Adam Smith's 'invisible hand' relied on the self-interest of individuals to produce good outcomes. Economists' belief in efficient markets took this idea further by assuming that all individuals are selfish. This belief underpinned financial deregulation, and the theories on incentives and performance which supported it. However, although Adam Smith argued that although individuals may be self-interested, he argued that they also have other-regarding motivations, including a desire for the approbation of others. This book argues that the trust-intensive nature of financial services makes it essential to cultivate such other-regarding motivations, and it provides proposals on how this might be done. Trustworthiness in the financial services industry was eroded by deregulation and by the changes to industry structure which followed. Incentive structures encouraged managers to disguise risky products as yielding high returns, and regulation failed to curb this risk-taking, rent-seeking behaviour. The book makes a number of proposals for reforms of governance, and of legal and regulatory arrangements, to address these issues. The proposals seek to harness values and norms that would reinforce 'other-regarding' behaviour, so that the firms and individuals in the financial services act

in a more trustworthy manner. Four requirements are identified which together might secure more strongly trustworthy behaviour: the definition of obligations, the identification of responsibilities, the creation of mechanisms which encourage trustworthiness, and the holding to account of those involved in an appropriate manner. Financial reforms at present lack sufficient focus on these requirements, and the book proposes a range of further actions for specific parts of the financial industry.

The aquaculture industry is fast expanding around the globe and causing major environmental and social disruptions. The volume is about getting a 'good governance' grip on this important industry. The book highlights the numerous law and policy issues that must be addressed in the search for effective regulation of aquaculture. Those issues include among others: the equitable and fair assignment of property rights; the design of effective dispute resolution mechanisms; clarification of what maritime laws apply to aquaculture; adoption of a proper taxation system for aquaculture; resolution of aboriginal offshore title and rights claims; recognition of international trade law restrictions such as labeling limitations and food safety requirements; and determination of whether genetically modified fish should be allowed and if so under what controls. This book will appeal to a broad range of audiences: undergraduate and postgraduate students, academic researchers, policy makers, NGOs, practicing lawyers and industry representatives.

The First Edition of this text was written at a time when the structures of international relations were undergoing a profound transformation, with the collapse of Soviet-style communism just behind us and the creation of NAFTA and the WTO just ahead. The Second Edition came at a time when NAFTA and the WTO had taken shape but not yet acquired a history. At the time of the Third Edition, both of those structures can be studied in detail and their ramifications for the world economy can be better appreciated. In the interim, the Internet has established itself as a presence in innumerable firms and households, and the dot com bubble has come and gone. The services-oriented information economy seems no longer to be emerging, but rather a fundamental aspect of contemporary business. The Fourth Edition of International Business and Economics reflects the growth and development of the global economy as well as the way law schools prepare lawyers to work in that world. The book was written in the shadow of a financial crisis that seemed at times destined to bring international economic catastrophe, but which so far has been grim but not disastrous. The book has been revised more comprehensively than any of the earlier successor editions. For example, materials on international civil
