

Domo 15 B 20 B Serie Series Lowara

Dramatic evolution in performance and sophistication of cardiac pacing systems in the last five years dictated the need for a 2nd European Conference on Pacemaker Leads. New methodologies in arrhythmia diagnosis and treatment have been consolidated. The increased sophistication of both generators and leads and the extreme reduction of generator and battery sizes mean that fixation and low-energy electrodes continue to develop. New ideas and preliminary experiences with endocardial cardioverter/defibrillator leads, ablation and mapping catheters were presented with concentration on single lead VDD pacing and electrodes for low-energy pacing. The lectures and contributed papers are of an extremely high scientific content. Innovative proposals and preliminary experiences presented in this volume contribute to the improvement of lead technology and design for special applications, and it is believed that major efforts should be devoted to permanent pacing leads as a component of the pacing system one for a lifetime.

Analog Circuit Design contains the contribution of 18 tutorials of the 18th workshop on Advances in

Analog Circuit Design. Each part discusses a specific to-date topic on new and valuable design ideas in the area of analog circuit design. Each part is presented by six experts in that field and state of the art information is shared and overviewed. This book is number 18 in this successful series of Analog Circuit Design, providing valuable information and excellent overviews of: Smart Data Converters: Chaired by Prof. Arthur van Roermund, Eindhoven University of Technology, Filters on Chip: Chaired by Herman Casier, AMI Semiconductor Fellow, Multimode Transmitters: Chaired by Prof. M. Steyaert, Catholic University Leuven, Analog Circuit Design is an essential reference source for analog circuit designers and researchers wishing to keep abreast with the latest development in the field. The tutorial coverage also makes it suitable for use in an advanced design.

With coverage of current issues and emerging trends, Fowler's Zoo and Wild Animal Medicine, Volume 7 provides a comprehensive, all-new reference for the management of zoo and wildlife diseases. A Current Therapy format emphasizes the latest advances in the field, including nutrition, diagnosis, and treatment protocols. Cutting-edge coverage includes topics such as the "One Medicine" concept, laparoscopic surgery in elephants and rhinoceros, amphibian viral diseases, and advanced water quality evaluation for zoos. Editors R. Eric Miller and Murray E. Fowler promote a philosophy of animal conservation, bridging the gap between captive and free-ranging wild animal medicine with chapters contributed by more than 100 international experts. The Current Therapy format focuses on emerging trends, treatment protocols, and diagnostic updates new to the field, providing timely information on the latest advances in zoo and wild animal medicine. Content ranges from drug treatment, nutrition, husbandry, surgery, and imaging to behavioral training. Coverage of species ranges from giraffes, elephants, lions, and orangutans to sea turtles, hellbenders, bats, kakapos, and more. An extensive list of contributors includes recognized authors from around the world, offering expert information with chapters focusing on the latest research and clinical management of captive and free-ranging wild animals. A philosophy of animal conservation helps zoo and wildlife veterinarians fulfill not only the technical aspects of veterinary medicine, but contribute to the overall biological teams needed to rescue many threatened and endangered species from extinction. All content is new,

with coverage including coverage of cutting-edge issues such as white-nose disease in bats, updates on Ebola virus in wild great apes, and chytrid fungus in amphibians. Full-color photographs depict external clinical signs for more accurate clinical recognition. Discussions of the "One Medicine" concept include chapters addressing the interface between wildlife, livestock, human, and ecosystem health. New sections cover Edentates, Marsupials, Carnivores, Perrissodactyla, and Camelids. Over 100 new tables provide a quick reference to a wide range of topics. An emphasis on conserving threatened and endangered species globally involves 102 expert authors representing 12 different countries.

Tevens verschonen als proefschrift Aandacht voor de omgang van de dag- en weekbladkritiek met het literaire aanbod. Er wordt ingegaan op de keuzen en uitspraken van critici in samenhang met de sociale context waarbinnen ze tot stand komen. In drie case- studies worden de literair-kritische receptie, de critici en de rol van achtereenvolgens Rutger Kopland, Judicus Verstegen en Jacq Firmin Vogelaar besproken.
