Andy en Terry wonen in een enorme boomhut. Als hun uitgever boos belt waar hun nieuwe boek blijft, gaan ze hard aan het werk. Ze verzinnen de gekste dingen en er gaat van alles mis. Met stripachtige zwart-wittekeningen. Vanaf ca. 9 jaar.

Faith. Trust. Triumph. "I'm sorry," the doctor said. "He is permanently and totally blind. There is nothing we can do for him." George and Sarah Hingson looked at each other, devastated. Their six-month-old son, Michael was a happy, strawberry blond baby boy, healthy and normal in every way except one. When the Hingsons switched on a light or made silly faces, Michael did not react. Ever. "My best suggestion is that you send him to a home for the blind," the doctor continued. "He will never be able to do anything for himself." Forty-seven years later, a yellow Labrador retriever puppy was born in the whelping unit of Guide Dogs for the Blind in San Rafael, California. The puppy's name was Roselle. On September 11, 2001, she saved Michael's life. This is Roselle's story too. —From the Introduction Every moment in Michael Hingson's and Roselle's lives seemed to lead up to this day. When one of four hijacked planes flew into the World Trade Center's north tower on September 11, 2001, Michael Hingson, a district sales manager for a data protection and network security systems company, was sitting down for a meeting. His guide dog, Roselle, was at his feet. Paired for twenty-one months, man and dog spent that time forging a bond of trust, much like police partners who trust their lives to each other. Michael couldn't see a thing, but he could hear the sounds of shattering glass, falling debris, and terrified people flooding around him and Roselle. However, Roselle sat calmly beside him. In that moment, Michael chose to trust Roselle's judgment and not to panic. They were a team. Thunder Dog is a story that will forever change your spirit and your perspective. It illuminates Hingson's lifelong determination to achieve parity in a sighted world and how the rare trust between a man and his guide dog can inspire an unshakable faith in each one of us.

Have you ever wondered what a guide dog does? How do they know to lead a blind owner? Can they understand traffic lights? Most importantly, how does the owner know where to pick up the poop? This memoir answers these questions—and more. It tells what guide dogs are supposed to do. They're smart, loyal and well-trained—but not all dogs are created alike. Musket is proof of that. He's definitely got a thing for treats and belly rubs. For the first time, the dog has his say. (Of course he needed a little help with the typing, since he doesn't have opposable thumbs. That's where author Mark Carlson came in. Still, Musket is the brains of the outfit.) Mark and Musket tell their story with humor, emotion, and Musket's occasional contradictions. And at the end of the day, Musket somehow manages to be a great guide dog too. *Confessions of a Guide Dog* was written so a wonderful, devoted dog could reach out to those who haven't been lucky enough to meet him. He'll make you smile, laugh, cry, and want to give him treats. This is their story. (And they're sticking to it.)

In a lyrical love letter to guide dogs everywhere, a blind poet shares his delightful story of how a guide dog changed his life and helped him discover a newfound appreciation for travel and independence. Stephen Kuusisto was born legally blind—but he was also raised in the 1950s and taught to deny his blindness in order to "pass" as sighted. Stephen attended public school, rode a bike, and read books pressed right up against his nose. As an adult, he coped with his limited vision by becoming a professor in a small college town, memorizing routes for all of the places he needed to be. Then, at the age of 38, he was laid off. With no other job opportunities in his vicinity, he would have to travel to find work. This is how he found himself at Guiding Eyes paired with a Labrador named Corky. In this vivid and lyrical memoir, Stephen Kuusisto recounts how an incredible partnership with a guide dog changed his life and the heart-stopping, wondrous adventure that began for him in midlife. Profound and deeply moving, this is a spiritual journey, the story of

discovering that life with a guide dog is both a method and a state of mind.

