiting Sun, Mercury, Venus and Mars make hard aspects to planetary positions in the First Trade charts of individual commodity futures are profoundly significant for traders and investors. esoteric mathematical concepts such as Gann Lines and Harmonic Lines are extraordinarily powerful tools for traders and investors to use. It is the author's sincere hope that after applying the material presented in this Almanac, readers will begin to enjoy an increased level of success with their trading and investing activity. It is further the author's hope that readers will then frequently pause to reflect on the deeper connection between the financial markets, the cosmos and the emotions of mankind.

Look to the stars for a whole new approach to market cycle forecasting A Trader's Guide to Financial Astrology is the definitive guide to trading market cycles based on astrological data. Written by a highly-respected technical analyst, this book makes the connection between the movements of planets and the volatility of the market. A study by the Federal Reserve Bank of Atlanta determined that the U.S.

stock markets tend to be negatively affected by geomagnetic storms, and the Royal Bank of Scotland demonstrated that a trading system based on the phases of the moon would have outperformed the market. A Trader's Guide to Financial Astrology shows traders how to tap into the planetary forces that influence market activity. Readers will: Learn how planetary and lunar movements relate to the financial markets Draw upon 100 years of historic correlations and five years of forecast data Forecast long-term and short-term activity based on planetary relationships and lunar movement Enter the markets at key turning points, using price patterns and other tools When integrated with technical trading patterns, astrology can be an effective way of shifting perspective and approaching the market differently. For traders who have always wanted to know what to do when Mercury is in retrograde or the moon is new, A Trader's Guide to Financial Astrology provides information and insight from a leading market educator.

Once maligned by many, the subject of financial astrology is now experiencing a revival as traders and investors seek deeper insight into the forces that move the financial markets. The markets are a dynamic entity fueled by many factors, some of which we can easily comprehend, some of which are esoteric. For example, astrological phenomena can influence price action and create trend changes across both short and longer term time horizons. This book introduces the reader to an extensive range of astrological phenomena. From an introduction to the historical basics behind astrology through to an examination of lunar astrology and planetary aspects, the numerous illustrated examples in this book will show the reader how these unique phenomena impact both the equity and commodity futures markets.

Can the movements of Jupiter, Saturn and Uranus affect market cycles? Are price swings on the Dow Jones Industrial Average and the S&P 500 a reflection of lunar and planetary placements? Many people are surprised to find that changes in price trends on the financial markets are a reflection of the changing psychological emotions of market participants. Our emotions are impacted by the varying gravitational pulls and energy levels in our planetary cosmos. Scientific techniques such as square root mathematics, the Golden Mean, the Golden Sequence and astrological phenomena like lunar events, planetary transits and planetary aspects can thus be used to identify short term changes in price trend and long term market cycles. In the early part of the 20th century many successful traders on Wall Street, including the venerable W.D. Gann and the mysterious Louise McWhirter understood that emotion was intimately linked to the forces of nature. They used these scientific techniques and astrological phenomena to predict changes to price trend and to profit from the markets. The Lost Science will acquaint you with an extensive range of astrological and mathematical phenomena. From the Golden Mean and Fibonacci Sequence through planetary transit lines and square roots to an examination of lunar astrology, planetary aspects and market cycles, the numerous illustrated examples in this book will assist you to deepen your understanding of the financial markets and make better informed and more timely trading and investing decisions.

In the Foreword, Gann hinted that this book is more than just a novel because it contains a valuable secret, clothed in veiled language. According to Gann, some will find it the first time they read it, others will see it in the second reading, but the greatest number will find the hidden secret when they read it the third time. Some traders believe Gann had encoded some techniques of financial astrology into this book and some even claim that they have devoted a lifetime to study this text.

