Accepted, Inc. is an independent test prep study guide company that produces and prints all of our books right here in the USA. Our dedicated professionals know how people think and learn, and have created our CLEP book based on what research has shown to be the fastest, easiest, and most effective way to prepare for the exam. Unlike other study guides that are stamped out in a generic fashion, our CLEP test prep manual is specifically tailored for your exact needs. Our goal here at Accepted, Inc. is to help you: Study Smarter; We've eliminated the filler; and fluff; you see in a lot of mass-market guides, allowing you to have more effective study time. Score Higher; We exclusively work with tutors, teachers, and field experts to write our books. This ensures you get the tips, takeaways, and test secrets that a one-on-one tutoring experience provides. Unlike a tutoring session, however, our books enable you to prepare for your exam on your own schedule at a fraction of the cost. and Get Accepted We offer

The Review Guide for NLN-RN Pre-Entrance Exam provides an overview of the math, science, and verbal content necessary for admission to AD and BS programs in nursing. Includes approximately 1000 questions and 3 practice exams in each of the three areas: math, science, and verbal. Also includes helpful tips for test preparation and for becoming a more effective learner and test taker.

While many people talk about the Constructivist philosophy, there has not been a publication that provides a detailed description of what a Constructivist classroom sounds like and looks like. This book fills that void by examining the philosophy, translating it into teaching strategies, and providing over forty examples. These examples come from the elementary level up to

and including the collegiate level, and include all content areas. These examples show how the Constructivist educator uses the linguistic mode, the visual mode, and the kinesthetic mode to create a class environment in which the Constructivist philosophy flourishes. Examples of student work are provided; the book also includes chapters on note-taking, Problem-Based Learning (PBL), action research, and other Constructivist resources. Written in user-friendly form, this book presents a concrete and step by step approach for translating the Constructivist philosophy into classroom practice. This book is intended for every Constructivist researcher, practitioner, and teacher-educator. The researcher and teacher-educator will benefit from topics such as the history of Constructivist thought, the principles of Constructivism and action research. This book is more than a list of recipes, and this will be beneficial to the practitioner. Starting with the principles of Constructivism, and bridging to four basic teaching strategies, the practitioner is guided on how to use different learning modes and “meta-strategies” to create a true Constructivist practice. An educator’s life is made up of one’s philosophy, teaching principles, daily strategies, resources, and research tools. This book provides an in-depth look, from the Constructivist perspective, at each one of these components. In every sense of the word, this book is truly “comprehensive.” Contains a comprehensive summary of the entire course, activities, glossary of terms and a list of websites.
