Understanding PISA's Attractiveness examines how policy makers and the media interpret the results of PISA league-leaders, losers, and slippers in ways that suit their own reform agendas. As a result, a myriad of explanations exist as to why an educational system is high or low performing. The chapters, written by leading scholars from Australia, Austria, Denmark, Finland, Germany, Norway, Singapore, South Korea, Spain, Sweden, Taiwan, the UK and the USA, provide a fascinating account of why results from PISA and other international large-scale assessments are interpreted and translated differently in the various countries. The analyses in this book bring to light the wide array of idiosyncratic projections into these international tests. In some countries, these tests are also used to scandalise one's own educational system and to generate quasi-external reform pressure. Compiled by two leading scholars in comparative education, Florian Waldow and Gita Steiner-Khamsi, this book offers a truly global perspective on the uses and abuses of PISA and will be of great interest to students and academics working in educational policy, comparative education and political science and those working on large-scale data sets.

This book provides an in-depth understanding of how children's development at different stages of their lives interfaces with the kind of education and support they need at school and home. It examines closely how education, in turn, influences their development and prepares them for an uncertain future. The chapters focus on the rapid developments of the 21st century that are changing the nature of education, especially the shift needed to being able to sift through and meaningfully deal with overwhelming volumes of information now available. This book helps readers understand how children can benefit from the digital environment while avoiding its pitfalls. Keeping in mind that in today's world parents are getting to spend less time with their children, the authors provide research-backed ideas on how they can best enable children's development, including their thoughts, feelings and notions of self. Given the increasing disparities, there is a perceptive analysis of how education can build an awareness of equity in a context marked by diversity and disadvantage. This book addresses issues such as these in a reliable, scholarly yet accessible manner, for students, young researchers and lay readers. Consequently, it is a valuable source of fundamental insights and understanding for educators, policy-makers, educational administrators and students of human and child development, education, and teacher training courses.
