

History Alive World Connections Answer Key

Designed with New York State high school students in mind. CliffsTestPrep is the only hands-on workbook that lets you study, review, and answer practice Regents exam questions on the topics you're learning as you go. Concise answer explanations immediately follow each question--so everything you need is right there at your fingertips. After going through the practice questions, you can use the workbook again as a refresher to prepare for the Regents exam by taking a full-length practice test. You'll get comfortable with the structure of the actual exam while also pinpointing areas where you need further review. About the contents: Inside this workbook, you'll find sequential, topic-specific test questions with fully explained answers for each of the following subjects: World History Geography Economics Civics, Citizenship, and Government A full-length practice test at the end of the book is made up of questions culled from multiple past Regents exams. Use it to identify your weaknesses, and then go back to those sections for more study. It's that easy! The only review-as-you-go workbook for the New York State Regents exam. Lucy Maynard Salmon was a pioneer educator with a progressive spirit. Having earned a bachelor's and master's degree from the University of Michigan in 1876 and 1883, Salmon continued her studies under Bryn Mawr professor and future U.S. President, Woodrow Wilson. Thereafter, Salmon began her forty-year Vassar College career and earned a reputation as a nationally prominent historian, suffrage advocate, author, and teacher. She helped found the American Association of University Women, the American Association of University Professors, and the Middle States Council for the Social Studies. She was the only woman to serve on the American Historical Association's Committee of Seven and the first woman to be elected to its Executive Council. An advocate of the new social history, Salmon's teaching methods were novel at the time and continue to be relevant today. Indeed, Salmon advised students to «go to the sources».

This volume of the Thinker's Guide Library introduces readers to powerful methods for questioning that pinpoint underlying beliefs and systems of logic. Richard Paul and Linda Elder show how practical and accessible the Socratic method of inquiry can be and how useful it is when assessing and solving any problem.

Andrew Linklater has been one of the most innovative thinkers in international relations, introducing critical and ethical elements into the discipline which has forced it to rethink many of its basic assumptions. This book builds on this body of work to develop a radical new theory that calls for a cosmopolitan approach to international relations. Key subjects covered in the book include: citizenship and humanity critical theory and political community the problem of harm the sociology of states-systems.

The most innovative introduction to Sociology in a generation presents a coherent essay that inspires students to develop their sociological imaginations: to see the world and personal events from a new perspective, and to confront sociological issues on a day-to-day basis. This engaging text introduces the discipline of sociology to the contemporary student and provides an integrated, comprehensible framework from which to view the world. In each chapter, authors Jeanne H. Ballantine and Keith A. Roberts provide an organizing theme that is not exclusively tied to one theoretical paradigm to help students see relationships between topics. Our Social World presents the perspective of students living in the larger global world.

The OECD Programme for International Student Assessment (PISA) examines what students know in reading, mathematics and science, and what they can do with what they know. Volume VI: Are Students Ready to Thrive in an Interconnected World? explores students' ability to examine issues of local, global and cultural significance; understand and appreciate the perspectives and worldviews of others; engage in open, appropriate and effective interactions across cultures; and take action for collective well-being and sustainable development.

Explores how writers across five continents and four centuries have debated ideas about what it means to be an individual, and shows that the modern self is an ongoing project of global history. In *Global Origins of the Modern Self*, from Montaigne to Suzuki, Avram Alpert contends that scholars have yet to fully grasp the constitutive force of global connections in the making of modern selfhood. Alpert argues that canonical moments of self-making from around the world share a surprising origin in the colonial anthropology of Europeans in the Americas. While most intellectual histories of modernity begin with the Cartesian inward turn, Alpert shows how this turn itself was an evasion of the impact of the colonial encounter. He charts a counter-history of the modern self, tracing lines of influence that stretch from Michel de Montaigne's encounter with the Tupi through the writings of Jean-Jacques Rousseau into German Idealism, American Transcendentalism, postcolonial critique, and modern Zen. Alpert considers an unusually wide range of thinkers, including Kant, Hegel, Fanon, Emerson, Du Bois, Senghor, and Suzuki. This book not only breaks with disciplinary conventions about period and geography but also argues that these conventions obscure our ability to understand the modern condition. Avram Alpert is Lecturer in the Writing Program at Princeton University.

