All of us in biomedicine understand the urgency of getting experimental results into print as quickly as possible. Yet this critical step in the cascade from research conception to publication receives almost no attention in our formal training. It is as if we have been put to sea without a compass. Our collective failure to achieve widespread literacy in our own language – Biomedical Language – seriously impedes the important process of disseminating new biomedical knowledge and thereby improving the human condition. It is also a significant personal concern for researchers and clinicians in the highly competitive, publish-or-perish environment of contemporary academia. Of course, if we are clever or lucky enough to come up with that Nobel Prize-winning discovery, great science will carry the day and we are likely to get published even if our writing is fairly horrid. But most of us who

publish are “bread-and-butter” scientists. We compete for space in journals which may only accept 10% or 20% of the submissions that they receive each year. For us, convincing, engaging writing will make the difference between being published or rejected, or at least it will make the difference between being published on ?rst submission or having to go through a number of revisions (or journals). None of this is to propose that good writing can make a silk purse out of a sow’s ear. Scientific content is the sine qua non of biomedical writing.

"I have a faith in language," said the poet W. S. Merwin. "It's the ultimate achievement that we as a species have evolved so far." Language is a deep ocean of living words, as varied as undersea life. It is a gift inherited by each person when he or she is born; it can be corrupted and regulated, but it cannot be owned. It is an enormous, complex, inexhaustible gift. *The Soul of Creative Writing* is a tribute to language and to its potentials. It explores the elements of language, style, rhythm, sound, and the choice of the right word. Richard Goodman paints an image of how language can produce a life and meaning that otherwise cannot exist in the symbols themselves. Goodman's stunningly creative collection was written after a lifetime of working and struggling with language. He collects rich examples from writers of the past and present, both great and small, and uses them to illustrate how each element of our written language can be used. The book begins with an analysis of words and how they can be used to create music on the page. Goodman uncovers the strength of words, writing about the shades of meaning that make the search for the exact word both arduous and immensely rewarding. He discusses how to find the proper title and how to find a fitting subject. He shows how to create nonfiction work that is vivid and memorable through the use of the same techniques fiction writers employ. Goodman's volume is written with humor and clarity--with fascination and reverence. Writers will find it an indispensable source of creative inspiration and instruction. In Goodman's words, "reading is a tour of a writer's efforts at manipulating language to create art, to create flesh and blood and mountains, cities, homes, and gardens out of inky symbols on the page." To literary critics, this book will be a guide to understanding the tools and devices of great writing.

This open access book provides a theoretical framework and case studies on decision science for regional sustainability

by integrating the natural and social sciences. The cases discussed include solution-oriented transdisciplinary studies on the environment, disasters, health, governance and human cooperation. Based on these case studies and comprehensive reviews of relevant works, including lessons learned from past failures for predictable surprises and successes in adaptive co-management, the book provides the reader with new perspectives on how we can co-design collaborative projects with various conflicts of interest and how we can transform our society for a sustainable future. The book makes a valuable contribution to the global research initiative Future Earth, promoting transdisciplinary studies to bridge the gap between science and society in knowledge generation processes and supporting efforts to achieve the UN's Sustainable Development Goals (SDGs). Compared to other publications on transdisciplinary studies, this book is unique in that evolutionary biology is used as an integrator for various areas related to human decision-making, and approaches social changes as processes of adaptive learning and evolution. Given its scope, the book is highly recommended to all readers seeking an integrated overview of human decision-making in the context of social transformation.

Even students capable of writing excellent essays still find their first major political science research paper an intimidating experience. Crafting the right research question, finding good sources, properly summarizing them, operationalizing concepts and designing good tests for their hypotheses, presenting and analyzing quantitative as well as qualitative data are all tough-going without a great deal of guidance and encouragement. *Writing a Research Paper in Political Science* breaks down the research paper into its constituent parts and shows students what they need to do at each stage to successfully complete each component until the paper is finished. Practical summaries, recipes for success, worksheets, exercises, and a series of handy checklists make this a must-have supplement for any writing-intensive political science course. New to the Fourth Edition: A non-causal research paper woven throughout the text offers explicit advice to guide students through the research and writing process. Updated and more detailed discussions of plagiarism, paraphrases, "drop-ins," and "transcripts" help to prevent students from misusing sources in a constantly changing digital age. A more detailed discussion of "fake news" and disinformation shows students how to evaluate and choose high quality sources, as well as how to protect oneself from being fooled by bad sources. Additional guidance for writing abstracts and creating presentations helps students to understand the logic behind abstracts and prepares students for presentations in the classroom, at a conference, and beyond. A greater emphasis on the value of qualitative research provides students with additional instruction on how to do it.

