Times of crisis are unexpected and they bring diverse challenges and opportunities for companies, financial markets, and the economy. On one hand, more risk and uncertainties appear, yet on the other hand, it is an opportunity to reorganize and reinvent the company. It is important for businesses to understand ways to deal with uncertainty and risk in times of economic downturn and what financial strategies and tools can be used to eliminate or reduce the potential negative effects. These effects can reach the company's financial performance, capital structure, as well as cause financial debt and the availability of cash-flow to companies. However, different financial instruments can sustain the business and deal with the difficulties of payment when sales reduce and uncertainty increases; thus, research is essential in this critical area. When economic downturn affects the financial markets, the role of banks, country dynamics, the economy, and many other facets of the business world, financial management becomes the key for business recovery. The Handbook of Research on Financial Management During Economic Downturn and Recovery shares relevant knowledge on challenges and opportunities caused by crises, such as the pandemic, and the effects on economic and financial arenas. The chapters cover topics such as business models to understand how companies react to pandemic and crises situations, as well as how they change their management and way of conducting business. Other important topics include sustainable development, international financial markets, capital structure changes, uncertainty and risk, and governance and leadership. This book is ideal for shareholders, directors and managers, economists, researchers, academics, practitioners, stakeholders, researchers, academicians, and students interested in knowledge on topics about challenges in the way that companies, financial markets, financial institutions, and governments respond to risk and uncertainty.

Up to date coverage and depth of discussion of international accounting from respected authors and international contributors. Respected authorship and contributions from a diverse group of international practitioners and academics Renowned for depth of discussion and comprehensive coverage Updated every two years to incorporate the latest developments in the field Covers the international dimensions of financial accounting and reporting: concepts, context, transition to IFRS and difference in GAAP The increasing pace of global conformance towards the adoption of International Financial Reporting Standards (IFRS) highlights the need for accounting students as well as accounting practitioners to be conversant with IFRS. Teaching IFRS

offers expert descriptions of, and insights into, the IFRS convergence process from a teaching and learning perspective. Hence this book is both timely and likely to have considerable impact in providing guidance for those who teach financial reporting around the world. The contents of the book come from authoritative sources and offer something distinctive to complement the existing textbooks which typically focus on the technical aspects of IFRS and their adoption. Drawing upon the experiences of those who have sought to introduce IFRS-related classroom innovations and the associated student outcomes achieved therefrom, the book offers suggestions about how to design and deliver courses dealing with IFRS and catalogues extensive listings of IFRS-related teaching resources to support those courses. This book was originally published as a special issue of *Accounting Education: An international journal*.

Accounting literature has viewed sustainability in terms of social, economic and environmental performances. There have been concerns that the relationship between sustainability, accounting and organizational performance cannot be explained unless we can deduce patterns of administrative behaviour that chronicle management practices. *Ecology, Sustainable Development and Accounting* argues that, despite the broader social and economic development dimensions of sustainability and the limitations of its extension to corporate and organizational behaviour; an ecological framework is capable of providing the overall societal and community chronologies that describe corporate sustainable operations. Drawing examples from international development and federal government organizations, this book documents the link between ecology, corporate sustainable development, and sustainability accounting and reporting. It draws together the literature from several disciplines to elaborate the contribution of the ecological approach to sustainable development in the accounting literature. This book will be of particular interest to students, academics and practitioners in the areas of environmental studies, ecological economics, sustainable development studies, and social and environmental accounting. The sociological and anthropological perspectives make this book the first of its kind to apply the population ecology of sociology to both the sustainability and accounting literature.

Costing for the Fashion Industry is a practical, easy-to-use guide to the manufacture, sourcing and risk management methods essential to make a new fashion business venture financially viable. Each chapter focuses on a theme, such as entrepreneurship, time constraints, global awareness and new markets and sourcing, alongside practical exercises and detailed industry case studies to put the theory into context. This second edition explores capital investment decisions, the changing nature of cost and the importance of global awareness and new markets, as well as expanded coverage of internationalization strategies

for SMEs.