Analyses of Ranciere's philosophy and its potential for understanding the conversation between contemporary politics and art cinema

Transnational Aging and Reconfigurations of Kin Work documents the social and material contributions of older persons to their families in settings shaped by migration, their everyday lives in domestic and community spaces, and in the context of intergenerational relationships and diasporas. Much of this work is oriented toward supporting, connecting, and maintaining kin members and kin relationships—the work that enables a family to reproduce and regenerate itself across generations and across the globe.

The 24 entries in this book provide extensive coverage of some of the most notable figures in African American literature, such as Alice Walker, Richard Wright, and Zora Neale Hurston. • 24 alphabetically arranged entries offer substantial yet accessible information • Entries cover authors and cultural topics • Sidebars provide snapshots of interesting and significant subject matter

Analyzing Social Media Networks with NodeXL offers backgrounds in information studies, computer science, and sociology. This book is divided into three parts: analyzing social media, NodeXL tutorial, and social-media network analysis case studies. Part I provides background in the history and concepts of social media and social networks. Also included here is social network analysis, which flows from measuring, to mapping, and modeling collections of connections. The next part focuses on the detailed operation of the free and open-source NodeXL extension of Microsoft Excel, which is used in all exercises throughout this book. In the final part, each chapter presents one form of social media, such as e-mail, Twitter, Facebook, Flickr, and Youtube. In addition, there are descriptions of each system, the

nature of networks when people interact, and types of analysis for identifying people, documents, groups, and events. Walks you through NodeXL, while explaining the theory and development behind each step, providing takeaways that can apply to any SNA Demonstrates how visual analytics research can be applied to SNA tools for the mass market Includes case studies from researchers who use NodeXL on popular networks like email, Facebook, Twitter, and wikis Download companion materials and resources at <https://nodexl.codeplex.com/documentation>

Sustainability is the integrating theme of this current and thought-provoking book. LIVING IN THE ENVIRONMENT provides the basic scientific tools for understanding and thinking critically about the environment. Co-authors G. Tyler Miller and Scott Spoolman inspire students to take a positive approach toward finding and implementing useful environmental solutions in their own lives and in their careers. Updated with the most up-to-date information, art, and Good News examples, the text engages and motivates students with vivid case studies and hands-on quantitative exercises. The concept-centered approach transforms complex environmental topics and issues into key concepts that students will understand and remember. Overall, by framing the concepts with goals for more sustainable lifestyles and human communities, students see how promising the future can be. Volume 1 of this undergraduate history textbook covers the origin of hominids through to the Middle Ages.

When we read, study, and gather around God's Word, special things happen. We begin opening up, caring for each other, and helping each other grow. We discover a new power in our lives and find new strength for living as the Holy Spirit shapes us into a beautiful example of community. The CSB Life Connections Study Bible is a revised and updated version of the best-selling and renowned Serendipity Study Bible. The original Serendipity Study Bible was the culmination of 40 years of community building by Serendipity House Publishers, which revolutionized small groups and personal study through thousands of accessible questions and study helps throughout the Bible. The CSB Life Connections Study Bible includes thousands of questions and study helps for all 1,189 chapters of the Bible—all updated for today's readers. This Bible includes short chapter-by-chapter comments about key people, places, and events along with guidance through the "Open-Consider-Apply" method for small group study and personal reflection. • "Open" questions initiate discussion and/or reflection • "Consider" questions focus on the details of the passage • "Apply" questions encourage application to daily life • Also included are select "For Groups," "For Worship," and "Dig Deeper" questions for further study, reflection, discussion, and application. Additional features include: Study note commentary on every page to accompany the thousands of chapter specific margin questions, 60 "life focused" course study plans, 16 topical course study plans, two-color interior design, Smyth-sewn binding, presentation page, single-column text, topical subheadings, black-letter text, 9-point type, textual footnotes, concordance, and full-color maps. The CSB Life Connections Study Bible features the highly reliable, highly readable text of the Christian Standard Bible® (CSB), which stays faithful to the Bible's original languages without sacrificing clarity. With its optimal blend of accuracy and readability, the CSB is ideal for the church—for reading, for teaching, for sharing with others.

