This book is in Color-This is an intermediate & advanced trader's handbook to
help you with the art of making money in Forex trading. I will show you how to
use Reversal Time Patterns (RTP) to find the best entry and exit points. This
method can be applied to any market besides currencies such as stock and
commodities. I also want to get you to understand the need to have more than

Online Library Forex A Powerful Mt4 Trading Robot To Maximize Profits Expert Advisor Ea Algorithmic Trading Black Box Trading Trading System Automated Trading

one account to trade and the need to move profits immediately. You will learn the importance of "Profit Management," moving money out of your trading account as often as possible, "Make It Move It!" You should learn the basics of Foreign Exchange trading before you read this book if you don't already have experience trading Forex. You should also learn how to use the MT4 or MT5 trading platform and Ensign Windows. The most important parts of my strategy that you will learn are how to make and move profits constantly. That's why I call it the "Make It Move It" strategy. The strategies I recommend are to help you make money and help you keep most of your profits instead of losing them right back to the market. Most traders like to gamble with the market because it's fun, but if you want to make some real money and keep it then you need a good "Trading & Profit Management" strategy. This is a very risky market, you can and will lose some or all of your money in your trading account, that's why I am teaching you to move profits when you make it. I learned that moving profits constantly is the best way to do well in this high-risk market. Because of the high leverage in Forex, you can make 10% or more in one trade. Most people who trade stocks would be happy with 10% per year but Forex traders are a different breed of people with greater expectations. We are always looking for the best strategy or system to make a lot of good trades. Well, I've got something for you: It's the Reversal Time Pattern

Online Library Forex A Powerful Mt4 Trading Robot To Maximize Profits Expert Advisor Ea Algorithmic Trading Black Box Trading Trading System Automated Trading

(RTP) trading system and strategy. This RTP strategy will make you a monster trader. You will spot easy trading opportunities based on time patterns for big profits. Spend more time sleeping and less time trading, be more productive, be a "Market Time Master." I will also show you correlated instruments that can give you confirmation about the direction that you want to trade a currency. That way you will not be confused as to why a currency is going in a certain direction at that time. You do not need to use a lot of money to trade Forex. You can start with as little as \$10 or \$100. You can build it up with consistently good trades. I will also show you how to find trades to make 100% or more in one currency with position compounding using your first trades' profits to make other trades while using trailing stops to protect your profits. I talk about leverage of over 50 times your money; Leverage of over 50 times is not available by any broker in the United States of America. You can find leverage of 100:1 (one hundred to 1), 200:1 or more outside of the U.S. High leverage allows you to make big trades with small amounts of money. However, you must be careful how you trade because that leverage can also cause you to lose a lot of money if you don't use it properly. You have to be able to time your trades a lot better if you want to make money. So, that's the purpose of this advanced trading handbook and strategy.

I'm going to show you how to CRUSH financial markets using a simple Money Management System that reduces your risk while maximizing profits! While this system may focus on FOREX trading and the casino game Roulette, it can be applied to trading ANY financial market, including stocks, commodities, and binary options. I was inspired to develop this system after a horrible night in Las Vegas where I lost \$2000 playing Roulette with a betting system that I thought was unbeatable. I spent the following 12 years reverse engineering everything that went wrong that dreadful night and developed what I discovered into a simple and powerful Money Management system that makes it easy for anyone to CRUSH financial markets like a professional gambler! After developing this system, I returned to Las Vegas and turned \$20 into \$500 in about 1 hour at the roulette table, and that was down from a high of \$750. The \$500 profit that I walked away with was locked in from the profit-locking mechanism, like a gear that spins freely in one direction but quickly locks in the opposite direction. In

January 2015, I had this system programmed into an MT4 Forex Trading Robot so I could automate the entire system (signals, trade execution, and money management). After a few weeks of little activity, the market sprang to life and so did my system! My account doubled in about 48 hours and that's when I knew I had developed something very special. But my trading robots are NOT required to use this system. It can be applied manually to virtually ANY trading system in ANY market and even on casino games like Roulette, although you will get much better results in financial markets where you can have far better statistics than a casino game. So come join me and I'll open a whole new dimension of trading and opportunities for BIG PROFITS that you have never noticed before!

