Building on the authors' celebrated work in cognitive coaching, this important book provides teachers, schools, and policy leaders with the rationale and new direction for enhancing the development of the intellectual capacity of educators, their performance, and their ultimate effects on student learning. The authors focus on assisting teachers in developing awareness in their own ability to make effective judgments based on all their capabilities and experiences. When teachers weave internal expertise and external criteria together into the exquisite tapestry of teaching and learning, they gain confidence in their ability to make a difference for all students. Rather than spending time becoming better inspectors and enforcers, Cognitive Capital calls for skillful leaders to engage educators' thought processes which promote practices that have high impacts on their students. "The authors have positioned 'cognitive capital' at the center of understanding and developing teacher quality and have succeeded brilliantly." —Michael Fullan, professor emeritus, Ontario Institute for Studies in Education, University of Toronto, author of Professional Capital: Transforming Teaching in Every School "In contrast to the persistent trend of simplifying teaching via reductive evaluation tools, Costa, Garmston, and Zimmerman dive fearlessly into its complexities. Cultivating 'cognitive capital' is a refreshing new direction for educators to embrace. The ideas and recommended actions in this fascinating book support a culture of thoughtful innovation which develops mindful and resourceful professionals. The contemporary learners in our classrooms need nothing less." —Heidi Hayes Jacobs, president, Curriculum Designers, Inc., curriculum21.com Arthur L. Costa is emeritus professor of education at California State University, Sacramento. Robert J. Garmston is emeritus professor of educational administration at California State University, Sacramento. Diane P. Zimmerman is a former superintendent for the Old Adobe Schools in Petaluma, California.

Every child should have access to an education that works. The Quest for a Meaningful Special Education follows the educational journeys of nine students with a language-based learning disability (LBLD) who were removed from a debilitating learning situation and enrolled in a school designed to address their particular learning needs. Through

following their journeys, the book explores the role of cultures within and outside the school and examines some of the ways that the construction of special education has affected student learning.

An engaging, kid-friendly exploration of America's leading architect and his work This revised and updated edition of a longstanding classic, Frank Lloyd Wright for Kids, details the life, times, and work of the celebrated architect. Through simple, kid-friendly prose and anecdotes, author Kathleen Thorne-Thomsen describes the influences of Wright's Wisconsin childhood filled with nature, music, and close family ties; his struggles to find work as a young architect; the unique style that led him to the top of his profession; and masterpieces such as the Robie House, Hollyhock House, Fallingwater, the Guggenheim, and many others. Also discussed are Wright's sometimes controversial private and public life and the people and times that influenced him and vice-versa, with new sidebars on topics such as the Chicago and Bauhaus schools of architecture, Friedrich Froebel and his toy blocks that enchanted Wright as a child, and the 1893 Chicago World's Fair. Budding architects will delve into architectural and design concepts while having fun through 21 hands-on projects, such as creating an edible model of Fallingwater, making a miniature Japanese kite, reading an architectural plan, and much more. A time line,

glossary, bibliography, and list of houses to visit are also included.
