Standards in the American education system are traditionally handled on a state-by-state basis, which can differ significantly from one region of the country to the next. Recently, initiatives proposed at the federal level have attempted to bridge this gap. Common Core Mathematics Standards and Implementing Digital Technologies provides a critical discussion of educational standards in mathematics and how communication technologies can support the implementation of common practices across state lines. Leaders in the fields of mathematics education and educational technology will find an examination of the Common Core State Standards in Mathematics through concrete examples, current research, and best practices for teaching all students regardless of grade level or regional location. This book is part of the Advances in Educational Technologies and Instructional Design series collection.

Teams that engage in designing, using, and responding to common formative assessments are more knowledgeable about their own standards, more assessment literate, and able to develop more strategies for helping all students learn. The achievement gap is a persistent and perplexing challenge for educators. While school- and system-level reforms continue to be discussed in statehouses and district offices, individual teachers are challenged to do something now to help students who are falling short of standards, including students who are English language learners and receiving special education services. A companion to the ASCD best-seller Improving Student Learning One Teacher at a Time, this book identifies small, specific adjustments to planning, teaching, and assessment practices that will support more effective learning in every student, every day, and help close the achievement gap on a classroom-by-classroom basis. Here, you'll learn how to \* Use readily available tools--curriculum documents, a plan book, and a grade book--to improve all students' access to, interaction with, and mastery of lesson content. \* Design daily lessons that clarify learning goals and require students to use high-yield learning strategies, seek feedback, and reflect on their progress. \* Promote the progress of English language learners through coordinated pursuit of content and language goals, and synchronize instruction to improve the performance of special education students in both co-teaching and resource environments. This book also features the voices of working educators who share how "minding the gap" has helped them engage academically at-risk students, ELLs, and special education students; improve students' test scores; and sustain these gains over time. If you are a classroom teacher or specialist committed to helping all your students become

more successful learners and unwilling to wait for high-level solutions or even the results of another "data retreat," then this is just the resource you need.

The book is filled with grade-specific classroom vignettes, instructional strategies and activities, sample lesson plans, and discussion questions. Chapters cover the major ELA strands: reading (literature, informational texts, and foundational skills); writing; speaking and listening; and language. Issues of assessment and technology integration are also explored. An appendix includes thematic units for each grade level demonstrating ways to embed CCSS/ELA standards into content-area instruction. The consensus among educators nationwide is that in-depth instruction paired with focused assessment of essential concepts and skills are far more effective than superficially covering every concept and skill in the standards. Educators are faced with the task of teaching all standards while meeting the extraordinary range of student learning needs.

*Prioritizing the Common Core* offers common sense solutions to the dilemmas teachers face today in implementing the new, more rigorous national standards. Chapters present a rationale for prioritizing the Common Core, a step-by-step process for prioritizing standards in language arts and mathematics, strategies for soliciting feedback and input from everyone in the district or school prior to the final determination of the Priority Standards, and detailed summaries of the process schools in six different districts used to identify their Priority Standards, with accompanying commentary by those who directed the work.

Historically, teachers have exercised considerable autonomy in the day-to-day learning that occurs in their classrooms. Now, it is growing increasingly rare for a teacher to experience this type of professional freedom. In response to high-stakes testing, national and state academic content standards, and most recently the common core standards, pacing guides are one of the more recent devices schools are using to implement and monitor curriculum. The purpose of this research project is to investigate teacher opinion toward these pacing guides. An online survey called the Pacing Guide Survey was delivered to secondary regular and special education teachers in core subject areas of mathematics, science, social studies, and language arts. The teachers were asked about whether or not they use pacing guides, their attitude and comfort level in using pacing guides, as well as: Information concerning the population of their high school, such as demographics, enrollment, and single or multiple high schools; Building level factors, such as professional development initiatives, methods of curriculum monitoring, and pacing guide development and revisions processes; teacher factors, such as years teaching, years using pacing guides, confidence in content area, and educational background. Administrators were also interviewed to form a complete picture of pacing guide development and implementation in the secondary education environment. Quantitative data were analyzed using bivariate Spearman's rank order correlation and qualitative data were analyzed using a combination of thematic data analysis and quasi-statistical methods. Recommendations based on the data collected are: Teachers should be provided with the flexibility to address student needs in the classroom. Teacher input into pacing guide development, implementation, and revision process is necessary to ensure that student needs are addressed. Team autonomy is key and teacher teams need to be provided with the necessary support structure to provide meaningful learning experiences for their students.

Marjorie C. Ringler describes a professional development framework to teach principals and teachers the value of Academic Language Literacy (ALL) as the key to academic success. Typically mainstream classroom teachers and principals do not purchase books solely on academic language literacy because they see this as the domain of the ESL teacher. Academic Language Literacy: Developing Instructional Leadership Skills for Principals and Teachers infuses this knowledge through a three pronged approach (content, context, and process) to effective professional development. This book addresses educators who are looking for a research based approach to improving academic success for students who come to school language deficient and deficient in the background knowledge necessary for success in school. An innovative approach to improving instruction illustrates that all teachers are language teachers if the language being taught is that of their content. Practical examples are included for instructional leaders to use when planning, implementing, and evaluating professional development. Teachers also get practical examples for integrating academic language literacy in all content areas. Strategies include both teaching and learning methods that promote academic language awareness and student-centered approaches.

The Common Core State Standards require students to do more with knowledge and language than ever before. Rather than be mere consumers of knowledge, students must now become creators, critics, and communicators of ideas across disciplines. Yet in order to take on these new and exciting roles, many students need daily teaching with an extra emphasis on accelerating their academic communication skills. *Common Core Standards in Diverse Classrooms* describes seven research-based teaching practices for developing complex language and literacy skills across grade levels and disciplines: using complex texts, fortifying complex output, fostering academic interaction, clarifying complex language, modeling, guiding, and designing instruction. Most important, you will find clear descriptions and examples of how these essential practices can--and should--be woven together in real lessons. You will also find the following:

- Classroom activities based on the practices
- Dozens of classroom examples from lessons in different grade levels and disciplines
- Detailed lessons with annotations focused on language and literacy development
- Strategies and tools for building system-wide capacity for sustained growth in the practices

*Common Core Standards in Diverse Classrooms* is a concise guide for helping us improve our practices to strengthen two vital pillars that support student learning: academic language and disciplinary literacy.
