By employing various computer-aided management systems, construction businesses have increased their profitability and the systematic way their companies function. *Managing Business in the Civil Construction Sector Through Information Communication Technologies* supplies a compendium of innovative research that highlights the use of computer-aided design and tools and the vital role that such forms of information technology have to play in the actual production activities of any civil construction company. Subsequent chapters focus on equally vital areas such as that of construction management, contracts management, materials management, human resource management, and enterprise resource planning. Chapters on cloud computing technology, internet of things, and artificial intelligence enable readers to acquire an overview and grasp the basics of these latest trending technologies. This book is ideally designed for construction firms, students, entrepreneurs, industry professionals, IT consultants, and academicians.

This book is intended for IT administrators who want to use Citrix® as a desktop virtualization solution or for IT architects who want to learn how to design and implement highly available and scalable XenDesktop® environments. It is assumed that you have intermediate-level knowledge of virtualization concepts, Windows desktop operating systems, and Windows Server technologies. Citrix®, Citrix Systems®, XenApp®, XenDesktop®, and CloudPortal™ are trademarks of Citrix® Systems®, Inc. and/or one or more of its subsidiaries, and may be registered in the United States Patent and Trademark Office and in other countries.

This is a practical, concise step-by-step tutorial with screenshots for carrying out tasks showing you how to manage and administer a XenServer in your business. The author brings his own extensive knowledge of XenServer. The book is full of best practices and tips that will help you benefit from the author's experience in working with XenServer. If you are an administrator working on XenServer, this book is for you. The book assumes that you have a basic understanding of XenServer administration, but need not have working experience with XenServer. You must be well aware of virtualization concepts as the book does not cover that. IT consultants, service providers and architects, who want to approach XenServer as a virtualization platform will also find this book useful.

To readers who could be merely surfing the pages to catch a quick glimpse as to what cloud computing is all about, to the more serious and corporate users, the book is expected to provide at least a humble modicum of nourishment to set them off on a journey that would no doubt help them achieve success to the cloud and beyond. The book focus on the technical aspects of cloud insofar as speeding up the process of grasping the concerned facts and the underlying economic benefits of cloud computing.

The Citrix Certified Administrator (CCA) credential is the first tier of Citrix certification. The CCA is most often sought out by IT professionals whose networks employ Citrix virtualization technology, and for those IT professionals who are seeking a broad base of general network expertise. The number of CCAs is estimated at between 65 and 70K, up from 45,000 in 2003. Citrix recently released a new version of its most popular product, XenApp (formerly Presentation Server). This new version is fully compatible with Windows Server 2008. To retain their CCA credential, all current CCAs will need to upgrade to the new software. This will be particularly important to those companies enrolled in Citrix partner programs, as current certification is a requirement of the program. When packaged with practice exams, this prep kit will offer an affordable, effective solution for CCA certification and re-certification. Complete exam-prep package includes full coverage of new XenApp 5.0 objectives Authored by a Citrix expert with hundreds of implementations to his credit This preparation kit can also be used as a reference guide for administrators who need to integrate XenApp 5.0 with their networks
