PRACTICAL PROBLEMS IN MATHEMATICS FOR ELECTRICIANS, 9E will give your students the math skills they need to succeed in the electrical trade. It introduces them to the important math principles through problems designed for the electrical profession and offers them an excellent opportunity to develop and practice problem-solving skills while at the same time providing a valuable review of electrical terminology. This new edition uses the same straightforward writing style and simple, step-by-step explanations that made previous editions so reader-friendly. It minimizes theory and emphasizes problem-solving techniques and practice problems. This new edition also includes updated illustrations and information for a better learning experience than ever before! The book begins with basic arithmetic and then, once these basic topics have been mastered, progresses to algebra and concludes with trigonometry. Practical problems with real-world scenarios from the electrical field are used throughout, allowing your students to apply key mathematical concepts while developing an awareness of basic electrical terms and practices. This is the perfect resource for students entering the electrical industry, or those simply looking to brush up on the necessary math. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This exceptionally produced trainee guide features a highly illustrated design, technical hints and tips from industry experts, review questions and a whole lot more! Key content includes: Piping Systems, Drawings and Detail Sheets, Identifying and Installing Valves, Pipefitting Trade Math, Threaded Pipe Fabrication, Socket Weld Pipe Fabrication, Butt Weld Pipe Fabrication, Excavations and Underground Pipe Installation. Instructor Supplements Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

This exceptionally produced trainee guide features a highly illustrated design, technical hints and tips from industry experts, review questions and a whole lot more! Key content includes: Alternating Current, Motors: Theory and Application, Electric Lighting, Conduit Bending, Pull and Junction Boxes, Conductor Installations, Cable Tray, Conductor Terminations and Splices, Grounding and Bonding, Circuit Breakers and Fuses, Control Systems and Fundamental Concepts. Instructor Supplements Instructors: Product supplements may be ordered directly through OASIS at <http://oasis.pearson.com>. NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. Several versions of the MyLab(tm) and Mastering(tm) platforms exist for each title, and registrations are not transferable. To register for and use MyLab or Mastering, you may also need a Course ID, which your instructor will provide. Used books, rentals, and purchases made outside of Pearson If purchasing or renting from companies other than Pearson, the access codes for the MyLab platform may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase. For courses in emergency medical responder programs. Help students think like EMRs The leader in the field, Emergency Medical Responder: First on Scene provides clear, first responder 2-level training for fire service, emergency, law enforcement, military, civil, and industrial personnel. The text is based on the new National Emergency Medical Services Education Standards for Emergency Medical Responders and includes the 2017 Focused Updates from the American Heart Association Guidelines for Cardiopulmonary Resuscitation and First Aid. The fully updated 11th edition covers new topics recently introduced into emergency medical responder programs. Also available with MyLab BRADY By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student. Designed for EMS students and educators, MyLab BRADY engages students with unique practice opportunities, while supporting educators with valuable teaching material.

Welcome to the world of construction! Construction is one of the largest industries, offering excellent opportunities for high earnings, career advancement, and business ownership. Work in construction offers a great variety of career opportunities. People with many different talents and educational backgrounds -- skilled craftspersons, managers, supervisors, and superintendents -- find job opportunities in construction and related fields. As you will learn throughout your training, many other industries depend upon the work you will do in construction. From houses and office buildings to factories, roads, and bridges -- everything begins with construction. -- Preface

In De grote vragen snijdt Donald Palmer de belangrijkste thema's aan die vanaf de Griekse oudheid centraal staan in de westerse filosofie zoals de redenen van ons bestaan en de begrippen vrijheid, kunst, politiek en ethiek. Aan de hand van ca. 500 door hem zelf gemaakte illustraties bespreekt Palmer op toegankelijke en humoristische wijze wat de grote filosofen over deze onderwerpen naar voren hebben gebracht. Hij maakt met zijn boek duidelijk dat waarlijk filosofisch onderzoek ons verrassende inzichten kan verschaffen en een bevrijdende ervaring kan zijn.

Invites readers to choose the wild and unknown over the safe and known everyday, in a work that clears up misconceptions about decision making and discipleship. Original.

This industry-targeted resource provides contact information and brief descriptions for 4,600 nonprofit associations, libraries, publishers, research centers, directories, newsletters, periodicals, and databases (arranged in that order). Entries include names, addresses, phone/fax numbers, and email addresses/URLs. Two indexes -- one by location, one by name and keyword -- are included. The master index edge tabs have inadvertently been printed on most of the book's pages.

