Community health workers (CHW) play a vital role in the provision of health-care services in South Africa, and the need for the training and development of these CHWs is obvious and urgent. A major obstacle to the provision of such training is the low level of literacy among CHWs. It is for this reason that Juta Academic has teamed up with a number of key organisations and professionals involved in community health and adult education to develop the Health for All series. With over 150 illustrations, these outcomes-based training materials will develop the health-care knowledge and skills of CHWs and bolster their literacy, language and communication skills. The series can be used for health-care training courses, with each of the six books forming a separate module. The publications can also serve as reference books for use in the field.

Haar naam was Henrietta Lacks, maar de medische wereld kent haar als HeLa. In de jaren '50 werden haar kankercellen zonder dat zij dat wist bij haar weggenomen. Met behulp van deze cellen, die letterlijk onsterfelijk zijn, werden de meest uiteenlopende geneeskundige ontdekkingen gedaan en rond de verkoop ervan ontstond een miljoenenindustrie. Het leven van Henrietta bleef echter vrijwel onbekend en

ook haar familie wist tot ruim dertig jaar geleden niet van het bestaan van de cellen af. Rebecca Skloot vertelt het verhaal van de 'HeLa-cellen', maar laat ons vooral ook kennis maken met Henrietta, haar verleden en haar familie, die nog steeds worstelt met de nalatenschap van de cellen. Ze laat zien dat het verhaal van de familie Lacks onlosmakelijk verbonden is met de duistere geschiedenis van het experimenteren met Afrikaans-Amerikanen, het ontstaan van de ethiek binnen de biologie en de juridische strijd over de vraag of we de baas zijn over de materie waarvan we zijn gemaakt.

Covering the nurse's role in promoting community health, *Community/Public Health Nursing, 5th Edition* is known for its "upstream" preventive focus and social justice approach, photo novellas with clinical stories, and a concise, readable style. It shows how you, as a nurse, can take an active role in social action and health policy – especially in caring for diverse population groups. Expert authors Mary A. Nies and Melanie McEwen discuss today's issues and trends, and describe the key issues and responsibilities of contemporary community/public health nursing. An "upstream" focus addresses factors that are the precursors to poor health in the community. A "social justice" approach promotes health for everyone. Photo novellas use photographs to tell stories showing real-life clinical scenarios and applications of important community health nursing roles. Case Study: Application of the Nursing Process feature presents specific community components of the nursing process separately from individual and family. Clinical examples offer snippets of real-life client situations. Research Highlights boxes show the application of current research to chapter content. Ethical Insights boxes highlight ethical issues and concerns. Healthy People 2020 boxes summarize objectives and their importance in community health. Objectives, key terms, and chapter outlines introduce important concepts and terminology at the beginning of every chapter. Learning Activities at the end of each chapter ask you to apply concepts to the world outside the classroom. New Health Promotion and Risk Reduction chapter details the promotion of health and presents strategies that can identify risk factors for illness. Faith Community Nursing chapter reflects current terminology from the ANA's Scope and Standards of Practice, and includes more coverage of the spiritual health of clients. Health: A Community View chapter expands its discussion of the continual challenges and strategies associated with the delivery of health care. Communicable Disease chapter includes new information about public health surveillance, outbreaks, and bioterrorism. Cultural Diversity and Community Health Nursing chapter features new content on complementary and alternative therapies.

*An Introduction to Community Health Brief Edition* is a condensed and fully updated version of the bestselling classic health text. It is ideally suited for students in Health Education, Nursing, and Social Work programs. Like the full-length text, the condensed edition provides comprehensive coverage of epidemiology, adolescent and child health, health and safety in the workplace, environmental health, and minority and elder health. This is the only condensed community health text on the market and is suitable for institutions with shorter academic terms.