Use the power of the cosmos to harness your financial life. Get an edge in trading. Stay ahead of big economic trends that can affect your 401(k). Be prepared for upcoming

economic shifts in business. "Trading In Sync With Commodities-Introducing Astrology To Your Technical Toolbox" combines Susan Abbott Gidel's expertise and passion for both the commodity markets and astrology into a book valuable to traders, investors and astrologers. Get a trading edge by anticipating dates for potential market highs and lows. Plan your investment strategy based on long-term economic and market outlook. Add commodity markets to your understanding of financial astrology. See when six major markets might make highs and lows through 2020. Written for those who might be unfamiliar with either commodities or astrology, Susan includes "101" chapters on each topic, as well as an astrological glossary. In addition, she covers how astrology can help you discover which markets you might be most attuned to trading. When Markets Peak and Bottom Susan researched six major commodity futures markets-S&P 500, Gold, Soybeans, Crude Oil, Euro FX and U.S. 10-year T-notes-and their connection to astrological transits, the ever-changing position of planets in the sky. To her delight, she found that each market showed tendencies to make important price highs and price lows when certain planets made certain connections to the horoscope chart cast for when each market began trading. This breakthrough research in the commodity markets required having the exact first-trade time and date. Susan obtained those dates and times with painstaking digging into exchange and news archives that sometimes revealed typos and errors in publicly available government documentation. This is where Susan's 40-year career in the commodity industry served her well and enabled her to spot potential discrepancies in first-trade data in order to find true, accurate information, which is essential to first-class astrological analysis.

Market analysts and financial media commentators have led individual investors to believe that daily news, quarterly earnings reports and corporate events drive stock prices. Nothing could be further from the truth. The reality is - there is an overwhelming connection between the ever-changing configurations of orbiting planets and other celestial bodies in our cosmos and the financial markets. Is this connection firmly based in science? Or, are powerful money managers in financial centers around the globe moving prices of equities and commodity futures in accordance with astrological aspects and patterns? Whatever the case may be, investors and traders alike ought to be aware of the connection between astrology and the markets. The connection between astrology and the markets is not new. In the early years of the 20th century successful traders like W.D. Gann, J.P. Morgan and the mysterious Louise McWhirter recognized this connection. They repeatedly used their knowledge of astrology to profitably trade the markets at key astrological occurrences. This 2020 Almanac provides the reader with key astrological dates to watch for each month. These dates align to astrological occurrences that have been shown time and again to have a high propensity to result in price trend changes on stocks, market indices and commodity futures. These key dates have been

determined using the same analytical process that Gann and McWhirter would have used. This Almanac then goes deeper to present the reader with critical Quantum Price Lines for various market indices and commodity futures for 2020. Alternative measures of time are then discussed including the Gann Master Cycle (which starts anew in 2020), the Weston Model, the Shmitah Year, Price square Time, and Kabbalah sacred angles. It is the author's sincere hope that after applying the material presented in this Almanac, readers will begin to enjoy an increased level of success with their trading and investing activity.

Written in response to the demand from clients and astrology students, this book provides an introduction to the financial universe, illustrating the role of the Sun, Moon, planets, and major planet cycles in market movements. In The Beginners Guide to the Financial Universe, financial astrologer Christeen Skinner takes a step-by-step approach to understanding how the events in the solar system affect market movements. Starting with the sunspot cycle and moving on to seasonality charts and lunar trading, she presents information in an easy-to-read style. As viewed from Earth, the planets each have periods when they appear to be retrograde, i.e., moving backward relative to Earth. These periods and their correlation with market activity are considered along with the role Mars plays as it moves through each sign of the zodiac. The phases of a recognized 20-year business cycle—the exact period between one conjunction of Jupiter and Saturn and the next—are also explored. The concluding chapter offers date, time, and place data that can be used for further investigation. Chapters include the following: The Sunspot Cycle and the Markets Seasonality Charts and Key Dates Trading with Mercury and Venus The Role of Mars in Commodity Trading The Jupiter-Saturn 20-Year Business Cycle Charts of Key Markets and Indices

