Management Accounting is written for students in international Business Management study programs. It covers the widely applied syllabus of Cost Accounting and Management Accounting at universities on bachelor's and master's level. The book is based on more than 20 years' academic teaching experience in Germany and at international universities in South Africa, Malaysia, China, the Netherlands and South Korea. In this text book, the application of methods and instruments comes first. Management Accounting follows a case study based approach. All cases are taken from previous exam papers and explained in detail. The text book starts with a case study of a manufacturing company and compares Financial Accounting to Management Accounting. It covers two point of views: (1) a General Management view, with aspects of business planning, cost-volume-profit analysis, degree of operating leverage, mergers and cross-border acquisitions and risk valuation. (2) a Cost Accounting view with Management Accounting systems, flexible budgeting, cost allocations, performance measurement and monitoring, reporting, calculation, manufacturing accounting (job order and process costing), activity based costing and multi-level contribution margin Accounting. On the UVK website, numerous exam tasks and complete solutions thereto are available in English.

This dissertation was designed to investigate the relationship between the fair market value of assets and stakeholders' investment decisions. The Financial Accounting Standard Board (FASB) is primarily responsible for establishing generally accepted accounting principles (GAAP) (Weygandt, Kieso, and Kimmel, 2003). According to the FASB, GAAP require disclosing of the fair value of assets of organizations. This research investigated the effect of the disclosure of fair value of assets on stakeholders' investment decisions. The research question was, How does the hidden market value of assets affect male and female stakeholders' investment decisions? The survey positively answered this question. Both female and male respondents (519) agreed the market value of assets helps them make better investment decisions. The participants equally shared the need to know the current market value of the company's assets to make better investment decisions. The investment decisions were shared evenly by the female and male participants.

Includes entries for maps and atlases.
