Bringing groups together is a central and unrelenting task of leadership. CEOs must nudge their executives to rise above divisional turf battles, mayors try to cope with gangs in conflict, and leaders of many countries face the realities of sectarian violence. *Crossing the Divide* introduces cutting-edge research and insight into these age-old problems. Edited by Todd Pittinsky of Harvard's Kennedy School of Government, this collection of essays brings together two powerful scholarly disciplines: intergroup relations and leadership. What emerges is a new mandate for leaders to reassess what have been regarded as some very successful tactics for building group cohesion. Leaders can no longer just "rally the troops." Instead they must employ more positive means to span boundaries, affirm identity, cultivate trust, and collaborate productively. In this multidisciplinary volume, highly regarded business scholars, social psychologists, policy experts, and interfaith activists provide not only theoretical frameworks around these ideas, but practical tools and specific case studies as well. Examples from around the world and from every sector - corporate, political, and social - bring to life the art and practice of intergroup leadership in the twenty-first century.

Tijdens de lunch vertelt een vriendin je over haar promotie. Wat gebeurt er dan? Je wilt blij voor haar zijn, maar je ontkomt er niet aan dat je jezelf met haar gaat vergelijken. Je beseft dat jij al vijf jaar geen promotie hebt gehad en je voelt je ellendig. Ga zo maar door: het succes van je vrienden maakt jou onzeker, en misschien zelfs wel depressief, hoewel je oprecht dol op ze bent. Je voelt je klemgezet, en ongelukkig. Dit voorbeeld laat de twee processen zien die onze sociale relaties bepalen: statusbepaling en verbinding, ofwel ranking en linking. En ook al is statusbepaling op zich een gezond onderdeel van ons leven (denk aan sport, en vriendschappelijke competitie), het kan als gevolg hebben dat we steeds slechter over onszelf gaan denken. Dat ondergewaardeerde ik kan zo sterk worden dat onze hele sociale waarneming erdoor wordt gekleurd. Elaine N. Aron schreef met *De kracht van zelfwaardering* opnieuw een opzienbarend boek dat oplossingen biedt voor wat een steeds groter probleem van onze tijd aan het worden is.

Sometimes it seems that Americans are divided in countless ways—red or blue; black, brown, or white; rich or poor; male or female. What happened to America as the land of freedom and openness? In *America the Principled*, renowned Harvard Business School professor and bestselling author Rosabeth Moss Kanter tackles the hardest questions our nation faces, and challenges us to recommit ourselves to pursuing our nation's noblest goals: equality and opportunity. As our open minds, open markets, and open borders—our nation's highest ideals—are besieged by ideologues and zealots, Dr. Kanter shows us how to recapture the American Dream. Artfully mixing practical ideas with compassionate guidance, she reminds us that the stakes have never been higher: Our economic vitality and democratic ideals are both at risk. In order to compete in the global market, we must invest in people and ideas, reward hard work, value dialogue and debate, and listen to dissenting voices. We must curtail our desire for worldwide empire, build bridges through citizen diplomacy, and pursue happiness instead of hegemony. Dr. Kanter proposes six vital items on the agenda for restoring American strengths:

- Widening the net of prosperity by creating opportunities for people of all social and economic classes to participate in the science-based "white coat" economy. We can't afford to have large segments of people—and areas of our country—existing outside the foundations of our future, innovation-seeking society.
- Supporting real family values through fair and flexible workplaces that reduce stress and close gender gaps, enabling people to earn a living, be productive, and have the time and energy for the other side of life
- Ridding the private sector of imperial excess by instilling a values-based capitalism of businesses that are well run, make lots of money, and do lots of good
- Reinventing government and stop denigrating it so that when the next Katrina strikes, we have the right people in place with the motivation, capability, and resources to deal with it
- Doing something about the "Ugly American" by earning back the respect that we have lost in the last six years through individual grass-roots engagement with people in other countries
- Moving from "me" to "we" through national service programs that tap both young people as well as aging baby boomers to create a community ethos that unites people behind common purposes

Empowering and surprisingly optimistic, *America the Principled* urges us to work together for a bright future we'll be proud to share, having earned the respect of the world once more—and shows us how to do it.

This book brings together leading scholars from around the world to provide their most influential thinking on instructional feedback. The chapters range from academic, in-depth reviews of the research on instructional feedback to a case study on how feedback altered the life-course of one author. Furthermore, it features critical subject areas - including mathematics, science, music, and even animal training - and focuses on working at various developmental levels of learners. The affective, non-cognitive aspects of feedback are also targeted; such as how learners react emotionally to receiving feedback. The exploration of the theoretical underpinnings of how feedback changes the course of instruction leads to practical advice on how to give such feedback effectively in a variety of diverse contexts. Anyone interested in researching instructional feedback, or providing it in their class or course, will discover why, when, and where instructional feedback is effective and how best to provide it.