"Let's face it. Traders in the stocks, futures, options, or FOREX markets are dead meat if they aren't profiting from the astro-trading advantage!" That's what Tim Bost, editor of FinancialCyclesWeekly.com newsletter and author of Mercury, Money and the Markets, says it takes to survive in today's increasingly treacherous trading environment. "I've been working with planetary factors in market timing for over a quarter of a century," he says, "and I've never seen the odds stacked against individual traders more than they

are now. To compete with market manipulation on a massive scale and the onslaught of high-frequency trading robots, you've got to have market timing tools that give you the agility and tactical superiority of a trading guerrilla. "That's what astro-trading is all about, and that's the focus in Mercury, Money and the Markets. It's aimed at short-term swing traders who want to level the playing field with high-precision, back-tested timing methods that most market players haven't even heard about!" In Mercury, Money and the Markets, Bost reveals the impact of Mercury cycles on price trends and reversals in equities, precious metals, and international markets on 5 continents. He also provides detailed analysis of 30 major blue-chip stocks, showing the individual idiosyncrasies in their responses to repeating Mercury cycles. With dozens of charts and examples throughout the book, he makes a compelling case for the importance of this often-overlooked component of financial astrology, elevating it to a new level as a powerful market timing tool that can make the difference between disaster and success in high-pressure trading. But Tim Bost doesn't stop there. He understands that effective trading involves more than just knowledge of the markets and correct analysis of trading opportunities-- it also requires sufficient self-awareness to be able to maintain emotional equanimity under fire. So he adds plenty of unique information here about how astro-traders can use Mercury to better understand their personal horoscopes, gaining higher degrees of trading confidence. It's a perspective unavailable from any other source. Because he's a pioneering astrological researcher as well as an active trader and trading coach, Tim Bost has uncovered significant planetary dynamics to take this advanced astro-trading sourcebook far beyond the common material found in most books on stock market astrology. It includes transneptunian factors, 90-degree dial analysis, nontraditional planetary angles and a great deal more. And it features tips on deciphering the trading code in W. D. Gann's strangest book, the role of Mercury in First-Trade horoscope analysis, and the money-making truth about the times when Mercury is retrograde. Mercury, Money and the Markets is also a book with lots of charm and intelligence. Bost is an excellent storyteller, so he makes the effects of Mercury come alive with examples from business, the markets, and personal experience. He also contributes his scholarly skill to this book, dipping back into the myths of antiquity to revive an ancient esoteric text that has surprising effectiveness in precisely timing trades today! This is a book to read and enjoy, and a valuable text filled with big payoffs for the active short-term trader. But it's also a book that you'll come back to again and again, since it features a unique cross-indexed Mercury Station Ephemeris that spans 201 years. In other words, while it's packed with energy and information you can use today for immediate profit, it has a long shelf life, too! If you're an astrologer looking for a way to make money, this may not be the book for you, since it's loaded with brass-tacks, down-to-earth insights about what it actually takes to profit from astro-trading. It will stretch your awareness well past the limits of what you thought astrology was all about. But if you're a trader who needs an extra edge, then run, don't w

The financial markets are inexorably influenced by Astrology. New Moons, Mercury Retrograde, Venus Retrograde, Planetary Declination, Superior Conjunctions, Elongations and Natal Transits all variously bear curious alignments to short term and long term trend changes on stocks, indices and commodity futures. This connection between Astrology and the markets is not new. In the early years of the 20th century

the most successful traders on Wall Street, including the venerable W.D. Gann and the mysterious Louise McWhirter, recognized the link between the financial markets and Astrology. They repeatedly used their knowledge of Astrology to profitably trade the markets at certain key astrological dates when price fluctuations and trend changes were most likely to occur. This 2019 Financial Astrology Almanac provides the reader with key astrological dates to watch for each month. These dates align to particular astrological occurrences that have been shown time and again to have a high propensity to result in trend changes on stocks, market indices and commodity futures. These key dates have been determined using exactly the same analytical process that Gann and McWhirter would have used. This Almanac then goes deeper to present the reader with critical Quantum Price Lines for various market indices and commodity futures for 2019. Alternative measures of time are also discussed including the Gann Master Cycle, the Weston Model and the mysterious concept of the Shmitah Year. This Almanac is certain to assist the reader in taking trading and investing to a much deeper level.
