the stories of its original architect, soldiers billeted in the
house during World War I, and a young couple who restores
the house in the 1950s.
Nan is inmiddels getrouwd met haar 'Harvard Hottie' Ryan en

destijds in de steek heeft gelaten. Uit schuldgevoel belooft
Nan hem en zijn jongere broer Stilton te helpen. Dat betekent
een regelrechte confrontatie met haar monsterlijke ex-
werkgeefster Mevrouw X en de bizarre wereld van de
superrijken in New York City. Inmiddels verwikkeld in een
onappetijtelijke scheiding, is het humeur van de neurotische

"There is something fascinating about science. One gets such wholesale returns of conjecture out of such a tri?ing investment of fact. " Mark Twain, Life on the Mississippi The challenges in succeeding with computational science are numerous and deeply a?ect all disciplines. A comprehensive writing text for students in all disciplines. Covers every aspect of the writing process, from coming up with an idea to the final written product, whether it be an essay, exam essay, tutorial paper, or report. Illustrates each stage of the process of writing with examples and models. Offers strategies for the ``prewriting stage'': thinking the question through, defining a purpose, selecting

evidence, and choosing a presentation structure; for the writing stage: constructing introductions and conclusions, sustaining a line of argument, and choosing an appropriate level of technicality or generality; and for the editing stage: reworking sentences, ensuring that each paragraph has a focus, and that the argument flows well throughout the paper. Contains notes on referencing systems, bibliographies, and on punctuation and spelling. Includes many examples of good writing drawn from a wide variety of subjects.

Een verhaal over dromen, doorzettingsvermogen en een nieuwe toekomst Phiona Mutesi is een jonge, analfabete vrouw die opgroeide in Oeganda. Ze was voorbestemd tot het leven dat haar dorpsgenoten leefden: in armoede. Tot ze een schaakbord tegenkwam. Al op haar elfde was ze nationaal schaakkampioen, en op haar vijftiende won ze tegen alle verwachtingen in het belangrijkste jeugdschaakkampioenschap van Afrika. Haar overwinning gaf Phiona de kans deel te nemen aan de Schaakolympiade in Rusland, een toernooi waar eerder grootheden als Garry Kasparov en Bobby Fischer aan deelnamen. En ze heeft nog een lange toekomst voor zich... Het schaakmeisje is Phiona's bijzondere en inspirerende levensverhaal: van haar jeugd in een sloppenwijk in Oeganda, de uitdagingen waar ze voor stond in haar nog jonge leven, de veel te vroege dood van haar vader, en vooral haar

aangeboren talent voor het schaakspel dat haar een nieuwe kans in het leven heeft geschonken.

Sustainability is a new, important discourse aimed at promoting a new strategy in the development of energy, water and environmental (EWE) systems ? the key

components that affect the quality of life on our planet. It is becoming increasingly clear that the quest for sustainable development requires integrating economic, social, cultural, political and ecological factors. The behavior and properties of an EWE system arise not merely from the properties of its component elements, but also to a large degree also from the nature and intensity of their dynamic interlinkages. This volume helps clarify the complexity of these problems by providing a deeper understanding of the implications of the different aspects of sustainability.This work contains a collection of selected, peer-reviewed and state-of-the-art reflecting papers that were presented at the Third Dubrovnik Conference on Sustainable Development of Energy, Water and Environment Systems that was held in June 5?10, 2005 in Dubrovnik, Croatia.

European memory institutions are repositories of a wealth of rare documents that record public domain content. These documents are often stored in 'dark-archives' to which members of the public are granted limited access, resulting in the public domain content recorded therein being relegated to a form of 'forgotten-knowledge'. Digitisation offers a means by which such public domain content can be made speedily and easily accessible to users around the world. For this reason, it has been hailed as the harbinger of a new 'digital renaissance'. This book examines the topical issue of the need to preserve exclusivity over digitised versions of rare documents recording public domain content. Based on data gathered through an empirical survey of digitisation projects undertaken by fourteen memory institutions in five European Union Member States, it argues for the introduction of exclusive rights in digitised versions of rare documents recording public domain textual content as a means of incentivising private-sector investment in the digitisation process. It concludes by

presenting a detailed proposal for a European Union Regulation that would grant memory institutions a limited-term related right in digitised versions of rare documents held in their collections subject to stringent exceptions and limitations that are designed to safeguard user interests.
