Feng shui concepts were once frequently utilized to orient buildings in an auspicious manner, particularly spiritually significant monuments like graves, but also residences and other structures. Feng shui refers to two of the earth's moving elements: wind and water. Feng shui, or positive energy flow, may be readily implemented in every room of your home by strategically placing furniture, such as your bed, doors, paint colors, mirrors, and water features.

Feng Shui, the art of Wind and Water, emerged 3,000 years ago in China and gradually evolved over time as new theories and new models were introduced. While its development was driven by the primary needs of survival and defence, it would later be enhanced with concepts relating to culture, philosophy, the climate and the territory. Thanks to the work of Pierfrancesco Ros' Accademia Italiana di Architettura Feng Shui, Feng Shui has been further expanded with ancient and modern knowledge relating to environmental well-being. Feng Shui Architecture offers the reader project guidelines for use in town planning, architecture, interior design and ecodesign. The first volume examines the key issues of the earth way and the sky way. The second and final volume, produced with the contribution of the Accademia di Psico Architettura, looks at the man way, establishing a global approach to various types of environmental analysis and design for a complete understanding of Holistic Architecture.

Bedroom Feng Shui was a best-seller when The Crossing Press first published it in 2001. It is now available in a revised, expanded edition. In feng shui, the bedroom is the most important room. It has the most influence in a person's life, because of the amount of time spent there, a third of a lifetime. For many people the bedroom is the only room that is theirs. The book explains everything a person needs to know when applying feng shui to their bedroom. People sense that the location of the bed is important and wonder, "Is my bed in the best location?" The main factors in making that decision are the location of the doors, windows, and bathrooms, as well as any features on the ceiling such as beams or ceiling fans. Many different types of beds are evaluated, as well as the bedding and any other fabric in the room. Various furniture choices are discussed, especially since some bedrooms must be multifunctional. Many optional solutions are offered when problem situations are mentioned. Every object commonly in bedrooms (clocks, rugs, lamps...) is carefully discussed. Some items are too yang (such as mirrors) and should be used sparingly, and too many items make the room too yin and stifle the energy. The various details, such as color, texture, lighting, and artwork, that help a bedroom support sound sleep, are thoroughly covered. "No detail is overlooked," says author Susan Levitt. Chapters are devoted to special bedrooms such as children's rooms, studio apartments, and guestrooms. Even the bathroom is covered, since it is often adjacent to a bedroom. The feng shui bagua is thoroughly explained, telling the location and use of the Wealth Corner and the Relationship Corner, which are famous, for good reason, in feng shui. Harmony and prosperity are often the main reasons people first try feng shui. This book is based on Form School feng shui, not Compass School. Form School could be called the common sense school, because it is based on the form or shape of objects. The book does not discuss lucky

directions or numbers, which are not a concern in Form School. Bedroom Feng Shui is for beginners as well as for those with more feng shui knowledge. If someone has studied feng shui, they are aware of the power of the bedroom, and will appreciate the attention to detail in this book.

Feng Shui is the knowledge of how to grasp the quality of a place and shape it according to one's own ideas with the help of physical and magical methods. Feng Shui is therefore related to geomancy, leyline lore, dowsing and pendulum. However, there are also close and very direct connections to crop circles, knowledge of acupuncture meridians, chakras, astrology, dragons in myths, and much more - which may not be immediately apparent at first glance. The method of recognizing the quality of a place is as precise as a science - certain forms can be clearly assigned to certain qualities. This analytical approach is then complemented by magical methods such as dream journeys, clairvoyance, family constellations, tarot cards, and the like. Imprinting the life force of a place is ultimately the same as charging a talisman or consecrating a temple. One should not overestimate the influence of places, but one should also not underestimate the benefit of shaping a place according to one's own ideas. In such a materially and magically designed place, one can do what one wants to do in an effortless way. And why not make life a little easier for yourself?