This exceptionally produced trainee guide features a highly illustrated design, technical hints and tips from industry experts, review questions and a whole lot more! Key content includes: Introduction to Safety, Introduction to Materials Handling, Confined Spaces, Work-Zone Safety, Electrical Safety, Working from Elevations, Welding Safety, Steel Erection, Motorized Equipment Safety, Crane Safety, Rigging Practices, and Concrete and Masonry. Refine the skills needed to become an accomplished professional carpenter with the in-depth coverage and practical applications found in Carpentry, 6E. This popular bestseller by well-known expert Floyd Vogt presents the intricate system of contemporary light frame building construction using step-by-step procedures. CARPENTRY, 6E follows the logical path of a residential project, using thorough explanations and easy-to-follow diagrams to explore building plans, sitework and layout, footings and foundations, framing, interior and exterior surfaces, cabinetry, and more. This edition blends traditional construction techniques with today's latest practices, including contemporary safety tools, alternative construction, such as concrete forms, and green building techniques. This edition also introduces more commercial drawings and construction. Photo-realistic drawings showcase concepts and procedures with detailed, easy to understand information. The new online CourseMate provides interactive learning tools to further ensure carpentry success. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This exceptionally produced trainee guide features a highly illustrated design, technical hints and tips from industry experts, review questions and a whole lot more! Key content includes: Business Principles for Plumbers, Introductory Skills for the Crew Leader, Water Pressure Booster and Recirculation Systems, Indirect and Special Waste, Hydronic and Solar Heating Systems, Codes, Servicing Piping Systems - Fixtures and Appliances, Private Water Supply Well Systems, Private Waste Disposal Systems, Swimming Pools and Hot Tubs, and Plumbing for Mobile Homes and Travel Trailers.

This exceptionally produced trainee guide features a highly illustrated design, technical hints and tips from industry experts, review questions and a whole lot more! Key content includes: Orientation to the Electrical Trade, Electrical Safety, Introduction to Electrical Circuits, Electrical Theory, Introduction to the National Electrical Code, Device Boxes, Hand Bending, Raceways and Fittings, Conductors and Cables, Basic Electrical Construction Drawings, Residential Electrical Services, and Electrical Test Equipment. The 5th edition of this exceptionally produced trainee guide features a highly illustrated design, technical hints and tips from industry experts, review questions and a whole lot more! Key content includes Welding Symbols, Reading Welding Detail Drawings, Physical Characteristics and Mechanical Properties of Metals, Preheating and Postheating of Metals, GMAW & FCAW - Equipment and Filler Metals, GMAW & FCAW - Plate, GTAW - Equipment and Filler Metal, and GTAW - Plate.

Developed by the National Center for Construction Education and Research Lead contributor: Dr. Annie Pearce, Myers-Lawson School of Construction, Virginia Tech Now featuring a

comprehensive vocabulary list, this updated new module brings together the expertise of industry and higher education in defining a topic of growing international importance: green building. Geared to entry-level craft workers or to anyone wishing to learn more about green building, this module provides fundamental instruction in the green environment, green construction practices, and green building rating systems. Presented in easy-to-understand terms and illustrations, Your Role in the Green Environment will better equip learners to make decisions regarding their personal impacts on the environment and will make them more aware of how to lessen their impacts in the built environment. * The curriculum has been approved for 15 general continuing education hours under GBCI's Credential Maintenance Program.* NCCER is recognized as a U.S. Green Building Council (USGBC) Education Provider. This training program marks a major milestone on the road to more responsible construction practices and indicates that the tipping point in green building has probably been reached. Dr. Charles Kibert Director, Powell Center for Construction and Environment University of Florida NCCER has developed a solid course that supports the training and certification efforts of Green Advantage for residential and commercial environmental certification. Grady O' Rear, Executive Director, Green Advantage As a US Green Building Council Education Provider, NCCER is committed to enhancing the ongoing professional development of building industry professionals. DESCRIPTION This exceptionally produced trainee guide features a highly illustrated design, technical hints and tips from industry experts, review questions and a whole lot more Nine modules in all provides coverage of: Basic Safety, Introduction to Construction Math, Introduction to Hand Tools, Introduction to Power Tools, Construction Drawings, Basic Rigging, Basic Communication Skills, Basic Employability Skills, and Introduction to Materials Handling. Key Features New 5-hour module, Introduction to Materials Handling (00109-09), covers instruction on safe methods of stacking, storing, and moving construction-related materials. All modules except Basic Rigging (00106-09) are now required for a course completion certificate. The Basic Safety module (00101-09) aligns to the OSHA 10-hour guidelines. Any OSHA 500-certified instructor can issue OSHA 10-hour cards to students successfully completing this module. Includes Going Green features throughout, and emphasizes energy efficient products and low environmental-impact methods of construction. Introduction to Construction Math (00102-09) includes more applied math exercises. Introduction to Construction Drawings (00105-09) contains new blueprints, rendered from the LEED-Gold certified Rinker Hall, University of Florida School of Construction The updated version of the accompanying Contren Connect features more robust media including video footage with professional actors and 3-D animation Instructor Supplements Instructors: Product supplements may be ordered directly through OASIS at <http://oasis.pearson.com>. For beginning to intermediate courses in cost estimating and construction estimation. The only complete, up-to-date guide to estimating modern building construction projects Estimating in Building Construction covers all the skills the beginning student needs to estimate simple to moderately complex commercial and residential buildings. Ideal for construction, architecture, and engineering students, the text covers bid preparation from the general contractor's perspective, using a combination of theory and principles, step-by-step procedures, instructor resources, and practice problems. The 9th edition aligns the text with the learning outcomes of the major accreditation bodies ABET and ACCE, giving instructors measurable standards for gauging student success. It includes a new chapter on specialty contractors, two rewritten chapters, and reorganized appendices.
