The most important factor affecting student learning isn't standards, textbooks, or testing--it's teachers. And when it comes to improving learning, research has shown teachers what works. But the real challenge comes when it's time to do what works and do it well. In this book, Jane E. Pollock explains how making the right adjustments in four critical areas of practice—curriculum, instruction, assessment, and feedback—can help any teacher improve student learning significantly. Here, you'll find out how to -- Create a classroom curriculum document that's truly useful and incorporates robust concepts, generalizations, and procedures. -- Plan instruction that's focused on helping students become master learners who can apply information and skills, not just do schoolwork. -- Design varied classroom assessments that yield evidence of mastery and pinpoint where further instruction is required. -- Use criterion-based feedback to improve individual student achievement and refine instruction. Along with step-by-step procedures, practical guidelines, and specific models, this book features the voices of individual teachers who share their experience using the author's "Big Four" approach. Like them, you may find it's the missing link you need to transform your pedagogy and achieve unprecedented levels of both student success and professional satisfaction.

Improve your guided reading lesson plans with Guided Reading: Infer for grades five and six. This reading comprehension book includes 36 leveled readers—six sets of two each for below-, on-, and above-level student readers—and it also features charts,

In an era of change in education, the time is right to refocus attention on guided reading practices. Guided reading remains an anchor in small group literacy instruction, but how has it changed with the new shifts? In this book, Michael Ford provides a practical resource to guided reading. He explains how it has evolved, why it's important, how to fit it into a comprehensive literacy program, how to select texts, how to position it for intervention, and how to assess students. Also included is an appendix with a listing of guided reading books.

A book that brings the habits of reading to life Great readers are not made by genetics or destiny but by the habits they build—habits that are intentionally built by their teachers. The early formal years of education are the key to reversing the reading gap and setting up children for success. But K-4 education seems to widen the gap between stronger and weaker readers, not close it. Today, the Common Core further increases the pressure to reach high levels of rigor. What can be done? This book includes the strategies, systems, and lessons from the top classrooms that bring the habits of reading to life, creating countless quality opportunities for students to take one of the most complex skills we as people can know and to perform it fluently and easily. Offers clear teaching strategies for teaching reading to all students, no matter what level Includes more than 40 video examples from real classrooms Written by Paul Bambrick-Santoyo, bestselling author of *Driven by Data* and *Leverage Leadership* Great Habits, Great Readers puts the focus on: learning habits, reading habits, guided reading, and independent reading. NOTE: Content DVD and other supplementary materials are not included as part of the e-book file, but are available for download after purchase
