This study records an oral history and ethnography of the Afro-Caribbean individuals and families who settled in Tortuguero, a small village in northeastern Costa Rica. It is the product of nine months of field work in Costa Rica by the author and subsequent library research in the United States. The purpose of the study is twofold: (1) to describe and analyze the Afro-Caribbean social structure, cultural life, and ethnic identity within Tortuguero, and (2) to place Tortuguero within the larger context of that phase of the African diaspora that placed people of African descent on the islands of the western Caribbean and on the eastern coast of Central America from Belize to Panama. The author uses the concept of creole cultures and societies to analyze and interpret the descriptive, ethnographic data in the book. He argues that creole cultures and societies, and the ethnic identities associated with them, although structured on past

traditions, are essentially dynamic and emergent and are constantly in the process of being re-created and remolded. Culturally, the Afro-Caribbean residents of Tortuguero are African, Amerindian, and European/American. They have black cultural roots that reach back through the ex-slaves and freedmen of Costa Rica, Nicaragua, San Andres, and Jamaica to West Africa. They have red cultural roots, entwined with their black roots, that connect with the Zambo-Miskitu and the Garifuna (Black Carib) in Costa Rica and Nicaragua, back to the Carib Indians of the Lesser Antilles. They also have European/American roots that reach back to their overlords, employers, and co-workers in Costa Rica, Honduras, Nicaragua, San Andres, and Jamaica - to the many British, Spanish, and North American men and women they courted and married in the places where they lived and worked. Their most shallow cultural roots are Iberian, cultivated only recently as a result of their exposure to the dominant Costa Rican institutions, particularly the media, the public schools, and the Roman Catholic Church. Linguistically, about half of the residents of Tortuguero speak English, or a creolized form of English that had its origin in Jamaica. The other half speak Spanish. Many, however, are bilingual. The history and experiences of the Afro-Caribbean peoples in Costa Rica is one of the little-known chapters of the African diaspora. Less research has been undertaken among the Afro-Caribbean communities of Costa Rica than among those in most other areas of the Caribbean and Central America. Yet it is a significant chapter of the African diaspora, the details of which need to be told. This book makes a major contribution toward that goal.

By falling down a rabbit hole, Alice experiences unusual adventures with a variety of nonsensical characters.

The underlying theme of this book is that a widespread, taxonomically diverse group of animals, important both from ecological and human resource perspectives, remains poorly understood and in decline, while receiving scant attention from the ecological and conservation community. This volume proposes a comprehensive overview of the world's river turtles' ecology, conservation, and management. It begins with a categorization of taxa which inhabit flowing water habitats followed by information on their evolutionary and physical diversity and biogeography. Within the framework of ecology, the authors discuss the composition of river turtle communities in different types of lotic habitats and regions, population dynamics, movements, reproductive characteristics and behavior, predators, and feeding relationships. In a conservation and management section, the authors identify and evaluate the nature and intensity of factors which threaten river turtle survival--almost all of which involve direct human exploitation or indirect effects of human induced habitat alteration and degradation. They then list and evaluate the various schemes which have been proposed or employed to halt declines and restore populations, and make recommendations for future management plans for specific species and regions. In closing, they state their viewpoint concerning future research directions and priorities, and an evaluation of future prospects for survival of the world's river turtle species.
