Atlantic history, with its emphasis on inter-regional developments that transcend national borders, has risen to prominence as a fruitful perspective through which to study the interconnections among Europe, North America, Latin America, and Africa. These original essays present a comprehensive and incisive look at how Atlantic history has been interpreted across time and through a variety of lenses from the fifteenth through the early nineteenth century. Editors Jack P. Greene and Philip D. Morgan have assembled a stellar cast of thirteen international scholars to discuss key areas of Atlantic history, including the British, Spanish, Portuguese, Dutch, French, African, and indigenous worlds, as well as the movement of ideas, peoples, and goods. Other contributors assess contemporary understandings of the ocean and present alternatives to the concept itself, juxtaposing Atlantic history with global, hemispheric, and Continental history.

The Age of Addiction chronicles the triumph of what he calls “limbic capitalism,” the growing network of competitive businesses targeting the brain pathways responsible for feeling, motivation, and long-term memory.

In 1762, British forces mobilized more than 230 ships and 26,000 soldiers, sailors, and enslaved Africans to attack Havana, one of the wealthiest and most populous ports in the Americas. They met fierce resistance. Spanish soldiers and local militias in Cuba, along with enslaved Africans who were promised freedom, held off the enemy for six suspenseful weeks. In the end, the British prevailed, but more lives were lost in the invasion and subsequent eleven-month British occupation of Havana than during the entire Seven Years' War in North America. The Occupation of Havana offers a nuanced and poignantly human account of the British capture and Spanish recovery of this coveted Caribbean city. The book explores both the interconnected histories of the British and Spanish empires and the crucial role played by free people of color and the enslaved in the creation and defense of Havana. Tragically, these men and women would watch their promise of freedom and greater rights vanish in the face of massive slave importation and increased sugar production upon Cuba's return to Spanish rule. By linking imperial negotiations with events in Cuba and their consequences, Elena Schneider sheds new light on the relationship between slavery and empire at the dawn of the Age of Revolutions.

Kentucky is the home of bourbon, and there are a proud few who helped usher the industry into prominence. Learn about men like bourbon baron Isaac Bernheim, who founded the Bernheim Forest and Research Center, or John Douglas, who built a racetrack for the trotter racing industry and was known as the "Prince of Sports." George Garvin Brown and his business partner, George Forman, formed the Brown-Forman Company, which today is one of the largest American-owned companies in the spirits and wine business. With such enormous wealth came the temptation for fraud, which led to several bourbon leaders becoming involved in some of Kentucky's famous scandals. Author and Kentucky historian Bryan S. Bush details the intoxicating history of bourbon's biggest historical names.

The Spanish city of New Orleans reveals much about the challenges and opportunities facing the Bourbon empire in the late 18th century. This dissertation focuses upon three issues in Bourbon New Orleans - demography, trade, and political discourse - using a full spectrum of archival sources and innovative methodologies, including the use of a large data base to determine historical demographic and economic patterns. These three issues represented layered stages, near-simultaneous steps in the evolution of Spanish New Orleans. This dissertation argues that each of these evolutionary steps provided to Spanish Bourbons with both challenges of governance and genuine opportunities to effectively expand imperial citizenship and imperial territory, profit from trans-imperial trade, and broaden political discourse, if the Bourbon ruler truly wished to expand his geographic, commercial, and political power. However, this dissertation argues that the Spanish empire began to disintegrate much earlier than the 1808 Bourbon abdication. Instead, that disintegration officially began in early 1803 with the cession of New Orleans and Louisiana, and arguably began even earlier, based upon the governance choices of Charles III. Those choices permitted demography, then trade, and finally a mature political practice and discourse to erode Bourbon control of their largest and newest colony. However, those choices also permitted a relatively seamless transition of New Orleans and the entire colony into a new empire, that of the United States of America.

A comparative study of the power and limits of bureaucracy in historical empires from ancient Rome to the twentieth century.