Understand the foundations and applications of health promotion *Introduction to Health Promotion* gives students a working knowledge of health promotion concepts and methods and their application to health and health behaviors, with a special emphasis on the philosophical and theoretical foundations of health promotion. The textbook also identifies and discusses the innovative health campaigns, strategies, and policies being implemented and enacted to improve health behaviors and practices that ultimately improve quality of life. Written by a professor with more than two decades of experience teaching and researching health promotion, this comprehensive resource goes beyond the basics, delving into issues such as the application of behavior

change theories, planning models, and current wellness topics like nutrition, physical activity, and emotional well-being, among others. Provides a clear introduction to the most essential topics in health promotion and education Explains behavior change theories and program planning models Explores health promotion's role tackling issues of stress, tobacco use, eating behaviors, and physical activity Includes chapters dedicated to professions, settings, and credentials available in the health promotion field Looks at future trends of health promotion Ideal for students in health promotion, health education, and public health fields, Introduction to Health Promotion prepares students with a comprehensive overview of the foundations, history, and current perspectives of health promotion, as well as its key methods and applications.

Make the most of your contribution to health care delivery! Allied Health: Practice Issues and Trends in the New Millennium is a comprehensive look at present and future concerns in the allied health care field. Leading experts in allied health practice and education address practice and policy issues that have developed as technology and a changing health care environment have created new and expanded roles for allied health professionals. With the allied health field projected to add an estimated four million new jobs by 2005 in the United States alone, this book is an essential resource for maximizing the knowledge and skills necessary to deliver safe, efficient, effective, and equitable care. Allied Health: Practice Issues and Trends in the New Millennium presents an overview of the concerns facing the largest and most diverse pool of health workers in the United States as they provide disease detection, prevention, dietary, health promotion, rehabilitation and health management services at all levels of health care delivery. This unique book addresses critical issues that affect allied health practice, including managed health care, computer technology, drug information, and demographic trends in society, with an emphasis on implications for education. The book also includes appendices listing allied health organizations, accrediting agencies, and descriptions of federally recognized allied health professions. Allied Health: Practice Issues and Trends in the New Millennium presents information on: public policy research needs new directions for accreditation interprofessional collaborative alliances employment opportunities practice directions and much more! Allied health professionals play a critical role in health care delivery, comprising a significant portion of the health care work force with tremendous potential for addressing issues of health care cost, quality, and access within the health care system. Allied Health: Practice Issues and Trends in the New Millennium is an essential resource for the future of health care in the United States and a must read for allied health care educators and students, and health care policymakers. This introductory textbook is aimed at undergraduates studying community dance. Drawing on high profile contributors, the book is packed with case studies, interviews and examples that students can use to explore issues in contemporary dance practice. A resources section includes session plans, evaluation tools and questionnaires.

This book was originally conceived in 1987. It was then seen as a contribution towards improved management and policy-making in a diffuse and neglected area of NHS management. The focus of the book is the 'old' Community Health Services: those transferred to Area Health Authorities from local authorities in the 1974 re organization of the NHS. These diverse services, while grouped together, had little objectively in common, occupying, as they do, a hazy middle ground between hospital and Family

Practitioner Services. However, since 1974 there have been a number of major developments which have opened opportunities for change and development in these services. These include: the resurrection of concern with 'Public Health'; the attempted closure of large mental illness and mental handicap hospitals and the development of 'Community Care'; the introduction of General Management; and the implication for health and local authorities of the White Papers 'Caring for People', 'Promoting Better Health' and 'Working for Patients'. Traditionally, Community Health Services were seen as low status and a professional dead-end. This, in turn, has led to a rather uneven body of literature. The growth of general management has led to a demand for a more coherent, management-orientated literature. It is our hope that this book will encourage the production of more literature in this area.

This book argues that the traditional government approach of exhorting individuals to live healthier lifestyles is not enough - action to promote public health needs to take place not just through public agencies, but also by engaging community assets and resources in their broadest sense.

We weten allemaal dat het moeilijk is om te veranderen. Het kost veel tijd en vaak geven we op bij de eerste tegenslag. Maar waarom zien we wel de beren op de weg en niet de bestemming? Deze vraag beantwoorden Chip en Dan Heath in dit fascinerende boek. We hoeven slechts te begrijpen hoe onze hersenen werken om snelle veranderingen in ons gedrag te realiseren. Op basis van wetenschappelijke studies en opmerkelijke casestudy's laten ze zien dat ogenschijnlijk simpele methodes leiden tot fantastische resultaten.

