Aboriginal claims remain a controversial but little understood issue in contemporary Canada. British Columbia has been, and remains, the setting for the most intense and persistent demands by Native people, and also for the strongest and most consistent opposition to Native claims by governments and the non-aboriginal public. Land has been the essential question; the Indians have claimed continuing ownership while the province has steadfastly denied the possibility.

Gorbatsjov geeft zijn visie op de 21e eeuw Dertig jaar nadat het verscheurende conflict tussen Oost en West ten einde kwam wordt de wereldvrede opnieuw aan het wankelen gebracht. Amerika heeft zich

teruggetrokken uit het ontwapeningsverdrag met Rusland, de Europese Unie valt uit elkaar terwijl China aan een onvoorziene opmars bezig is, en wereldwijd worden vrijheid en zelfbeschikking bedreigd door een golf van nationalisme en radicale ideologieën. Met het oog op deze alarmerende wereldwijde werkelijkheid waarschuwt Michail Gorbatsjov ons voor de potentieel catastrofale gevolgen hiervan. Gorbatsjov, winnaar van de Nobelprijs voor de Vrede in 1990 voor zijn rol in het beëindigen van de Koude Oorlog, vreest voor een nieuwe, allesvernietigende oorlog als gevolg van het falen van de politieke leiders in het vinden van internationale oplossingen. In zijn betoog legt hij de nadruk op de grote uitdagingen waartegenover de wereld nu staat, zoals de inperking van de democratie en de opkomst van populistten, en vestigt hij zijn hoop op dialoog en verzoening. Wat er op het spel staat is een cruciale boodschap van een man die weet wat het is om op het wereldtoneel een inspirerend pleidooi te houden voor leiderschap en internationale samenwerking.

The U.S. economy is highly dynamic: businesses open and close, workers switch jobs and start new enterprises, and innovative technologies redefine the workplace and enhance productivity. With globalization markets have also become more interconnected. Measuring business activity in this rapidly evolving environment increasingly requires tracking complex interactions among firms, establishments, employers, and employees.

Understanding Business Dynamics presents strategies for improving the accuracy, timeliness, coverage, and integration of data that are used in constructing aggregate economic statistics, as well as in microlevel analyses of topics ranging from job creation and destruction and firm entry and exit to innovation and productivity. This book offers recommendations that could be enacted by federal statistical agencies to modernize the measurement of business dynamics, particularly the production of information on small and young firms that can have a disproportionately large impact in rapidly expanding economic sectors. It also outlines the need for effective coordination of existing survey and administrative data sources, which is essential to improving the depth and coverage of business data.

In *A Narrow Vision*, Brian Titley chronicles Scott's career in the Department of Indian Affairs and evaluates developments in Native health, education, and welfare between 1880 and 1932. He shows how Scott's response to challenges such as the making of treaties in northern Ontario, land claims in British Columbia, and the status of the Six Nations caused persistent difficulties and made Scott's term of office a turbulent one. Scott could never accept that Natives had legitimate grievances and held adamantly to the view that his department knew best.

Nineteenth-century farm families needed land for the next generation. Their quest shaped agricultural settlement across Canada. This overview of rural history in Quebec, Ontario, and the Prairies provides a new perspective on the ways in which agriculture and the family farm were central to the country's expansion and essential to understanding social, political, and economic changes. *How Agriculture Made Canada* shows how differences between the agricultural development of Quebec and that of Ontario had a decisive influence on the settlement of the Prairies. Peter Russell demonstrates that farming families eventually ran out of land against the edges of the St Lawrence lowlands. While Quebec-based Habitants reached their region's limits earlier, Ontario encouraged people to migrate west. Russell argues that the thousands of relocated Ontario farmers changed Manitoba's bilingual openness to an exclusively English-speaking province that then assimilated East European arrivals. Thus, if not for the agricultural crises in the Canadas, Manitoba might have been at least as francophone as anglophone. The first comprehensive synthesis on the history of Canadian farming in decades, *How Agriculture Made Canada* reveals the lasting impact that nineteenth-century agricultural changes have had on the nation.
