The simplest definition of bilingual education is the use of two languages in the teaching of curriculum content in K–12 schools. There is an important difference to keep in mind between bilingual education and the study of foreign languages as school subjects: In bilingual education, two languages are used for instruction, and the goal is academic success in and through the two languages. The traditional model of foreign-language study places the emphasis on the acquisition of the languages themselves. The field of bilingual education is dynamic and even controversial. The two volumes of this comprehensive, first-stop reference work collect and synthesize the knowledge base that has been well researched and accepted in the United States and abroad while also taking note of how this topic affects schools, research centers, legislative bodies, advocacy organizations, and families. The Encyclopedia of Bilingual Education is embedded in several disciplines, including applied linguistics, politics, civil rights, historical events, and of course, classroom instruction. This work is a compendium of information on bilingual education and related topics in the United States with select international contributors providing global insight onto the field. Key Features Explores in a comprehensive, non-technical way the intricacies of this subject from multiple perspectives: its history, policy, classroom practice, instructional design, and research bases Shows connections between bilingual education and related subjects, such as linguistics, education equity issues, socio-cultural diversity, and the nature of demographic change in the United States Documents the history of bilingual education in the last half of the 20th century and summarizes its roots in earlier periods Discusses important legislation and litigation documents Key Themes · Family, Community, and Society · History · Instructional Design · Languages and Linguistics · People and Organizations · Policy Evolution · Social Science Perspectives · Teaching and Learning The Encyclopedia of Bilingual Education is a valuable resource for those who wish to understand the polemics associated with this field as well as its technical details. This will be an excellent addition to any academic library.

"This book focuses on some features shared by 'Old' and 'New' varieties of English. 'Old' refers here to varieties of English spoken in Britain only, i.e. English English (EngE) and/or British English (BrE). They represent the longest-established varieties of English and are part of the hardcore of the L1 or the 'Inner Circle' of Englishes. 'New' varieties, in this context, are ones that have arisen in colonial or postcolonial contexts (the 'Outer Circle') and also comprise historically L2 varieties, such as Irish English, that have evolved as a result of language shift. This chapter examines three syntactic features that show similar developments in both New and Old varieties: the use of some modal auxiliaries, especially WILL/SHALL, some 'extended' uses of the progressive, and finally, combinations of these two, especially WILL/SHALL + be V-ing. All three display

convergent developments that suggest a leading role for the New Englishes rather than the Old varieties"--

"Drawing on a lifetime of research and experience, Hugh Stretton makes a case for doing whatever it takes to keep Australia fair. Rejecting easy platitudes and vague assertions, one of Australia's leading thinkers sets out an ambitious - yet fully costed - plan that encompasses every aspect of Australian life." "Australia Fair is a manifesto that makes us realise that fairness is no longer necessarily our defining characteristic. Stretton challenges prevailing opinion and shows we can get back on track."--BOOK JACKET.

In this Third Volume of the series, *Research on Education in Africa, the Caribbean and the Middle East*, the volume continues with the previously established overarching purpose of publishing chapters that are based upon research conducted in those regions by scholars, many of whom are indigenous to the regions they write about and are, therefore, able to provide cultural insights about relevant issues, as well as nonindigenous scholars who have conducted their studies in countries within the regions or about those regions. This mixture of indigenous scholarship offering emic perspectives and outside scholarship offering etic perspectives continues to be a relative strength and uniqueness of this book series. In addition, several chapters in the current volume constitute collaborations between the authors etic and emic to the contexts about which they write. This bifocality in the gaze cast upon issues covered in this book series has been well received by readers of earlier volumes of the series.

Comprehensively matched to the latest Cambridge IGCSE syllabus (0500), including changes to the Reading paper. This updated and literature-led resource is packed with age-appropriate text extracts, focused activities and embedded exam guidance.

Educating dual language learners (DLLs) and English learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs—who account for more than 9 percent of enrollment in grades K-12 in U.S. schools—are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. *Promoting the Educational Success of Children and Youth Learning English: Promising Futures* examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

Supporting children with English as an additional language (EAL) requires detailed knowledge and understanding of their social, cognitive and linguistic needs. *Supporting Pupils with EAL in the Primary Classroom* highlights the fundamental principles that underpin teaching and learning, and examines

practical strategies for classroom practice. The book focuses on the importance of recognising the knowledge, skills and experience that children with EAL bring to the classroom, whilst identifying the specific support required. It draws on evidence from an extended case study to illustrate essential points and combines this with an examination of relevant theory as well as how this translates to classroom practice. Key features of the book include:

