Written to support and enhance assessment alongside the pupil texts, these resources offer a range of material for the OCR specification. They provide test questions for each chapter together with detailed mark schemes to make assessment easy. Two versions of each question are provided, one allows pupils to write their answers in the spaces provided and the other requires pupils to have separate writing paper. Questions can be grouped according to needs. Master grids are provided to cut and paste tests together in a consistent format to use the resource in any order. Chapter tests can be grouped to form a module test after chapters. End-of-chapter examinations can also be produced in this way. A free non-calculator supplement organised by unit/chapter is also included in this resource.

Love and Promise is a story played out against the backdrop of a rural Upstate New York community where the grandson of Lebanese and Italian immigrants endeavors to overcome prejudice. A farm boy struggles to be accepted for his accomplishments rather than his ethnicity and lineage. James Rahin, tired of living the life of a dirt-poor farmer, dreamt of the good life. He wanted a nice house, a new car, and clothes that were not hand-me-downs. He observed that the glaring differences between his poor friends and relatives, and those who had the things he craved to have, was wealth. People with money either own a successful business or they were educated professionals. In his junior year of high school Jim became obsessed with the idea of attending college. His goal was to attend college and law school. Jim's attitude about life and women hardens when his older brother married an attractive blond. Jim saw the responsibilities of marriage forever alter Joe's priorities. Attending college could no longer be one of his brother's goals. Jim vowed that he would never allow anything or anyone to deter him from his dream. In high school Jim met Laura, a winsome girl who introduced him to a woman's warmth and passion. She tried to possess him with her body, but her carnal pleasures were not enough to sway him from his self-promise. Connie broke Jim's heart and set him on a path of distrust. Women were only visitors to his affection. He took what was offered but avoided the pitfalls of love. Through personal loss, an enlistment in the Marines, and bigotry at home and away- Jim stayed true to his promise. Then he met Hope.

The conservation of marine benthic biodiversity is a recognised goal of a number of national and international programs such as the United Nations Convention on Biodiversity (CBD). In order to attain this goal, information is needed about the distribution of life in the ocean so that spatial conservation measures such as marine protected areas (MPAs) can be designed to maximise protection within boundaries of acceptable dimensions. Ideally, a map would be produced that showed the distribution of benthic biodiversity to enable the efficient design of MPAs. The dilemma is that such maps do not exist for most areas and it is not possible at present to predict the spatial distribution of all marine life using the sparse biological information currently available. Knowledge of the geomorphology and biogeography of the seafloor has improved markedly over the past 10 years. Using multibeam sonar, the benthic ecology of submarine features such as fjords, sand banks, coral reefs, seamounts, canyons, mud volcanoes and spreading ridges has been revealed in unprecedented detail. This book provides a synthesis of seabed geomorphology and benthic habitats based on the most recent, up-to-date information. Introductory chapters explain the drivers that underpin the need for benthic habitat maps, including threats to ocean health, the habitat mapping approach based on principles of biogeography and benthic ecology and seabed (geomorphic) classification schemes. Case studies from around the world are then presented. They represent a range of seabed features where detailed bathymetric maps have been combined with seabed video and sampling to yield an integrated picture of the benthic communities that are associated with different types of benthic habitat. The final chapter examines critical knowledge gaps and future directions for benthic habitat mapping research. Reviews and compares the different methodologies currently being used Includes global case studies Provides geological expertise into what has traditionally been a biological discipline