This is a collection of critical essays that integrate literature and ideas. Daniel Fuchs presents the writer's individuality as artist and thinker, focusing on the writer's interaction within a wide range of cultural, political, and historical periods and situations representative of the modern period. The essays reflect a progression that goes beyond chronology or historical survey in the consistency and interrelation of the literary and cultural themes explored and the references within them. The book is built around writers who are of central concern to the author. It does not pretend to be a comprehensive framework for analyzing modernism. Fuchs first deals with high modernism, in discussions of Hemingway and Stevens, who in different ways critique tradition and collapsing values. The essays that follow deal with the "contemporary," and here the focus is mainly on American Jewish writers and their cultural impact after modernism. The author's stance is in

relation not only to these traditions but to others that might be thought antagonistic: the formalism of the New Critics and the deconstructionism that reduces the author to a replaceable variable in the dialects of cultural power relations. Fuchs pays tribute to the former, illustrating wider points in literary, socio-cultural, and political history. The overall emphasis on these "extrinsic" matters underscores the book's appeal to a wide audience.

The answer to why you want to write will tell you the kind of book you will be writing.

This unique collection considers the nature of writing groups inside and outside the academic environment. Exploring writing groups as contextual literacy events, editors Beverly J. Moss, Nels P. Highberg, and Melissa Nicolas bring together contributors to document and reflect on the various types of collaborations that occur in writing groups in a wide range of settings, both within and outside the academy. The chapters in this volume respond to a variety of questions about writing groups, including: *What is the impact of gender, race, and socioeconomic class on power dynamics in writing groups? *When is a writing group a community and are all writing groups communities? *How does the local community of a writing group impact the participation of group members in other local or global communities? *How does the local community of a writing group impact the participation of group members in other local or global communities? *What actions contribute to a strong community of writers and what actions contribute to the breakdown of community? *When and for whom are writing groups ineffective? *What is it about belonging to a community of writers that makes writing groups appealing to so many within and beyond the academy? Each chapter highlights how writing groups, whether or not they are labeled as such, function in various spaces and locations, and how collaboration works when writers from a variety of backgrounds with diverse interests come together. *Writing Groups Inside and Outside the Classroom* illustrates that writing groups outside of the academy are worthy of study and serve as important sites of writing and literacy instruction. Offering significant insights into the roles of writing groups in literacy and writing practice, this volume is appropriate for scholars and teachers of writing, rhetoric, composition, and literacy; for writing center administrators and staff; and for writing group participants.

Walt Whitman's passionate writing style and bold subject matter have deeply influenced American poetry. Nearly all of his poems were published in *Leaves of Grass*, which Whitman obsessively expanded, edited, and republished throughout his life, ultimately leaving behind a powerful literary legacy. Twenty of his most commonly read and studied poems are discussed in depth in this volume, which also features ideas for essay topics to assist students in developing critical-thinking skills.

In 1889 uniformed post-boys were discovered moonlighting in a West End brothel frequented by men of the upper classes. "The Cleveland Street Scandal" erupted and Victorian Britain faced the possibility that the Post Office-a

bureaucratic backbone of nation and empire-was inspiring and servicing subversive sexual behavior. However, the unlikely alliance between sex and the postal service was not exactly the news the sensational press made it out to be. *Postal Pleasures* explores the relationship between illicit sex and the Royal Mail from reforms initiated in 1840 up to the imperial end of the nineteenth century. With a combination of historical details and literary analyses, Kate Thomas illustrates how the postal network, its uniformed employees, and its material trappings-envelopes, postmarks, stamps-were used to signal and circulate sexual intrigue. For many, the idea of an envelope promiscuously jostling its neighbors in a post boy's bag, or the notion that secrets passed through the eyes and fingers of telegraph girls, was more stimulating than the actual contents of correspondence. Writers like Anthony Trollope, Eliza Lynn Lynton, Henry James, Oscar Wilde, Arthur Conan Doyle, and others, invoked the postal system as both an instrument and a metaphor for sexual relations that crossed and double-crossed lines of class, marriage, and heterosexuality. *Postal Pleasures* adds a new dimension to studies of the era as it uncovers the unlikely linkage between the Victorian Post Office and the queer networks it inspired.
