Many parents find it a constant struggle to do the right thing by their child and ensure they have a healthy relationship with food. Baby Led Weaning is a great place to start! But it's also kind of scary to just put food in front of our children and watch them grab food and shove it in their mouths. We sweat when

they gag and we hope they don't choke. We're also hoping that by introducing high allergen foods into their diet early on will help combat food allergies when they grow older.

Pediatricians may tell us to wait 3-4 days in between introducing a new food while other resources point out that an allergic reaction to food could happen at any point of eating a food. It gets even more difficult when we're watching our baby wean themselves and hope each time they have a peanut butter and jelly sandwich that they don't develop an allergy.

You can use this journal to help identify certain food triggers/symptoms and patterns that can be used along side your doctor to figure out a plan of action and treatment. This journal is a basic lined journal designed to make tracking your baby's diet the way you want. There are 119 pages, one for each day for you to log what food your child is eating for breakfast, lunch, dinner, and a snack as well as any possible symptoms your baby may be experiencing due to a food allergy or sensitivity.
