The Mount Sinai Expert Guides, published by Wiley and endorsed by Mount Sinai School of Medicine in New York, provide rapid access, point-of-care clinical information on the most common diseases in a range of different therapeutic areas. Each title focuses on a different speciality and emphasis throughout is on providing rapid-access, clear clinical guidance to aid physicians with point-of-care management of their patients. Each title is edited by a renowned specialist from Mount Sinai, normally the Chair of the department, who is responsible for recruiting key faculty members to author the chapters. A chapter template has been developed to which each chapter author must adhere, so as to ensure complete consistency across all the chapters in each book and also across every book in the series. Accompanying each book is a companion website containing accessory materials such as case studies, video clips, MCQs, patient advice and PQRI/ICD codes. Mount Sinai Expert Guides: Psychiatry will provide specialist trainees and recently qualified specialists in psychiatry with an extremely clinical, affordable and accessible handbook covering the specialty. It will be

This volume contains the proceedings of the 22nd International Conference on Medical Informatics Europe 2009 (MIE) in Sarajevo, Bosnia and Herzegovina, September 2009. The scientific topics presented in these proceedings range from national and transnational ehealth roadmaps, health information and electronic health record systems, systems interoperability and communication standards, medical terminology and ontology approaches, and social networks to web, web 2.0, and semantic web solutions for patients, health personnel and researchers.

This 4th edition of Introduction to Nursing Informatics is designed for use by practicing nurses and students in undergraduate programs of study. It presents the fundamental concepts of Nursing Informatics, and includes a number of contributions from leading experts who have practiced in the field of informatics over a number of years. The information is presented and integrated in a purposeful manner to encourage you to explore key concepts, starting with the fundamental concepts and then progressing on to core concepts and practice applications in the later sections. Briefly, the word CARE is presented as an acronym for Connected Health, Administration, Research and Education and the book is organised in sections with these sub themes. Critically, the content is linked with case-based examples to contextualize the theory presented.
