As I write this, I reflect on my life - the hits (& misses), the bold and triumphant moments, the mistakes, joys and life lessons - I'm thrown back to a particularly quiet night picking up calls during a graveyard shift at my first job, where I spent most of my time robotically going through verbal scripts to handle customer complaints - not very fun, mind you. "Isn't it nice that our jobs are so easy and we don't have to think or do much?" asked my colleague, Vee, as he played some online games while handling a customer call. "Nice?" I asked. "This can't be what work should be - mind-numbingly, routine tasks requiring almost zero thought. Work must have passion, challenges and purpose - which this place definitely offer. Without these, what's the point?" "You know," Vee continued, "you should do your own business or write a book. All you ever do is write, plus you always have a ton of great ideas." The air around me seemed easier to breathe, as if immersed with opportunity. Now, I recognize why: This was my defining moment. Even though I'd spent much of my time writing, thinking and talking with people my thoughts and ideas - I didn't consider a career or business where I can apply what came naturally to me - my love for writing, ideation and application. Over the next few weeks, I left my job and got myself into a PR & Advertising agency to start learning and applying my craft. You see,

our lives are full of defining moments. Some we invite; others we don't. Then, there are those we ignore - moments that would've, could've or should've become defining moments if we only dared to turn left or right, instead of continuing straight on. I've been there; I'm sure you have as well. Having regrets is a horrible thing to feel, let alone dwell on. These defining moments have the power to fundamentally change the course of our lives. As we fast approach the first half of 2015, it's a good time to reflect on how far we've come (or maybe, where we've fell short), and think about what you're doing (or, not doing) to live the life you want. That's why for this issue of the easyuni University Guidebook, we've re-done how we create our #courses&careers section with the hope that it'll not only educate but inspire you. We also added new sections like #beinspired, #featuredmentor and #featuredstudent that showcases people who dared to chase their dreams. We hope it will help you recognize and react to your defining moments when they come. And trust me, they will come. I always tell my children, "Always step forward when you see an open door, even if you don't know where it will lead you." I've try to live off this mantra. But, doors can be scary when you can't see what's on the other side. My advice to you: Stop. Look around. Spot the open doors. Then choose: Stay put or step forward. You know the right choice. Trust it. The question is, do you dare? Be awesome & enjoy the read,

Chances are you will go to a college near where you live or go to one online. Many people now do parts of their degrees online then attend the college physically for awhile. In-state is always cheaper than going to a college out of state because your local government subsidizes residents at the local public universities, not the private ones. Private universities charge whatever they want to everybody. Publicly-funded ones are much cheaper. The real issue is what do you study. Do you listen to what everybody else says including the world system or yourself? That's the eternal question. Will I be the hero of my own life or will I be a clone, following everybody else? College is not necessarily the answer to life. You are. Whatever lives inside of you is strong, unique and vital. College can help you find it but by itself college is a fantasy land for young people.

Many factors complicate the education of urban students. Among them have been issues related to population density; racial, ethnic, cultural, and linguistic diversity; poverty; racism (individual and institutional); and funding levels. Although urban educators have been addressing these issues for decades, placing them under the umbrella of "urban education" and treating them as a specific area of practice and inquiry is relatively recent. Despite the wide adoption of the term a consensus about its meaning exists at only the broadest of levels. In short, urban education remains an ill-defined concept. This comprehensive volume addresses this definitional challenge and provides a 3-part conceptual model in which the achievement of equity for all -- regardless of race, gender, or ethnicity -- is an ideal that is central to urban education. The model also posits that effective urban education requires attention to the three central issues that confronts all education systems (a) accountability of individuals and the institutions in which they work, (b) leadership, which occurs in multiple ways and at multiple levels, and (c) learning, which is the *raison d'être* of education. Just as a three-legged stool would fall if any one leg were weak or missing, each of these areas is essential to effective urban education and affects the others.

This book examines how public policy influences institutional performance. Public institutions of higher learning are called upon by state governments to provide educational access and opportunity for students. Paradoxically, the education policies enacted by state legislatures are often complex and costly to implement, which can detract from that mission. The authors evaluate the higher education systems of five states to explain how these policies are developed and how they

affect the performance of individual institutions. They identify the rules that are central to the coherence and performance of higher education systems that administrators apply to meet organizational goals within the constraints of changing, sometimes conflicting federal and state policies.

By the time you get your hands on this magazine, a wave of changes is expected to happen - tension of the recent SPM exams would have plummeted as the holiday spirit envelops us, and while everything is bright and merry, some of you could be at the FACON Education Fair in KLCC this December deciding which course to take whilst silently hoping you get aces on your actual SPM results - nagging thoughts you would rather muffle with the latest Star Wars movie or New Year's dinner party. Nerve wracking it is, change is exciting. It's a cycle that all of us operate in and that's totally fine as I've been there, too. Taking over the magazine with a fresh team of young writers was a tough experience but it was a great opportunity to decide and flesh out new ideas. Thoughts of failing trouble our minds but those are the very things that hinder us from growing. After having said that, I would encourage all of you to be recipe for change. Don't be afraid to cook up some trouble.

This important study analyses the development of the CDU/CSU as a political force in West Germany from the Second World War to the late 1970s, with special reference to its role both in Government (1949-69) and Opposition (1969-76) and considers how it was instrumental in the formulation of governmental policies. The first part of the book looks at the development of the CDU/CSU. The second part focuses on its composition and structure and considers such aspects as its organisation, membership, auxiliary organisations and electoral appeal and campaigns. A separate chapter deals with the CSU's relationship with the CDU, its leadership and its organisation.