"In 2019, a child born in Japan will live to the age of 84, whereas a child born in Sierra Leone will only live until the age of 54.1 Similar disparities exist between rich and poor communities within countries.<sup>2</sup> These differences in life expectancy are not caused by genetics, biology, or culture. Health inequities are caused by poverty, racism, a lack of medical care,

and other social forces that influence health. A critical analysis of the historical roots of this gross and systemic inequality and of the political economy that continues inequality is a fundamental part of the study of global health"--

"What Mukherjee attempts, and succeeds in doing, is to offer what many students -- undergraduates as well as students of medicine, nursing, and public health -- have long clamored for: a primer not only of recent developments in global health, but also a patient dissection of what has worked less well (and what hasn't worked at all)." --Paul Farmer, from the foreword

The field of global health has roots in the AIDS pandemic of the late 20th century, when the installation of health care systems supplanted older, low-cost prevention programs to help stem the spread of HIV in low- and middle-income Africa. Today's global health is rooted the belief that health care is a human right, and that by promoting health we can cultivate equity and social justice in places where such values aren't always found. An Introduction to Global Health Delivery is a short but immersive introduction to global health's origins, actors, interventions, and challenges. Informed by physician Joia Mukherjee's quarter-century of experience fighting disease and poverty in more than a dozen countries, it delivers a clear-eyed overview of the movement underway to reduce global health disparities and establish sustainable access to care, including details of what has worked so far -- and what hasn't. Grounded in the historical and social factors that propagate health disparities and enriched with case studies and exercises that encourage readers to think critically about the subject matter, this text is the essential starting point for readers of any background seeking a practical grounding in global health's promise and progress.

Community Health Nursing: Caring for the Public's Health, Third Edition focuses on teaching nursing students about population health and community health nursing

This book explains the growing field of syndemic theory and research, a framework for the analysis and prevention of disease interactions that addresses underlying social and environmental causes. This perspective complements single-issue prevention strategies, which can be effective for discrete problems, but often are mismatched to the goal of protecting the public's health in its widest sense. "Merrill Singer has astutely described why health problems should not be seen in isolation, but rather in the context of other diseases and the social and economic inequities that fuel them. An important read for public health and social scientists." —Michael H. Merson, director, Duke Global Health Institute "Not only does this book provide a persuasive theoretical biosocial model of syndemics, but it also illustrates the model with a wide variety of fascinating historical and contemporary examples." —Peter J. Brown, professor of Anthropology and Global Health and director, Center for Health, Culture, and Society, Emory University "The concept of syndemics is Singer's most important contribution to critical medical anthropology as it interfaces with an ecosocial approach to epidemiology." —Mark Nichter, Regents Professor, Department of Anthropology, University of Arizona "Merrill Singer

offers the public the most comprehensive work ever written on this key area of research and policy making." —Francisco I. Bastos, chairman of the graduate studies on epidemiology, Fundacao Oswaldo Cruz "Exquisitely describes how this new approach is a critical tool that brings together veterinary, medical, and social sciences to solve emerging infectious and non-infectious diseases of today's world." —Bonnie Buntain, MS, DVM, diplomate, American College of Veterinary Preventive Medicine "For too long the great integrative perspectives on modern biomedicine and public health disease ecology and social medicine-have remained more or less separate. In this innovative and provocative book, Merrill Singer develops a valuable synthesis that will reshape the way we think about health and disease." —Warwick H. Anderson, MD, PhD, professorial research fellow, Department of History and Centre for Values, Ethics, and the Law in Medicine, University of Sidney

Written in an accessible, user-friendly, and practical style, this text provides a focused and highly engaging introduction to community health nursing. It focuses on health care for people in their homes and where they live with an overriding emphasis on care of the client in the community, and the business and politics of community health nursing. This book is accompanied by a robust Companion Website full of online activities to enhance the student learning experiences.

Brené Brown heeft de afgelopen twintig jaar onderzoek gedaan naar de emoties en ervaringen die betekenis geven aan ons leven, en werkte de afgelopen zeven jaar nauw samen met leiders en cultuurveranderaars over de hele wereld. Ze ontdekte dat allerlei bedrijfstakken, van kleine start-ups tot Fortune 50-bedrijven, met dezelfde vraag worstelen: 'Hoe ontwikkelen we moediger leiders en hoe verankeren we moed en durf in onze bedrijfscultuur?' In dit nieuwe boek combineert Brené haar onderzoeksresultaten met persoonlijke verhalen en voorbeelden om deze vraag te beantwoorden. Durf te leiden gaat over echt leiderschap: vanuit het hart en vol moed.
