Theo Decker, een dertienjarige jongen uit New York, overleeft op wonderbaarlijke wijze een aanslag waarbij zijn moeder om het leven komt. Zijn vader is een paar maanden daarvoor verdwenen en Theo komt na de aanslag bij de familie van een rijke vriend terecht. Hij is verbijsterd door zijn nieuwe leefomgeving, verward door zijn klasgenoten die het moeilijk vinden met hem om te gaan en diepbedroefd door het verlies van zijn moeder. Theo vindt houvast aan dat ene object dat hem aan haar doet denken: een klein, mysterieus schilderij, dat hem uiteindelijk in de onderwereld van de kunst doet belanden. Het puttertje is een roman met een ongekennde energie en vertelkracht, waarin Donna Tartt levendige personages, betoverend taalgebruik en adembenemende spanning combineert met diepgaande bespiegelingen over liefde, identiteit en kunst. Een prachtig boek over verlies, obsessie, overlevingskracht en de meedogenloze speling van het lot. Donna Tartt is geboren in Greenwood, Mississippi. Ze studeerde klassieke talen en filosofie aan Bennington College, Vermont. Ze is de auteur van *De verborgen geschiedenis* en *De kleine vriend*. Haar werk is in meer dan dertig talen verschenen.

The goal of this book is to search for a balance between simple and analyzable models and unsolvable models which are capable of addressing important questions on population biology. Part I focusses on single species simple models including those which have been used to predict the growth of human and animal population in the past. Single population models are, in some sense, the building blocks of more realistic models -- the subject of Part II. Their role is fundamental to the study of ecological and demographic processes including the role of population structure and spatial heterogeneity -- the subject of Part III. This book, which will include both examples and exercises, is of use to practitioners, graduate students, and scientists working in the field.

Haar naam was Henrietta Lacks, maar de medische wereld kent haar als HeLa. In de jaren '50 werden haar kankercellen zonder dat zij dat wist bij haar weggenomen. Met behulp van deze cellen, die letterlijk onsterfelijk zijn, werden de meest uiteenlopende geneeskundige ontdekkingen gedaan en rond de verkoop ervan ontstond een miljoenenindustrie. Het leven van Henrietta bleef echter vrijwel onbekend en ook haar familie wist tot ruim dertig jaar geleden niet van het bestaan van de cellen af. Rebecca Skloot vertelt het verhaal van de 'HeLa-cellen', maar laat ons vooral ook kennis maken met Henrietta, haar verleden en haar familie, die nog steeds worstelt met de nalatenschap van de cellen. Ze laat zien dat het verhaal van de familie Lacks onlosmakelijk verbonden is met de duistere geschiedenis van het experimenteren met Afrikaans-Amerikanen, het ontstaan van de ethiek binnen de biologie en de juridische strijd over de vraag of we de baas zijn over de materie waarvan we zijn gemaakt.

Dit boek behandelt de theorie en pikt en passant ook nog kernenergie mee en een hoop natuurkunde.