A much-needed and delightful book. It shows how history can be taught with the meaningful experiences of each child at its centre, making connections between the child, the locality and community, the national and global past and concepts of time. Throughout the authors empower teachers to adopt their philosophy, by showing them how to plan, select resources and strategies and reflect on ideas and case studies. Hilary Cooper, Emeritus professor of history and pedagogy, The University of Cumbria, UK. Bringing History Alive through Local People and Places puts the local environment and community at the heart of history, showing how it can be used as the context for successful history teaching across the primary age range. It considers how to develop children's concepts and skills through local history, how to link local, national and global aspects of history, and helps you develop your own historical knowledge, understanding and confidence in teaching the subject. Practical topics explored include: Investigating children's cultural and geographical roots through fieldwork Finding and visiting local museums, archives and heritage sights Choosing and using resources Using significant people, events and buildings to link with national history Environmental education and sustainable development through local history Understanding the links between history and everyday life Planning and assessing history. Based on the latest research and practice in the field, Bringing History Alive through Local People and Places offers an exciting template of creative ideas and activities to show teachers how they can make history relevant to all children.

The American Educational History Journal is a peer-reviewed, national research journal devoted to the examination of educational topics using perspectives from a variety of disciplines. The editors of AEHJ encourage communication between scholars from numerous disciplines, nationalities, institutions, and backgrounds. Authors come from a variety of disciplines including political science, curriculum, history, philosophy, teacher education, and educational leadership. Acceptance for publication in AEHJ requires that each author present a well-articulated argument that deals substantively with questions of educational history.

Exploring history in global framework, Lockard's SOCIETIES, NETWORKS, AND TRANSITIONS: A GLOBAL HISTORY, Fourth Edition, combines the accessibility and cultural richness of a regional approach with the rigor of comparative scholarship. Emphasizing culture, social change, gender issues, economic patterns, science and religion, it helps you unravel the connections, encounters, cooperation and conflicts of world and regional history. The author includes profiles of individuals from various walks of life as well as highlights social life and cultural artifacts such as music, literature and art. Extensively revised, the text incorporates recent scholarship throughout, examines various debates among historians and explains how historians use original documents. Insightful questions help you reflect on the historical significance of text material -- and how it relates to you. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This book addresses one of the UK's most persistent and serious concerns: knife crime. While research diagnosing the cause of rising knife crime abounds, few studies articulate effective solutions to this complex social problem. Drawing on data from cities across the UK, Sue

Roberts suggests concrete forms of collaboration that may just spare future generations from the worst of this terrifying scourge. "Solutions to knife crime: a path through the red sea?" will fascinate law-enforcers, policy-makers, criminologists and other specialists both within and outside academia. It will also appeal to anyone who's been affected, or is simply concerned, by this blight on British society.

CSB Life Connections Study Bible B&H Publishing Group

Five Questions attempts to answer some of life's most basic and profound philosophic questions utilizing a holistic approach. The book offers the perspective that while individuals have attempted to answer these questions from a religious, philosophic, cultural or scientific perspective; the only hope at a more complete answer would arise from an integration of ideas from each of these areas. The five key questions are: Where did we come from? Does God exist and what is His nature? Does man have a soul which transcends death? Why do pain suffering and evil exist? What is the meaning of life?

