Combining real-life stories about people selecting places to live with design thinking principles and interactive tools, Right Place, Right Time will appeal to empty nesters, retirees, solo agers, and even adult children seeking ways to support their parents and loved ones. A biographical dictionary of noteworthy men and women of the Central and Midwestern States.

"This all-encompassing volume examines the needs of the growing population of elderly and disabled people and provides answers to many of the problems involved in housing them. The wide range of residential features evaluated, from architectural factors to furniture arrangement, gives the designer clear awareness of available options. The author draws on the latest research in architecture, technology, product design, physical therapy, behavioral science and rehabilitation. This wealth of knowledge, much of it based on successful European innovations, enables designers to more easily incorporate rehabilitation principles into their designs"--Back cover.

Hand Rehabilitation in Occupational Therapy Routledge 1981- in 2 v.: v.1, Subject index; v.2, Title index, Publisher/title index, Association name index, Acronym index, Key to publishers' and distributors' abbreviations. In De man die zijn vrouw voor een hoed hield vertelt Oliver Sacks de verhalen van mensen die lijden aan perceptuele en intellectuele afwijkingen: patiënten die hun herinneringen kwijt zijn, niet langer in staat zijn om geliefden of alledaagse voorwerpen te herkennen, of

patiënten die te maken hebben met tics en die zonder dat te willen obsceniteiten schreeuwen. Hoewel deze gevallen ons vaak bizar voorkomen, worden ze door Sacks' respectvolle en sympathieke wijze van vertellen diep menselijk. Aan de hand van fascinerende en vaak ontroerende ziektegeschiedenissen laat Sacks zien hoe het is om te moeten leven met een neurologische afwijking.

Systems and nursing: Conceptualization of the neuman systems model ; Application of the neuman systems model to nursing education ; Application of the neuman systems model to nursing practice ; Nursing administration and the neuman systems model ; Nursing research and the neuman systems model ; International use of the neuman systems model ; From the past to new beginnings.

'Verpleegkundige interventies' is de vertaling van 'Nursing Interventions Classification (NIC)'. Deze vierde, herziene Nederlandse editie is gebaseerd op de zesde Amerikaanse druk. Het boek biedt een gestructureerde indeling (taxonomie) van verpleegkundige handelingen en verrichtingen. De belangrijkste kenmerken van de NIC zijn: - volledigheid: meer dan 500 interventies; - evidence-based; - vanuit de bestaande praktijk ontwikkeld; - weerspiegelt de actuele klinische praktijk en recent onderzoek; - duidelijke en klinisch zinvolle terminologie; - in het veld getoetst; - gecombineerd met de NANDA-diagnoses.

"Official publication of the American Occupational Therapy Association".

Alzheimer is dé uitdaging in de gezondheidszorg van

deze eeuw. Alleen al in Nederland zijn er zo'n 250.000 mensen met deze ziekte, wereldwijd zullen er 105 miljoen patiënten zijn in 2050. Onderzoekers Wiesje van der Flier en Philip Scheltens werken aan een toekomst waar wél genezing of misschien zelfs preventie van alzheimer mogelijk is. Het alzheimermysterie laat zien wat de ziekte inhoudt, wat het verschil is met andere vormen van dementie, wat de stand van zaken is in het onderzoek, hoe de ziekte te behandelen is en wat je eventueel kunt doen om het te voorkomen.

Vols. for 1980- include: Directory of American Jewish institutions.

This resource and planning guide provides a framework for practitioners to create an effective educational program for students with traumatic brain injuries.

Chapters 1 and 2 provide an overview of brain injuries including information on brain physiology, types of brain injuries, and differences by age. Chapter 3 discusses returning to school, home, and the community after a brain injury. Chapter 4 provides information on screening, referrals, and determination for special education. It also includes information on developing an individualized education program (IEP). Chapter 5 discusses the assessment of educational needs, including assessment goals, planning the assessment, choosing assessment methods, interpreting results, and re-evaluation. Chapter 6 describes components that should be addressed in individualizing an education program, including physical abilities, cognitive abilities, academic activities, and nonacademic activities. Chapter 7 discusses behavior management from understanding

underlying factors to designing behavioral interventions and implementing behavior management strategies. Chapter 8 presents material on providing physical, occupational, and speech and language therapy. Chapter 9 discusses empowering the family and relationships with siblings and peers. Chapter 10 focuses on preventing injuries and identifying remedies. Chapter 11 includes appendices on federal legislation definitions, measures of consciousness, and a tip sheet on parental preparation for IEP Meetings. An extensive resource list of materials and organizations is provided. (Individual chapters contain references.) (CR)

Some vols. include supplemental journals of "such proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and respecting which the injunction of secrecy was afterwards taken off by the order of the House."

The classic foundation work developed by Sally Ryan, COTA, ROH, has been completely revised and updated to reflect current healthcare trends. The reformulation of Ryan's Occupational Therapy Assistant: Principles, Practice Issues and Techniques, Third Edition includes occupation-based case studies that highlight the didactic material presented in each chapter, along with an updated style of information. Four sections make up the new integrated text. The first section looks at important foundation concepts such as history, uniform technology, and the occupational therapy process. The second section introduces readers to people who are experiencing the challenges of disabilities. The chapters provide general information about the disabilities, as well

as essential vocabulary and key concepts. The third section provides information on the “doing” of occupational therapy. Foundation treatment techniques are introduced so readers can master basic skills and continue to research current practice. Lastly, the fourth section focuses on the management aspects of an OTA’s professional life. How-to information, as well as professional development, is the focus of this section. This practical book presents the latest and most effective occupational therapy methods and theories designed for treating patients with decreased hand function. The growing incidence of hand injuries in recent years has challenged occupational therapists to develop innovations in hand care. Now, with this authoritative resource, you can greatly enhance your practice skills and ability to plan effective treatment programs. The contributors provide clear examinations of such topics as wound and scar tissue management, the treatment of Colles fracture, and pre- and post-operative approaches to therapy, among many other pertinent areas.

Advanced Practice Palliative Nursing is the first text devoted to advanced practice nursing care of the seriously ill and dying. This comprehensive work addresses all aspects of palliative care including physical, psychological, social, and spiritual needs. Chapters include: symptoms common in serious illness, pediatric palliative care, spiritual and existential issues, issues around the role and function of the advanced practice nurse (APN), reimbursement, and nursing leadership on palliative care teams. Each chapter contains case examples and a strong evidence base to
