Guided Reading is the classroom Reading Recovery with supplements. In the classroom every child is involved in focussed reading instruction, small groups necessitate exceptional organization, all this without the year-long training that Reading Recovery participants have. Over the years teachers have been directed towards Guided Reading without knowledge of how to organize the class while working with small groups and further, without the knowledge of what is involved in overt reading instruction. This book will change that and give teachers the resources to organize and put in place worthwhile and relevant activities for children to independently engage in. In this book, significant suggestions are forwarded to make Guided Reading easier to implement and more effective. This book challenges held views about Guided Reading - misconceptions and misapplications of Guided Reading will be highlighted and in place will be effective pedagogy to help children move towards being truly confident, thinking readers. The teaching practices emphasized are: \* Managing differentiated reading instruction for early, developing, early fluent readers, including a chapter relating to older readers. \* Class management while working with small groups - independent tasks. \* Questioning and prompting so children acquire and use self-help reading and comprehension strategies. \* Encouraging student talk where they explore and exchange ideas. \* Assessment (and recording) that informs instruction.

In an era of change in education, the time is right to refocus attention on guided reading practices. Guided reading remains an anchor in classroom literacy programs, but how has it changed with the new shifts in education? In this book, Dr. Michael P. Ford provides a practical resource for guided reading. He explains how it evolved, why it's still important, how to fit it into a comprehensive literacy program, how to select texts, how to assess and support students, and how to position it for intervention. Also included is an Appendix with a listing of recommended guided reading books.

This book focuses on the inter-relationship between reading, writing and speaking and listening. Psychologists and educationalists, influenced by the work of Vygotsky, have emphasised the importance of social interaction in learning, and the National Writing, Oracy and LINC Projects highlighted the need for quality interactive pupil discourse and effective teacher-pupil interaction. However, although the DfEE claims that the successful teaching of literacy is characterised by good quality oral work, speaking and listening is not included in the National Literacy Strategy Framework and the Literacy Training Pack does not address the issue. *Literacy and Learning through Talk* blends theory, research and practice to show how an integrated programme of work can be developed to ensure that literacy is taught in a vibrant and stimulating way. Strategies for developing successful group work and whole class, interactive discourse are examined and effective teaching roles and questioning techniques are explored. Transcripts of group discussions and examples of children's work illustrate various points and work plans and practical classroom activities are described.
