We can all be heroes. That's the inspiring message of this New York Times Bestselling picture book biography series from historian and author Brad Meltzer. Learn all about George Washington, America's first president. George Washington was one of the greatest leaders the world has ever known. He was never afraid to be the first to try something, from exploring the woods around his childhood home to founding a brand new nation, the United States of America. With his faith in the American people and tremendous bravery, he helped win the Revolutionary War and became the country's first president. Each picture book in this series is a biography of a significant historical figure, told in a simple, conversational, vivacious way, and always focusing on a character trait that makes the person a role model for kids. The heroes are depicted as children throughout, telling their life stories in first-person present tense, which keeps the books playful and accessible to young children. And each book ends with a line of encouragement, a direct quote, photos, a timeline, and a source list.

A Revolutionary War history told through eighteenth-century illustrations: "Utterly absorbing" (The Times, London). Americans are steeped in the history of the American Revolution, but often the fog of myth shrouds the reality. In these pages, the path to war is starkly documented by British caricatures of politicians and generals—for the most part favorable to the Colonists. For George III, Lord North, and Britain, the war was a disaster that need not have happened. The problems of coping with a country five thousand miles away with a tradition of representative government, a free press, and a spirit of independence were just too much. But they, together with Generals Howe, Burgoyne, Cornwallis, and others, were mercilessly lampooned. Washington, the hero, is spared, although there are surprising and dark elements to the American victory illustrated here. Using prints and caricatures from the period—some never before published—and drawing on his own experience in politics, Kenneth Baker provides vivid and memorable images that illustrate these extraordinary historical events.

Looks at the attitudes and the emerging power of the Millennial Generation in the United States.

We can all be heroes. That's the inspiring message of this New York Times Bestselling picture book biography series from historian and author Brad Meltzer. Even as a child, Martin Luther King, Jr. was shocked by the terrible and unfair way African-American people were treated. When he grew up, he decided to do something about it—peacefully, with powerful words. He helped gather people together for nonviolent protests and marches, and he always spoke up about loving other human beings and doing what's right. He spoke about the dream of a kinder future, and bravely led the way toward racial equality in America. This lively, New York Times Bestselling biography series inspires kids to dream big, one great role model at a time. You'll want to collect each book.

In het vierde hoofdstuk van de Bijbel doodt Kaïn Abel. Het is de bekendste moord ter wereld. Maar de Bijbel zwijgt over het wapen waarmee Kaïn zijn broer doodde. In 1932 werd Mitchell Siegel gedood door drie kogels in zijn borst. Tijdens het rouwproces droomde zijn zoon Jerry van een kogelvrije man en schiep de bekendste held ter wereld: Superman. En net als in het Bijbelverhaal werd het wapen waarmee deze onopgeloste moord begaan werd, nooit gevonden. Vandaag staat Cal Harper oog in oog met zijn vermiste vader. Hij is neergeschoten door het wapen dat gebruikt werd bij de moord op Mitchell Siegel. Maar voordat Cal één vraag kan stellen, worden hij en zijn vader aangevallen door een meedogenloze moordenaar, getatoeëerd met het oeroude teken van Kaïn. Wat is het verband? Wat heeft Kaïn gemeen met Superman?

American Literature Before 1880 attempts to place its subject in the broadest possible international perspective. It begins with Homer looking westward, and ends with Henry James crossing the Atlantic eastwards. In between, the book examines the projection of images of the East onto an as-yet unrecognised West; the cultural consequences of Viking, Colombian, and then English migration to America; the growth and independence of the British American colonies; the key writers of the new Republic; and the development of the culture of the United States before and after the Civil War. It is intended both as an introduction for undergraduates to the richness and variety of American Literature, and as a contribution to the debate about its distinctive nature. The book therefore begins with a lengthy survey of earlier histories of American Literature.

Presidents' Day is a day to remember the men who have held the highest office in our land. Readers will learn about the history of Presidents' Day, our most influential presidents, and how we can honor these men and our national history today.

The 22nd book in the New York Times bestselling series of biographies about heroes tells the story of Anne Frank, the young Jewish girl who documented her life while hiding from the Nazis during World War II. This engaging biography series focuses on the traits that made our heroes great--the traits that kids can aspire to in order to live heroically themselves. Each book tells the story of an icon in a lively, conversational way that works well for the youngest nonfiction readers. At the back are an excellent timeline and photos. This volume features Anne Frank, whose courage and hope during a time of terror are still an inspiration for people around the world today. While Anne and her family hid in an attic during the Holocaust, she kept a journal about all her hopes and fears and observations. That journal and the story of her life are still read and told today to remember the life of a young girl and warn against the consequences of bigotry.

