The premise of the Teaching American History (TAH) project—a discretionary grant program funded under the U.S. Department of Education’s Elementary and Secondary Education Act— is that in order to teach history better, teachers need to know more history. Unique among professional development programs in emphasizing specific content to be taught over a particular pedagogical approach, TAH grants assist schools in implementing scientifically-based research methods for improving the quality of instruction, professional development, and teacher education in American history. Illustrating the diversity of these programs as they have been implemented in local education agencies throughout the nation, this collection of essays and research reports from TAH participants provides models for historians, teachers, teacher educators, and others interested in the teaching and learning of American History, and presents examples of lessons learned from a cross-section of TAH projects. Each chapter presents a narrative of innovation, documenting collaboration between classroom, community, and the academy that gives immediate and obvious relevance to the teaching and learning process of American history. By sharing these narratives, this book expands the impact of emerging practices from individual TAH projects to reach a larger audience across the nation.

Are You a Cynical Beginner? You may not have a Ph.D. in history, but you already know -- or can readily believe -- that Columbus didn't exactly "discover" America. Or that the man who wrote the Declaration of Independence was a slaveholder. Or that our leaders may not be entirely committed to the effort to make sure that in fact no child is left behind. But the truth of individual lives can be more compelling than they initially appear: surprising, informative, and maybe even inspiring. This book explores a few such lives, and the lessons they offer in ways that might actually mean something outside a classroom. These biographical case studies -- which include General George Washington, who was once invited to lead a military coup against the new American government; Ida Wells, who responded to lynchings by publicly mocking the manhood of those who murdered African Americans; and Eugene Debs, who chose to go to jail to protect free speech -- explore a series of questions. How does one keep true to one's principles in the face of social pressure? What strategies work best in addressing your opponents? Can public acts atone for private flaws? In different ways, the profiles in courage here provide answers to these questions -- not definitive answers, but real ones. You can

weigh them, accept them, reject them, or -- who knows? -- maybe even apply them. You may not end up any less cynical after leafing through this book. But you will be less of a beginner.

A rich sourcebook of materials on African-American folk culture, history, and society that illuminates the novel.

### TEACHING GUIDE FOR SIX QUESTIONS OF AMERICAN HISTORY SERIES

Concerned scholars and educators, since the early 20th century, have asked questions regarding the viability of Black history in k-12 schools. Over the years, we have seen k- 12 Black history expand as an academic subject, which has altered research questions that deviate from whether Black history is important to know to what type of Black history knowledge and pedagogies should be cultivated in classrooms in order to present a more holistic understanding of the group' s historical significance. Research around this subject has been stagnated, typically focusing on the subject's tokenism and problematic status within education. We know little of the state of k-12 Black history education and the different perspectives that Black history encompasses. The book, Perspectives on Black Histories in Schools, brings together a diverse group of scholars who discuss how k-12 Black history is understood in education. The book's chapters focus on the question, what is Black history, and explores that inquiry through various mediums including its foundation, curriculum, pedagogy, policy, and psychology. The book provides researchers, teacher educators, and historians an examination into how much k- 12 Black history has come and yet how long it still needed to go.

The Abridged Teaching Edition of A People's History of the United States has made Howard Zinn's original text available specifically for classroom use.