- Core knowledge and skills about how to support children with EAL
- Case study scenarios to illustrate particular principles, pedagogies and practices
- Practical ideas for the classroom throughout

Supporting Pupils with EAL in the Primary Classroom is an invaluable text for those in teaching training, qualified teachers, senior managers in schools and those working in initial teacher education. "The author writes about the demands of teaching EAL learners with commitment, knowledge and enthusiasm. She offers the reader insights and examples from her own research and classroom practice, beginning with a discussion of bilingualism and language learning, followed up by an exploration the four skills and assessment in the classroom, as well as a chapter arguing for professional development and research informed teaching. In this chapter she stresses the importance of teachers finding innovative ways to enable EAL learners within the curriculum context. In the final chapter, drawing on the sociocultural framework that informs her work, the author discusses the challenges, constraints and possibilities for supporting EAL children in the wider contexts of pedagogy and policy.

Throughout, there are case studies and examples, and the author writes with a sense of optimism that it is in the capacity of teachers to improve the classroom learning opportunities for EAL learners. Written in a personable and accessible style, this book offers an informative foundation for teacher educators and professionals who want to learn more about working with EAL learners." Dr Charlotte Franson, formerly of Canterbury Christ Church University, UK "As a teacher educator, I am often engaged in discussions around trainees' perceptions of the complexities of teaching children learning EAL. This book, rooted in practice based research provides an accessible and informative scaffold for those embarking on a career in teaching. The premise of the 'what' and 'how' is particularly useful and the sequence of chapters provides a well mapped journey for the reader, through the theory, practice and considerations of supporting children learning EAL. Exemplification, through the case study vignettes, poses reflective thinking points that can be readily applied to one's own practice. Overall, excellent practitioner guidance that both consolidates subject knowledge and provides realistic practice guidance. A title I will be heartily recommending to my students." Gill Chambers, Senior Lecturer in Education, University of Northampton, UK

Even as Anglophone power wanes in Asia, and China and India rise, the role of the English language in the region continues to develop. How are students in Asian nations such as Vietnam, Malaysia and China itself being taught English? This much-needed overview analyzes the differing language education policies of

selected countries that also include Indonesia, Japan and Sri Lanka. Noting ASEAN's adoption of English as its sole working language, it traces the influence of globalization on English language education in Asia: in many systems, it pushes local languages off the curriculum and is taught as a second language after the national one. Informed by a comprehensive review of current research and practice in English teaching in Asia, this volume considers the many different roles English is playing across the region, as well as offering an informed assessment of the prospects of English—and Chinese—being a universal language of communication.

This volume brings together for the first time a collection of studies devoted to missionary language learning and retention. Introductory chapters provide historical perspectives on this population and on language teaching philosophy and practice in the LDS tradition. The empirical studies which follow are divided into two sections, the first examining mission language acquisition by English-speaking missionaries abroad, the second focusing on post-mission language attrition. These chapters by internationally known scholars offer cutting-edge research using a number of different target languages in addressing various issues in second language development. Finally, a comprehensive bibliography of sources on mission languages is included. The readership of this pioneering work is expected to extend beyond specialists in study abroad and missionary language training to a broader audience of applied linguists, educators, and students interested in language acquisition and attrition. In addition, the book offers useful insights to adults who want to maintain a second language.

With an emphasis on active learning, this supplementary text helps busy elementary and middle school teachers engage all students in the vibrant world of social studies. This inquiry-based book presents hands-on explorations, interaction with primary sources, and critical thinking activities, that provide concrete methods to successfully integrate the language arts into the social studies curriculum. Key Features Promotes the development of literacy skills by authentically integrating language arts Supports differentiated instruction for specific grade levels, English language learners, and students with special needs Connects to standards in language arts, social studies, and technology

It tells the story of the collaborative project's positive impact on instruction and assessment in different contexts, and explores the potential for transformation in teacher education. Acknowledging oppressive traditions and obstacles facing language

minoritized students, this book provides a pathway for combatting racism, monolingualism, classism and colonialism in the classroom and offers narratives, strategies and pedagogical practices to liberate and engage emergent bilingual students. This book is an essential text for all teacher educators, researchers, scholars, and students in TESOL and bilingual education, as well as educators working with language minoritized students.

This edited volume presents an overview of research and policy issues pertaining to children from birth to 10 who are first- and second-generation immigrants to the U.S., as well as native-born children of immigrants. The contributors offer interdisciplinary perspectives on recent developments and research findings on children of immigrants. By accessibly presenting research findings and policy considerations in the field, this collection lays the foundation for changes in child and youth policies associated with the shifting ethnic, cultural, and linguistic profile of the U.S. population.