This collection of essays offers a rich variety of approaches to how people and institutions in greater New York have sought to find meaning in the 9/11 attacks on the World Trade Center, now a decade on. The views and practices documented here join memory, recovery, and rebuilding together to form a vital new chapter in New York's metropolitan history. Contributors contest the dominant nationalist narrative about 9/11 to generate a more local and socially-engaged form of scholarship that connects directly with the experiences of people who lived or came to work in New York that fateful day and the years that followed. In doing so, these essays give academics and clinical professionals an opportunity to reflect upon and work with the people of a community – in this case, metropolitan New York – as essential partners, and even the main protagonists, in creating new paradigms to capture the significance of these events and their aftermath. The collection is comprised of sixteen essays by experts drawn from a wide range of scholarly and professional fields. They investigate how people across the New York metropolitan region initially responded to and have since remembered the events of September 11th as they rippled out into the city, the surrounding metropolitan region, and the nation at large. They engage directly with the emotional and psychological aftermath of the attacks, approaching the questions of healing and teaching from a variety of institutional, professional, and non-professional perspectives. The volume concludes with a selection of essays that grapple with the challenge of "Representing 9/11." Contributors to this section evaluate contemporary novels and films that have risked engagement with deep narrative traditions to translate the recent memory of public events into resonant stories and imaginative language. Readers are invited to consider how all these responses – in literature, memorials, media representations, and the words and actions of diverse individuals – still contribute to the complex, yet inescapable challenge of making meaning of 9/11.

#1 New York Times bestselling author Brad Meltzer unravels the truth behind the secret assassination attempt on George Washington and how the plot helped create the CIA and the FBI in this young reader's adaptation for younger audiences. 1776. The early days of the Revolutionary War. It supposedly began with Thomas Hickey, a private in the Continental Army, and New York governor William Tryon. In an astonishing power grab, they plotted to kill Hickey's boss: a man by the name of George Washington. In the end, Hickey was caught, brought to trial, and found guilty. It would seem he became the first person in the new nation to be executed for treason. But to this day, nobody knows for sure if this story is true. In *The First Conspiracy*, Brad Meltzer sheds light on the close-kept secrets and compelling details surrounding this story and exposes the history of how the assassination plot catalyzed the creation of the CIA and FBI. This page-turning investigation offers young readers an in-depth look at the facts and remaining questions that surround this contested historical event.

A Black History Month-timed entry in the best-selling series follows the heroic story of baseball star Jackie Robinson, describing, in text and comic thought bubbles, his childhood, early ambitions and barrier-breaking achievements. By the best-selling author of *Heroes for My Son*. This book provides a thorough examination of a variety of specialties within the broad range of management consulting. A book of such scope and depth could only be written by a large number of experts, each from one of the many specialties related to management consulting. Together, all 27 contributors take the reader through an industry that is currently undergoing significant change. While covering all the major practice areas of consulting, the book also offers new insights into change processes and addresses compelling management issues now facing consulting firms.

"Political Research in the Middle East and North Africa focuses specifically on doing research in one of the most important regions in contemporary world politics. It is also one of the most difficult areas to do research in given the current high levels of violence, political instability, and authoritarianism that plague the region. Gathering together a large and diverse group of researchers who study the region, Janine Clark and Francesco Cavatorta's volume will serve as a foundational methods guide for young academics on how to conceive and

carry out their research projects. At the same time the topics in the book provide a useful refresher to more established scholars so that their methodological training and ethical considerations keep pace with novel approaches and changing obstacles in the field. What makes this volume especially useful is its focus on methodological 'lessons learned' from the contributors' first hand experiences. Each chapter deals with the challenges of implementing qualitative and quantitative methods in the field, the real-life obstacles encountered and the possible solutions to overcoming them. It will therefore be an invaluable companion book to more standard methods books, which focus on the 'how to' of methods but are often devoid of any real discussion of the challenges of on-the-ground fieldwork."--Publisher's summary.

"When Yadina, Brad, and Xavier are playing soccer, the ball accidentally lands on a flower patch and bends some of the petals. So the Secret Museum sends them back in time to meet real-life plant doctor George Washington Carver!"--Back cover.

