Since the beginning of time there has been a battle between good and evil. Evil has manifested itself in many ways throughout history but its goal has always been the same - to consume as many souls as possible. For some, evil is a way of life, embraced in a way that shocks and terrifies. It has been said that the only thing needed for evil to triumph is for good men to sit back and do nothing. For some, this is not an option. This book is the true-life story of one man who sets out on a mission to destroy the footholds of evil within his community. You will walk step-by-step through the entire suspenseful journey. What starts as a plan to gather information soon turns into a long complex spiral into the dark world of white supremacy. Defined as domestic terrorism, these groups walk a fine-line, hell bent on the ultimate destruction of anything "non-white or pure." Domestic terrorist groups, like their bigger brother, always use a key strategy in their twisted ambition - fear. Through reading this book, you will learn that fear is a tool of evil. This tool will only work if it allowed to by its intended victim.

Understanding this principal, along with the learning of your enemy's weaknesses, will lead to victory over the oppression of evil. While some very serious risks, including death, existed for this man and his mission, faith in God was his one strength to overcome fear. God will always triumph. This book is one such story of triumph and success. It is also a learning tool for others to defend their peaceful way of life.

H.R.P. Dickson had the good fortune to spend many years among the Badawin, living and travelling with them as one of them in their own tents. In this book, first published in 1949, the author uses his great experience and knowledge to reveal all aspects of the lives of the nomadic desert Arabs, from social systems to marriage and children, from faith to food, sandstorms, warfare and hunting. The Arab of the Desert is truly a wealth of information, informed by personal insight and anecdotes.

In *The Turn of the Tortoise*, T N Ninan explores the paradox of a "premature superpower" (as Martin Wolf once described India in the Financial Times). India has grown from the 12th largest economy in 2008 to what IMF reckons is the 7th largest in 2015, even as its people are poorer than those in Laos and Sudan.

Ninan assesses India's position as a natural counter-weight to China, though fundamentally different from that country and overshadowed by it in an unequal military balance and in the contest for influence in a region that stretches beyond Asia to Africa. And finally, Ninan looks at how the third-largest contributor to global economic growth remains troubled by slow economic reform and the poor standards of governance that make it a difficult place in which to do business. The author considers the social, economic and political forces that helped the rise of Prime Minister Narendra Modi, and the risks of constitutional liberalism yielding space to an illiberal democracy. He views the role of Indian business conglomerates as double-edged, and reviews India's stance and role in global trade and climate change negotiations. This work uses data extensively to support analysis, even as it tells stories of hope and frustration within a framework of qualified optimism. The brisk and engaging style of an expert wordsmith will appeal to anyone interested in the new "Asian Drama": the tension with China, the "arc of friendship" that brings closer the region's largest democracies (Japan, Australia and India), and the many facets of the new energy in Indo-US relations. If you want to make sense of a complex country that encompasses "a universe of realities," this is the book you've been waiting for. Threat intelligence is a surprisingly complex topic that goes far beyond the obvious technical challenges of collecting, modelling and sharing technical indicators. Most books in this area focus mainly on technical measures to harden a system based on threat intel data and limit their scope to single organizations only. This book provides a unique angle on the topic of national cyber threat intelligence and security information

sharing. It also provides a clear view on ongoing works in research laboratories world-wide in order to address current security concerns at national level. It allows practitioners to learn about upcoming trends, researchers to share current results, and decision makers to prepare for future developments.

'... in Bruach when a single woman or a widow owns a net which is borrowed for the fishing that woman is entitled to a share of the catch and there came a day when, my net having been borrowed and the herring having obligingly swum into it, I found myself the recipient of a whole creelful of fresh fish.' The Hebridean island of Bruach provides the setting for more enchanting tales of life among the crofters. Rich in incident and humour, Beautiful Just! sees Lililan Beckwith at the top of her form. 'This is crofting life at its strenuous best . . . masterly story-telling.' Press and Journal 'hilarious' Sunday Times 'absorbing . . . its humour is happy, easy and natural.' Daily Mirror

FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations. The Gaelic Revival has long fascinated scholars of political history, nationalism, literature, and theater history, yet studies of the period have neglected a significant dimension of Ireland's evolution into nationhood: the cultural crusades mounted by those who believed in the centrality of the Irish language to the emergent Irish state. This book attempts to remedy that deficiency and to present the lively debates within the language movement in their full complexity, citing documents such as editorials, columns, speeches, letters, and literary works that were influential at the time but all too often were published only in Irish or were difficult to access. Cautiously employing the terms &"nativist&" and &"progressive&" for the turnings inward and toward the European continent manifested in different authors, this study examines the strengths and weaknesses of contrasting positions on the major issues confronting the language movement. Moving from the early collecting or retelling of folklore through the search for heroes in early Irish history to the reworking of ancient Irish literary materials by retelling it in modern vernacular Irish, O'Leary addresses the many debates and questions concerning Irish writing of the period. His study is a model for inquiries into the kind of linguistic-literary movement that arises during intense nationalism.

'When I had first come to the Hebrides Morag, my landlady, had advised me always to "take a rope – in case," . . . Over and over I had proved its usefulness. I might need it to catch a calf or a sheep; to carry a bundle of hay to the cow or a can of paraffin from the grocer; to tie a bundle of driftwood I had collected, or a sack of peat; to secure a

boat; make a temporary repair to a sagging fence or a halter for a horse . . . Excepting when they were going on holiday or to church, the Bruach crofters were rarely without a length of rope, either coiled around an arm or protruding from a pocket.' The fourth of Lillian Beckwith's books on her life on Bruach, A Rope - In Case is packed with hilarious stories and delightful characters. Yet it is never sentimental – always observant. 'Hugely enjoyable fourth book of Hebridean humour and characters' Manchester Evening News