This book aims to debunk beliefs that Forex Robot (EAs for short) is a myth and that there is no software out there that can trade Forex automatically totally without human supervision. From a simple EA to a compound EA to a multi-time frame compound EA I aim to prove the skeptics wrong by showing how in nine years I had developed one of the most accurate EAs you can find in the market where profit/loss win ratio is concerned. This is correct that you can get rich trading forex, but you can get rich trading bananas for that matter. There is no get rich quick remedy in this world. This book will prove to be a great help in avoiding this trap. Brokerages and commissions are not charged as a separate fee in forex. However, that doesn't mean that you can simply buy currency at a price and sell it as soon as it rises just a little. There will be a spread that you'll need to cover before you can start making any profit. It is a trap in which many beginners fall when they begin trading and end up losing a lot of money. Most people keep blaming the broker for cheating while they fail to understand the mechanics of the spread. This book will help you in

Every trader wants to know how to trade without losses. Unfortunately, we all do mistakes. Sometimes it seems like we've made a genius decision, but later we find out that it was impossible to take a decision more stupid than this one. It's possible to trade without losses at all, and minimize the risks. Professionalism in the currency trading market is not impossible. The professional trading process is a trading process based on laws and obligations, the trader must start applying it step by step. This is a hellish strategy that I always follow for trading in Forex, it's a powerful strategy that you cannot lose using it even a single cent even in the worst fluctuations in global markets, even that if something went wrong then the margin of loss will be very little, because the strategy has a safety valve to ensure its success.

In any business or moneymaking endeavor, arrangement and foresight are the keys to progress. Without such an understanding, the endeavor to settle on a productive monetary choice can just end in a debacle and disappointment, paying little mind to your degree of inspiration and assurance or the measure of cash you intend to contribute. In the financial exchange, this standard applies as far as possible, as you are putting your own cash in what could be viewed as a high danger bet, and you are behaving recklessly on the off chance that you don't have in any event an overall foundation information on how it capacities. Since having experience with any territory is useful in directing you down a way in that specific locale, the more strong your premise of venture information is, the almost certain you are to benefit from any endeavor to exchange on the open market. In this book, you will find the hacks you need to succeed in the financial market.

The basics of the Forex markets e-book, video tutorials and website content was put together by myself to teach regular people how to trade the markets. I am not a banker, I am not an x-Wall street guy, and I have never traded in large institutions with thousands to spend on their training programmes! I am just like you, I used to be an employee, working as a chef for 17 years, covering 60 – 70 hours a week, split shifts, weekends and all of the holidays! I stumbled across Forex trading and knew that is my way out, It was not easy! It took me over a year before I got any real education on Forex, it looked so easy at the start! But once I had blown 2 accounts by this point, it was time to get educated or quit! I didn't want to quit because I saw the opportunity Forex trading can offer, so I persevered and never stopped learning to this day, I make it my mission to always educate myself further, every day I will learn something new and it is not just about Forex, I learn about business, real estate investing and sales marketing. You should make that one of your missions to always educate yourself, it is the only way to get on in life! Anyway, it took me a while to realise that the markets are a little bit harder to read than initially perceived, with all of the news events, manipulation and uncertainty. It took many more months of learning and practice to become consistent in my trading, but persevere and you can get there! So if you are like me, like many others out there trying to learn on their own, I have been there, I have struggled on, dealt with all of the emotions of being a retail trader, no boss to give you a hard time if your trading performance does not meet up with the institutions demands. You have to learn to be your own boss, research your trading performance, kick your but if you deviate from the plan and push yourself to the next level! I am self taught and you are going do the same, so why not learn from somebody that has walked down the road

you are about to embark on, but I'll help you shorten your learning curve! We all know what opportunities Forex trading can bring, every benefit is unique to you. It is up to you how these rewards will manifest into your life, you must put in some effort to see any rewards. Success is the pay off in exchange for the amount of time and effort devoted to a task, it is said that you will need to devote 10,000 hours of practice before becoming a master of your endeavor! I remember my first Forex training course, it was \$900 and it only covered the basics, it was O.K at the time, but there was so much more I had to learn! I later subscribed with another guy for \$650 one off fee and a recurring \$90 monthly subscription charge to trade with him twice a week, I did this for one and a half years! That is my two main ones, but I have done a trading psychology course and many many more. Looking back, thinking that the amount of money I have actually paid for fragments of information is kind of sickening. I am a firm believer of that you should pay for your education and pay well when you can, because you have to be cautious about the free information out there, but we want information for a reasonable price, have it all in one place and have life time updates on new trading techniques. So this is what I propose; Learn from somebody that came from the bottom and had nobody to help but his eagerness and drive. If you become one of my loyal members, I will teach you about the basics of the Forex markets, with lifetime updates. This is my website, Forex trading and teaching is my life! In exchange for a small one off fee, for the time and effort devoted to building the tactical trader boot camp website, I will devote to giving you everything you need to know getting started in Forex trading, it will give you the insights into Forex trading. I won't teach you every single thing, I do not use every single indicator, I will not explain every single indicator, trading patterns, or trading algorithms. I will simply teach you what you need to know and give

you the tools you need to become your own success story! I cut out all of the fluff, no B.S, and as long as you can put up with my Scottish accent, I think we will be just fine! So become a member of the boot camp and start learning today!