Given the increased social and environmental problems in China, this book looks into the social and environmental (environmental) disclosure practices of socially responsible Chinese listed firms by constructing a stakeholder-driven, three-dimensional, disclosure index. The book contains a three-part study: the first part explores the current status of social and environment disclosure practices. The second part empirically examines the relationship between corporate social and environmental disclosure and various influencing factors (i.e. stakeholders' power and corporate characteristics). The third part empirically examines the link between corporate social responsibility (CSR) reporting (i.e. publishing a CSR report and the quality of the CSR report) and socially responsible reputation. The book finds that the CSR report provided more stakeholder-relevant social and environmental disclosure than the annual report. It also finds that corporate characteristics such as firm size, profitability and industry classification are all statistically significant factors influencing social and environmental disclosure of the Chinese firms studied. Shareholders significantly influenced firms' social and environmental disclosure, and creditors significantly influenced firms' disclosure related to their environmental performance. The final part of the study reports that publishing a CSR report and CSR reporting quality had a positive influence on firms' socially responsible reputation and that the CEO/chairman duality negatively influenced firms' socially responsible reputation. The book also

highlights that financial performance and firm size were the two corporate characteristics that had a positive influence on corporate socially responsible reputation. This book will be of interest to those who are keen to learn more about corporate social responsibilities in the context of Chinese firms.

Is accounting as a first course going extinct? What motivates students' choice of accounting as a career? How true is it that if you are not chartered, you are not an accountant? These are few of the questions that this book responds to. It is an orientation tool for intending students, students, lecturers/tutors, researchers, practitioners, policy makers, parents and the general public on the neglected story of accounting profession. It is written with the sole aim of enlightening its reader on who accountants are; career paths of accountants and their role in society; providing information to assist students in deciding a choice of career in the field of accounting. It places emphasis on the role-relevance of tertiary institutions in the development of accountants with robust acumen. This book opens up on the unsung story of the accounting profession, bringing to the fore the fact that the profession has emerged with three wings, that is practice, policy and research. As we continue to face an increasingly competitive market, the need to produce graduates with requisite knowledge and skill competence to fill vacancies in industries, which are faced with apparent economic circumstances are overwhelming. Howbeit, while it may be acceptable to find a meantime solution, a long term sustainable solution is better, which is to focus on breeding efficient, effective and productive accountants, who can sustain the objectives and goals of the going concern. Tertiary institutions must not underestimate the need to concentrate energy on creating awareness, arming graduates with necessary knowledge and skills on elements of accounting profession, which is a better way out to solve the problem rather than the fire brigade approach to

salvage the situation. As the industry look up to institutions to step up the game, we must wow them by producing graduate accountants who will not only be able to practice, but also can in their circumference engage with policy issues and research in the work place environment for increased and sustainable productivity.

For MBA-level managerial accounting courses. This Global Edition has been edited to include enhancements making it more relevant to students outside the United States An essential tool for understanding how to make effective economic decisions. In today's troubled economy, it's important to show students how managerial decisions can affect business costs. Introduction to Management Accounting helps to enhance students' ability to make effective economic decisions by encouraging them to understand the inner-workings of the concepts, rather than solely focusing on technique memorization. Overall, this text describes both theory and common practices in a way that will help students produce information that's useful in day-to-day decision-making.

Written in lecture mode – conversational style – simulating a class room setting, avoiding use of technical jargons Focus on problems and cases along with their solutions and analysis Discussion on IFRS Rich pedagogy making it student friendly" Current modern companies, which are also the key factors of a global economy, are subject to increasing pressures to conduct their business in an environmentally responsible manner, due to social and environmental problems. Improving long-term environmental performance can bring economic benefits to those companies that are innovative and environmentally sensitive, especially by integrating environmental information into their business strategies. Considering all the changes, sustainability reporting, management, and financial accounting becomes a powerful information tool for executives, managers, and employee teams to gain insights and make better decisions. Along with concepts such as ethical, controlling, auditing, management, and financial accounting, reporting provides value with the decision-making process. All these debates underline the major responsibility of users when configuring accounting and finance models and thereby in modelling business information. Sustainability Reporting, Ethics, and Strategic Management Strategies for Modern Organizations proposes an interdisciplinary perspective and explores various theoretical and practical approaches of ethical standards, management accounting, and their impact in the 21st century on different areas of activity. It contrasts external financial accounting for government regulators and the investment community with internal management accounting for managers to leverage for decision making. In addition, the book examines the role of management accounting and sustainability reporting from other points of view such as ethical standards, corporate social responsibility, creative accounting, green accounting, environmental indicators, e-accounting, KPI, lean accounting, controlling, auditing, reporting, etc., offering a number of new insights into management accounting. It is intended for chief financial officers, financial controllers, business analysts, financial planners, financial analysts, budgeting managers, executives, managers, academicians, researchers, and students.