Follows Washington's journey to each of the original thirteen states, during which he brought the government to the people and promoted the idea of a strong federal union.

Why was George Washington dismayed by the outcome of the American Revolution? Would slavery still exist if the South had not seceded from the Union in 1861? Might socialists rule America today if Teddy Roosevelt had not run for President and lost in 1912? History is full of contingencies. People confront problems and debate options for solving them. Then they make a choice and face the consequences of their choice. Often they wonder if a different choice might have been better. Was the American Revolution a mistake? Was racial segregation inevitable? Was the Cold War necessary? Americans have repeatedly asked these sorts of questions as they examined the consequences of their choices. This is a book about revisiting crucial choices people made in history and examining the consequences of those choices for them and for us. It demonstrates a method of teaching history that recreates events as people experienced them, and asks important questions that troubled them but that rarely appear in conventional textbooks. Unlike conventional methods that often reduce history to names, dates and factoids for students to memorize, it is a method that brings past debates to life, the losers' as well as the winners' points of view, and makes the subject exciting. In studying history as choice, students examine the problems people faced, their options for solving them, their decision-making processes, and the choices they made. Then students evaluate the consequences of those choices both for people in the past and us today. They explore what might have happened if different choices had been made. Finally, students relate the consequences of those past choices to problems we face today and the choices we need to make. History as choice is a practical and practicable method. It has been designed to satisfy the curriculum goals of the National Council for the Social Studies, and the book explains how it can be used to satisfy any state or local curriculum standards. The book also identifies and illustrates resources that can be used with this method -- from data bases to popular music -- and explains how teachers can gradually integrate it into their courses. In the first part of the book, the method of history as choice is explained using the question of whether the American Revolution was a mistake as a case in point. The second part of the book explores thirteen other questions about significant issues and events in American history as additional examples of how one might teach history as choice.

Brad Meltzer and Josh Mensch, the bestselling authors of *The First Conspiracy*, which covers the secret plot against George Washington, now turn their attention to a little-known, but true story about a failed assassination attempt on the sixteenth president in *The Lincoln Conspiracy*. Everyone knows the story of Abraham Lincoln's assassination in 1865, but few are aware of the original conspiracy to kill him four years earlier in 1861, literally on his way to Washington, D.C., for his first inauguration. The conspirators were part of a white supremacist secret society that didn't want an abolitionist in the White House. They planned an elaborate scheme to assassinate the President-elect in Baltimore as Lincoln's inauguration train passed through, en route to the nation's capital. The plot was investigated by famed detective Allan Pinkerton, who infiltrated the group with undercover agents, including Kate Warne, one of the first female private detectives in America. Had the assassination succeeded, there would have been no Lincoln Presidency and the course of the Civil War and American history would have forever been altered.

*Comic Book Collections and Programming* is an essential reference for collections librarians, children's librarians, and teen librarians, whether they are comics-lovers or have never read an issue. It covers the practical realities of this non-traditional format, like binding, weeding, and budgeting.

*The Corporate Rich and the Power Elite in the Twentieth Century* demonstrates exactly how the corporate rich developed and implemented the policies and created the government structures that allowed them to dominate the United States. The book is framed within three historical developments that have made this domination possible: the rise and fall of the union movement, the initiation and subsequent limitation of government social-benefit programs, and the postwar expansion of international trade. The book's deep exploration into the various methods the corporate rich used to centralize power corrects major empirical misunderstandings concerning all three issue-areas. Further, it explains why the three ascendant theories of power in the early twenty-first century—interest-group pluralism, organizational state theory, and historical institutionalism—cannot account for the complexity of events that established the power elite's supremacy and led to labor's fall. More generally, and convincingly, the analysis reveals how a corporate-financed policy-planning network, consisting of foundations, think tanks, and policy-discussion groups, gradually developed in the twentieth century and played a pivotal role in all three issue-areas. Filled with new archival findings and commanding detail, this book offers readers a remarkable look into the nature of power in America during the twentieth century, and provides a starting point for future in-depth analyses of corporate power in the current century.