This book shows how school improvement efforts are often undermined by the changing conditions around schools, as well as by some of the very policies and programs designed to help them make improvements. Hatch argues that schools cannot wait around for conditions to improve or policymakers to figure out how to provide the right support. Schools need to create the conditions for their own success. To help them accomplish that, the A01thor describes a small set of key practices that schools can use to get resources, manage external demands, and build their capacity to make and sustain improvements over time.

Confront the emerging assessment crisis in American education Rick Stiggins details profound changes in the mission of our schools that requires a bold new vision of excellence in assessment. He combines decades of experience with international research to define a vision that uses assessment to supercharge student learning, not merely measure it. This book: Analyzes the motivational psychology of being evaluated in the classroom from the student's perspective Offers strategies for engaging students in self-assessment in ways that maximize their engagement and confidences as they learn Details the long-

"A devastating bombardment of managerial thinking and the profession of management consulting...A serious and valuable polemic." —Wall Street Journal Fresh from Oxford with a degree in philosophy and no particular interest in business, Matthew Stewart might not have seemed a likely candidate to become a consultant. But soon he was telling veteran managers how to run their companies. In narrating his own ill-fated (and often hilarious) odyssey at a top-tier firm, Stewart turns the consultant's merciless, penetrating eye on the management industry itself. The Management Myth offers an insightful romp through the entire history of thinking about management, a withering critique of pseudoscience in management theory, and a clear explanation of why the MBA usually amounts to so much BS—leading us through the wilderness of American business thought.

In March 2005, the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history. This volume is a collection of essays based on those deliberations. The meeting took place at a time of extraordinary transformation for NASA, stemming from the new Vision of Space Exploration announced by President George W. Bush in January 2004: to go to the Moon, Mars, and beyond. This Vision, in turn, stemmed from a deep reevaluation of NASA's goals in the wake of the Space Shuttle Columbia accident and the recommendations of the Columbia Accident Investigation Board. The new goals were seen as initiating a "New Age of Exploration" and were placed in the context of the importance of exploration and discovery to the American experiences. (Amazon).

At the edge of one of America's most defining eras in its history, salvation comes from the most unlikely source: video games. It is direct, thought-provoking and consistently challenges perceptions of the boundaries of reality. It has to be! Because the readers will be the first to bear witness: this is a call for the start of a second American Revolution!

Te veel bedrijven zijn gevangenissen voor de menselijke ziel.' De sociaalfilosoof Charles Handy is niet de enige managementexpert die somber is over de huidige ontwikkelingen in het bedrijfsleven. In Leiderschap in de 21ste eeuw geven tien vooraanstaande managementdenkers hun visie op de toekomst van management en leiderschap. Henry Mintzberg, Jim Collins of Rosabeth Moss Kanter, zij hebben allen hun sporen verdiend in de twintigste eeuw en invloed uitgeoefend op managers over de hele wereld. Hoe denken zij over de taak van managers in deze eeuw? Iedereen is het erover eens dat die ingrijpend verandert, maar hoe? Daarover lopen de meningen uiteen. Volgens Stephen Covey zal management in de toekomst verdwijnen

omdat medewerkers zichzelf zullen aansturen. Henry Mintzberg vindt dat echter een 'idiot idee'. In deze interviewbundel worden de belangrijkste ideeën van tien deskundigen uiteengezet. Speciale aandacht wordt besteed aan het fenomeen leiderschap. Wat is leiderschap eigenlijk en verschilt het wel van management? Een inspirerende reis door het gedachtegoed van managementgoeroes.'

Like in the case of drugs, gambling hijacks reward circuits in a brain which is not prepared to receive such intense stimulation. Dopamine is normally released in response to reward and uncertainty in order to allow animals to stay alive in their environment – where rewards are relatively unpredictable. In this case, behavior is regulated by environmental feedbacks, leading animals to persevere or to give up. In contrast, drugs provide a direct, intense pharmacological stimulation of the dopamine system that operates independently of environmental feedbacks, and hence causes “motivational runaways”. With respect to gambling, the confined environment experienced by gamblers favors the emergence of excitatory conditioned cues, so that positive feedbacks take over negative feedbacks. Although drugs and gambling may act differently, their abnormal activation of reward circuitry generates an underestimation of negative consequences and promotes the development of addictive/compulsive behavior. In Parkinson's and Huntington's disease, dopamine-related therapies may disrupt these feedbacks on dopamine signalling, potentially leading to various addictions, including pathological gambling. The goal of this Research Topic is to further our understanding of the neurobiological mechanisms underlying the development of pathological gambling. This eBook contains a cross-disciplinary collection of research and review articles, ranging in scope from animal behavioral models to human imaging studies.

Confidence lies at the heart of civilization. Everything about an economy, a society, an organization or a team depends on it. Every investment and decision we make is based on whether we can trust ourselves, and others, to accomplish what has been promised. Confidence determines whether our steps are tiny and tentative or big and bold. Using company case studies of over 1000 companies, Rosabeth Moss Kanter identifies the patterns distinguishing the dynamics of failure and success in a variety of different arenas ranging from private organizations and businesses to high schools and governments.

The author looks at winning and losing in the business world, arguing that the key to success lies in an organization's character, perseverance, winning tradition, and confidence.