You know the tale of the little girl with a curl, in the middle of her forehead? Well, my guide dog uska's a bit like that. I only say a bit because when he's good, he is very, very good. But he's never bad, and he's never horrid. He does however, have his moments. Oh, I have mine too. When it comes to being blind, I'm not very good at it and Uska has to cope with that. I guess some days we drive each other nuts, which is hardly surprising because we truly are a 24/7 partnership. Mind you, I do love the bones of him and not just because he's totally changed my life. Since I first got him, I've been wondering what is really going on in that head of his, especially when he's working with me in supermarkets, or at parties, or on trains and even in hospital casualty wards. During the early months, he was the only dog I knew who could make his harness look rakish, like a lovable rascal in an old Hollywood movie. If he'd spent as much time learning to work with me, as he spent on artfully dodging his way to any dropped chips, he'd have been Guide Dog of the year. As it was, he managed to guide me down the aisle and a rock sliding mountain. He played paramedic for a day and stayed right by my side as my health got worse and worse. All this before he was 3 years old. 'Confessions of a Guide Dog' is Uska's version of events, during that extraordinary first year. His 'lick-n-tell' memoirs are as loyal and loving as a Labrador could make them, but they do come from a dog and dogs don't lie. Expect some home truths about the human race, blind living and dog loving, all told with a humour that reflects the effect he has on people around him. This should spread to everyone who reads them. Despite our teething problems, we made it, largely thanks to the training efforts of the team at Guide Dogs. And he did make me laugh, still does in fact. Now he's getting on a bit, he's more precious than ever, So, I'd like to help raise funds for more guide dogs. At least 15% to 25% of our writer's royalties will go to Guide Dogs for the Blind. We thank you now, for any support you give.

The Seeing Eye traces its origin to the trenches and battlefields of World War I, where legions of soldiers were blinded during years of brutal engagements. After the war, Germany trained dogs to guide its blinded veterans. In the late 1920s, a small group of innovators took it upon themselves to teach blind and visually impaired people in North America to use dog guides. The Seeing Eye has since helped thousands to achieve greater independence, dignity, and self-confidence, using specially trained Seeing Eye dogs as their companions. Using rare photographs and documents, The Seeing Eye details this remarkable organization and its pioneers, including German shepherd breeder and Seeing Eye founder Dorothy Harrison Eustis; Morris Frank, the first visually impaired American to learn to use a Seeing Eye dog; and Frank's own dog, Buddy. The story follows the first students as they navigate the busy streets of Nashville, Tennessee, in 1929, and Morris County, New Jersey, where the fledgling organization moved in 1931 and where it continues to operate today. The Seeing Eye documents the campuses and the students, as well as the faithful dogs, their care, and their training. The reader will meet the dedicated employees and volunteers who have made the organization possible, as well as the graduates who have gone on to lead successful and fulfilling lives. A guide dog-in-training tells the story of her first year.

This paper deals with guide dogs for visually impaired people. What are the reasons why only 10% of the visually impaired in Switzerland own a guide dog? This is a question which I wanted to understand, amongst others. The paper is divided into two parts - a theoretical and a practical part. In the first part, general information is given on this issue. Firstly, there is a section covering blindness in general. Basic terms are rewritten here. Secondly, the paper goes into more depth on the topic of the guide dog. The historical backgrounds of both dogs and specifically guide dogs are explained. Later on, the ideal guide dog is demonstrated. An insight into the education of guide dogs is given thereafter. Moreover, the qualities of a dog as both mobility help and life companions are explained. Finally, the legal situation of the guide dogs, especially in Switzerland, is considered. The second part is dedicated to answering questions and proving hypotheses that were set up previously. One first hypothesis deals with the question of whether the education of guide dogs is adequate and whether the dogs are thus sufficiently reliable. The second hypothesis deals with the personal judgment of the blind persons on the value of a guide dog in their lives and the third hypothesis addresses the time consume of having a guide dog. With my last hypothesis, I want to figure out if guide dog handlers are satisfied with their mobility help or not. An interview with a puppy raiser, interviews with guide dog handlers, a visit to a guide dog school and a survey to white stick users were very helpful for this. The results of the different investigations are evaluated and discussed. At the end, the paper looks again at the hypotheses and questions formulated before the conducting of the practical part. The work finishes with a rough overview. It is possible for anyone interested to read the complete interviews as they are included in the appendix.