A prominent consultant reveals secrets to help you influence and persuade others—even when you aren't in a position of power. We all have occasions in which we want or need to persuade someone of greater clout, prestige, or authority to see things our way. There are books that show how to effect change from a leadership position or how to work with peers within your own organization—but what can you do when you need to exert "upward influence" with decision makers who can help you achieve your goals? In this book, a popular speaker and successful consultant with expertise in grassroots efforts shows which tactics are most successful when you're the underdog. She also shares real-world stories of everyday people who have achieved persuasion success in politics and business with someone up the food chain, the peer-reviewed science behind their success—as well as insights from those whose minds they changed.

'Illuminating . . . reveals why some people and systems are more likely to be corrupted by power than others' - Adam Grant 'Passionate, insightful, and occasionally jaw-dropping . . . Corruptible sets out the story of the intoxicating lure of power-and how it has shaped the modern world' - Peter Frankopan 'A brilliant exploration' - Dan Snow 'Klaas is the rarest of finds: a political scientist who can also tell great stories. He mixes memorable anecdotes with stern analysis to tackle one of the biggest questions of all: do we have to be ruled by bad people?' - Peter Pomerantsev Does power corrupt, or are corrupt people drawn to power? Are entrepreneurs who embezzle and cops who kill the outgrowths of bad systems or are they just bad people? Are tyrants made or born? If you were thrust into a position of power, would new temptations to line your pockets or torture your enemies gnaw away at you until you gave in? To answer these questions, *Corruptible*

draws on over 500 interviews with some of the world's noblest and dirtiest leaders, from presidents and philanthropists to rebels, cultists, and dictators. It also makes use of a wealth of counter-intuitive examples from history and social science: You'll meet the worst bioterrorist in American history, hit the slopes with a ski instructor who once ruled Iraq, have breakfast with the yogurt kingpin of Madagascar, learn what bees and wasps can teach us about corruption, find out why our Stone Age brains cause us to choose bad leaders, and learn why the inability of chimpanzees to play baseball is central to the development of human hierarchies. *Corruptible* will make you challenge basic assumptions about how you can rise to become a leader and what might happen to your head when you get there. It also provides a roadmap to avoiding classic temptations, suggesting a series of reforms that would ensure that better people get into power, while ensuring that power purifies rather than corrupts.

I Am Jane Goodall Penguin

-It is the biggest question of all in the universe, when and from what universe came into being and how it expanded. It puzzled Einstein and many other cosmologist after him. Finally, they have discovered the particle, which they mysteriously named the God particle. As the mystery surrounds this particle, their quest will either end in finding God, the source of the particle or not. -In an age when biblical truth are considered fairytales by many a scientists, someone must be bold enough to tell the truth that in the beginning the universe was void and darkness prevailed in the entire cosmos until God separated darkness by his eternal light and used 5 percent of the dark matter to create the universe and everything within it. Dr. Cherian courageously links the Scriptures and the science behind the dark matter and the scientists who were divinely guided to name it the God particle. -Newton's and Einstein's dreams have been materialized and though not accepted by the vast majority of scientists openly, many are compromising that universe formed from a cosmic evolution, and life evolved abiogenetically and God interjected his presence into the process of evolution to claim his role-a most absurd stand. -While the latest scientific discoveries tackled the biggest mystery of the universe, scientific discoveries have corroborated the truth man (humanity) is nothing but specks of the dust (Ps. 103:14). -While God who created the universe "sits enthroned above the circle of the earth and stretches out (expanse) the heavens like a canopy and spreads them out like a tent. (Isa. 40:22) is also holding the universe in his hands. -Dr. Cherian brings to light the neglected truth that science and theology are the perfect match of God's truth in the universe. -Most of the scientific discoveries deciphered during the last five hundred years are recorded in the Bible, including water in the exoplanets and the dark matter and dark energy that have been discovered recently. The author has succinctly explained with specific biblical references and explanations. -The author also reveals that from Plymouth Rock to Independence Hall and throughout the length and breadth of America, the profound Christian heritage is engrained in every inch of the land, and America cannot negate God from our land. -God's systematic order of creation was schemed as stages of unguided evolution. -All Christians of the nation must reinvent the declaration by the Supreme Court of the United States in 1892 that "This a Christian Nation," and present-day lawmakers must adhere to that with freedom and liberty for all. -Like a skilled attorney, the author explains America is part of the "Israel of God and a member of the Commonwealth of Israel," as explained by Apostle Paul. The United States of America and the United Kingdom are two nations blessed by God, under the protection of the Almighty God, and we have a moral mandate to preserve our godly culture and civilization and lead other nations to follow before Armageddon, which is imminent.