This volume is the first handbook dedicated to language attrition, the study of how a speaker's language may be affected by crosslinguistic interference and non-use. The effects of language attrition can be felt in all aspects of language knowledge, processing, and production, and can offer unique insights into the mind of bilingual language users. In this book, international experts in the field explore a comprehensive range of topics in language attrition, examining its theoretical implications, psycho- and neurolinguistic approaches, linguistic and extralinguistic factors, L2 attrition, and heritage languages. The chapters summarize current research and draw on insights from related fields such as child language development, language contact, language change, pathological developments, and second language acquisition.

This research monograph is the first authoritative work on the office of the Welsh Language Commissioner and the associated Welsh language regulatory and statutory regime. In setting the Commissioner in context – in Wales, the UK and internationally – the work draws upon a rich variety of source material arising from fieldwork conducted in a number of jurisdictions. The research data includes, for example, an extensive series of documents obtained under a number of Freedom of Information applications, in-depth interviews with key actors from pertinent legislatures, governments, regulatory offices, interest groups and civic society. The linguistic coverage of source material includes English and Welsh, as well as, where relevant, Irish, German, Catalan, Spanish, French and Basque, in a publication which is multi-disciplinary in approach, engaging with the scholarly and professional literature in language policy and planning, socio-legal studies and the politics of language.

The relative status of native and non-native speaker language teachers within educational institutions has long been an issue worldwide but until recently, the voices of teachers articulating their own concerns have been rare. Existing work has tended to focus upon the position of non-native teachers and their struggle against unfavourable comparisons with their native-speaker counterparts. However, more recently, native-speaker language teachers have also been placed in the academic spotlight as interest grows in language-based forms of prejudice such as ‘native-speakerism’ – a dominant ideology prevalent within the Japanese context of English language education. This innovative volume explores wide-ranging issues related to native-speakerism as it manifests itself in the Japanese and Italian educational contexts to show how native-speaker teachers can also be the targets of multifarious forms of prejudice and discrimination in the workplace.

This book explores language practices, beliefs and management across a group of Polish immigrant families in Australia, drawing on these case studies as a lens through which to unpack dynamics of Family Language Policy (FLP) and their implications for future research on FLP. The volume begins by outlining the historical context of Polish immigration in Australia, charting two key waves of Polish migration in the 20th century and the subsequent unfolding of issues around language and culture maintenance in these families. This discussion paves the way for exploring key themes of language socialization, language ideologies and heritage language maintenance and the affordances of FLP

research in elucidating these dynamics at work in the lived experiences of a group of Polish immigrant families in Melbourne. The book highlights the importance of a triangulated approach, integrating qualitative and quantitative methods, in offering nuanced insights into parental approaches and children's experiences of a bilingual upbringing and the wider impact of FLP on transnational families. Opening up avenues for future research on Family Language Policy and a better understanding of the language practices of specific communities in a globalised world, this book will be of interest to scholars in multilingualism, sociolinguistics and applied linguistics.

The first edition of a conference is a significant organizational and scientific gamble. In some cases, these challenges are rewarded by results well above the initial expectations. AFRICOMM 2009, the First International ICST Conference on e-Infrastructure and e-Services for Developing Countries, was clearly one of such cases. The conference aimed at bringing together international researchers, public officers, policy makers and practitioners in ICT to discuss issues and trends, recent research, innovation advances, and on-the-field experiences related to e-Government, e-Governance, e-Infrastructure, and e-Business, with a focus on developing countries. It is in fact widely accepted that ICT Infrastructure and (e-*)services are key drivers for development, well-being, and improved quality of life. This was also highlighted by Kofi Annan, former UN General Secretary, in 2002: "While ICT cannot address all of [Africa's] problems, they can do much to place Africa on a firmer industrial footing. . . and strengthen the continent's human resources, with training that leads to sustainable livelihoods. " AFRICOMM 2009 was organized in three tracks: two of them organized as Research Tracks, on Information and Communication Infrastructures and on e-Services for Developing Countries, and one Policy and Governance Track. Contributions to the first two tracks were selected by peer-review, while the policies session involved key stakeholders in the areas of ICT, development, and policy making who submitted position papers. Participation and selection of papers for the tracks was quite good.

There are two contending opinions with regard to the seemingly amorphous phenomenon of globalization. Some believe that globalization has brought rapid prosperity to developing countries while others argue that globalization best serves the needs of countries of the developed world. Bringing globalization under the microscope of education, this book illustrates how globalization is producing unprecedented impacts on education and culture through a series of country case studies elaborating on effects of economic and educational policies in the modern globalized world.