"Addiction Reimagined: Challenging Views of an Enduring Social Problem" outlines the current issues in the field of substance use and addiction by thoroughly analyzing its history and other concerns such as diagnosis, treatment, and prevention measures, or the effect of addiction on the family and its connection to the criminal justice system. In this work, Professor Steverson calls for a reimagining of our past and current understandings of addiction and its role as a social, rather than a medical, problem. "Addiction Reimagined" provides a macro-level (i.e. sociological) approach to the examination of the processes and treatment modalities of addiction. This book will be valuable to those who are interested in addiction and the mental health system (people who have addiction problems or policy makers, for instance) as well as to practitioners in the field and people concerned about a failing system, and who would like to make it more functional. It will also be useful to university students undertaking courses such as The Sociology of Addiction or Sociology of Substance Abuse.

"Paris is divided longitudinally by the course of the Seine, whose windings are scarcely noticed by the observer taking a bird's-eye view. The river looks like a silver thread between two borders of green.

These are the plantations of the quays, whose trees, during the last five-and-twenty years, have become as remarkable for their luxuriant growth as for their beauty of form. From the height of our observatory we see the Island of the City, looking like a ship at anchor, with its prow towards the west. On all sides the summits of religious edifices present themselves: the towers of Notre-Dame, the dome of the Pantheon, the turrets of Saint-Sulpice, the steeple of Saint-Germain-des-Prés, the gilded cupola of the Invalides, and the lofty isolated belfry of Saint-Jacques-de-la-Boucherie."

This volume elucidates Bourbon colonial policy with emphasis on Madrid's efforts to reform and modernize its American holdings. Set in an Atlantic world context, the book highlights the interplay between Spain and America as the Spanish empire struggled for survival amid the fierce international competition that dominated the eighteenth century. The authors use extensive research in the repositories of Spain and America, as well as innovative consultation of the French Foreign Affairs archive, to bring into focus the poorly understood reformist efforts of the early Bourbons, which laid the foundation for the better-known agenda of Charles III. As the book unfolds, the narrative puts flesh on the men and women who, for better or worse, influenced colonial governance. It is the story of power, ambition, and idealism at the highest levels.

The rise and fall of the man who cracked Prohibition to become one of the world's richest criminal masterminds—and helped inspire *The Great Gatsby*. Love, murder, political intrigue, mountains of cash, and rivers of bourbon...The tale of George Remus is a grand spectacle and a lens into the dark heart of Prohibition. Yes, Congress gave teeth to Prohibition in October, 1919, but the law didn't stop George Remus from amassing a fortune that would be worth billions of dollars today. As one Jazz Age journalist put it, "Remus was to bootlegging what Rockefeller was to oil." Author Bob Batchelor breathes life into the largest bootlegging operation in America—greater than that of Al Capone—and a man considered the best criminal defense lawyer of his era. Remus bought an empire of distilleries on Kentucky's "Bourbon Trail" and used his other profession, as a pharmacist, to profit off legal loopholes. He spent millions bribing officials in the Harding Administration, and he created a roaring lifestyle that epitomized the Jazz Age over which he ruled. That is, before he came crashing down in one of the most sensational murder cases in American history: a cheating wife, the G-man who seduced her and put Remus in jail, and the plunder of a Bourbon Empire. Remus murdered his wife in cold-blood and then shocked a nation winning his freedom based on a condition he invented—temporary maniacal insanity. "The fantastic story of George Remus makes the rest of the "Roaring Twenties" look like the "Boring Twenties" in comparison." ?David Pietrusza, author of 1920: The Year of the Six Presidents

century

In the first decades of the 1800s, after almost three centuries of Iberian rule, former Spanish territories fragmented into more than a dozen new polities. Edge of Empire analyzes the emergence of Montevideo as a hot spot of Atlantic trade and regional center of power, often opposing Buenos Aires. By focusing on commercial and social networks in the Rio de la Plata region, the book examines how Montevideo merchant elites used transimperial connections to expand their influence and how their trade offered crucial support to Montevideo's autonomist projects. These transimperial networks offered different political, social, and economic options to local societies and shaped the politics that emerged in the region, including the formation of Uruguay. Connecting South America to the broader Atlantic World, this book provides an excellent case study for examining the significance of cross-border interactions in shaping independence processes and political identities.
