As Alan Rosenthal states in the preface to this new edition of his acclaimed resource for filmmakers, Writing, Directing, and Producing Documentary Films and Videos is "a book about storytelling—how to tell great and moving stories about fascinating people, whether they be villains or heroes." In response to technological advances and the growth of the documentary hybrid in the past five years, Rosenthal reconsiders how one approaches documentary filmmaking in the twenty-first century. Simply and clearly, he explains how to tackle day-to-day problems, from initial concept through distribution. He demonstrates his ideas throughout the book with examples from key filmmakers' work. New aspects of this fourth edition include a vital new chapter titled "Making Your First Film," and a considerable enlargement of the section for producers, "Staying Alive," which includes an extensive discussion of financing, marketing, festivals, and distribution. This new edition offers a revised chapter on nonlinear editing, more examples of precise and exacting proposals, and the addition of a complex budget example with explanation of the budgeting process. Discussion of documentary hybrids, with suggestions for mastering changes and challenges, has also been expanded, while the "Family Films" chapter includes updated information that addresses rapid expansion in this genre.

The war in Iraq has heightened interest in the military mindset and raised questions about whether it's possible to be a mindful, moral fighter at a time when impersonal, technology based warfare reigns. In Search of the Warrior Spirit confronts this thorny issue with Richard Strozzi-Heckler's trademark personal, sympathetic style. In a top-secret U.S. military experiment, the author was asked to teach Eastern awareness disciplines ranging from aikido to meditation to a group of twenty-five Green Berets. This account chronicles his experiences in the training program and his attempts to revive traditional warriorship in a technological society. In Search of the Warrior Spirit explores the nature of war, the meaning of masculinity, and the need for moral values in the military. The book includes Heckler's response to 9/11, his experiences with the Pentagon and U.S. soldiers in Afghanistan, and his poignant reflections on the movie Black Hawk Down, which depicts the deaths of two of his trainees. In this revised edition, the author talks movingly of his visits to Afghanistan with NATO and about the Trojan Warrior Project and Marine Warrior Project, relating the tragic events in a war zone and revelatory conversations with both ordinary soldiers and such leaders as the Supreme Allied Commander of Europe.

Richard Gilman referred to How to Read a Film as simply "the best single work of its kind." And Janet Maslin in The New York Times Book Review marveled at James Monaco's ability to collect "an enormous amount of useful information and assemble it in an exhilaratingly simple and systematic way." Indeed, since its original publication in 1977, this hugely popular book has become the definitive source on film and media. Now, James Monaco offers a special anniversary edition of his classic work, featuring a new preface and several new sections, including an "Essential Library: One Hundred Books About Film and Media You Should Read" and "One Hundred Films You Should See." As in previous editions, Monaco once again looks at film from many vantage points, as both art and craft, sensibility and science, tradition and technology. After examining film's close relation to other narrative media such as the novel, painting, photography, television, and even music, the book discusses the elements necessary to understand how films convey meaning, and, more importantly, how we can best discern all that a film is attempting to communicate. In addition, Monaco stresses the still-evolving digital context of film throughout--one of the new sections looks at the untrustworthy nature of digital images and sound--and his chapter on multimedia brings media criticism into the twenty-first century with a thorough discussion of topics like virtual reality, cyberspace, and the proximity of both to film. With hundreds of illustrative black-and-white film stills and diagrams, How to Read a Film is an indispensable addition to the library of everyone who loves the cinema and wants to understand it better.

The long tradition of Kierkegaard studies has made it impossible for individual scholars to have a complete overview of the vast field of Kierkegaard research. The large and ever increasing number of publications on Kierkegaard in the languages of the world can be simply bewildering even for experienced scholars. The present work constitutes a systematic bibliography which aims to help students and researchers navigate the seemingly endless mass of publications. The volume is divided into two large sections. Part I, which covers Tomes I-V, is dedicated to individual bibliographies organized according to specific language. This includes extensive bibliographies of works on Kierkegaard in some 41 different languages. Part II, which covers Tomes VI-VII, is dedicated to shorter, individual bibliographies organized according to specific figures who are in some way relevant for Kierkegaard. The goal has been to create the most exhaustive bibliography of Kierkegaard literature possible, and thus the bibliography is not limited to any specific time period but instead spans the entire history of Kierkegaard studies.