Previously published as Ancient Science, Secret History contains 150 pages of new material. The Secret History of The World and How To Get Out Alive is the definitive book of the real answers where Truth is more fantastic than fiction. Laura Knight-Jadczyk, wife of internationally known theoretical physicist, Arkadiusz Jadczyk, an expert in hyperdimensional physics, draws on science and mysticism to pierce the veil of reality. With sparkling humour and wisdom, she picks up where Fulcanelli left off, sharing over thirty years of research to reveal, for the first time, The Great Work and the esoteric Science of the Ancients in terms accessible to scholar and layperson alike. Conspiracies have existed since the time of Cain and Abel. Facts of history have been altered to support the illusion. The question today is whether a sufficient number of people will see through the deceptions, thus creating a counter-force for positive change - the gold of humanity - during the upcoming times of Macro-Cosmic Quantum Shift. Laura argues convincingly, based on the revelations of the deepest of esoteric secrets, that the present is a time of potential transition, an extraordinary opportunity for individual and collective renewal: a quantum shift of awareness and perception which could see the birth of true creativity in the fields of science, art and spirituality. The Secret History of the World allows us to redefine our interpretation of the universe, history, and culture and to thereby navigate a path through this darkness. In this way, Laura Knight-Jadczyk shows us how we may extend the possibilities for all our different futures in literal terms. With over 800 pages of fascinating reading, The Secret History of The World and How to Get Out Alive is rapidly being acknowledged as a classic with profound implications for the destiny of the human race. With painstakingly researched facts and figures, the author overturns long-held conventional ideas on religion, philosophy, Grail legends, science, and alchemy, presenting a cohesive narrative pointing to the existence of an ancient techno-spirituality of the Golden Age which included a mastery of space and time: the Holy Grail, the Philosopher's Stone, the True Process of Ascension. Laura provides the evidence for the advanced level of scientific and metaphysical wisdom possessed by the greatest of lost ancient civilizations - a culture so advanced that none of the trappings of civilization as we know it were needed, explaining why there is no 'evidence' of civilization as we know it left to testify to its existence. The author's consummate synthesis reveals the Message in a Bottle reserved for humanity, including the Cosmology and Mysticism of mankind Before the Fall when, as the ancient texts tell us, man walked and talked with the gods. Laura shows us that the upcoming shift is that point in the vast cosmological cycle when mankind - or at least a portion of mankind - has the opportunity to regain his standing as The Child of the King in the Golden Age. If ever there was a book that can answer the questions of those who are seeking Truth in the spiritual wilderness of this world, then surely The Secret History of the World and How to Get Out Alive is it.

The first textbook to present world history via social history, drawing on social science methods and research. This interdisciplinary, comprehensive and comparative textbook is authored by distinguished scholars and experienced teachers, and offers expert scholarship on global history that is ideal for undergraduate students. Volume 1 takes us from the origin of hominids to ancient civilizations, the rise of empires, and the Middle Ages. The book pays particular attention to the ways in which ordinary people lived through the great changes of their times, and how everyday experience connects to great political events and the commercial exchanges of an interconnected world. With 65 maps, 45 illustrations, timelines, boxes, and primary source extracts, the book moves students easily from particular historical incidents to broader perspectives, enabling them to use historical material and social science methodologies to analyze the events of the past, present and future.

This volume is devoted to aspects of space that have thus far been largely unexplored. How space is perceived and cognised has been discussed from different stances, but there are few analyses of nomadic approaches to spatiality. Nor is there a sufficient number of studies on indigenous interpretations of space, despite the importance of territory and place in definitions of indigeneity. At the intersection of geography and anthropology, the authors of this volume combine general reflections on spatiality with case studies from the Circumpolar North and other nomadic settings. Spatial perceptions and practices have been profoundly transformed by new technologies as well as by new modes of social and political interaction. How do these changes play out in the everyday lives, identifications and political projects of nomadic and indigenous people? This question has been broached from two seemingly divergent stances: spatial cognition, on the one hand, and production of space, on the other. Bringing these two approaches together, this volume re-aligns the different strings of scholarship on spatiality, making them applicable and relevant for indigenous and nomadic conceptualizations of space, place and territory.

How are we to live with the wide varieties of sexuality and gender found across the rapidly changing global order? Whilst some countries have legislated in favour of same-sex marriage and the United Nations makes declarations about gender and sexual equality, many countries across the world employ punitive responses to such differences. In this compelling and original study, Ken Plummer argues the need for a practical utopian project of hope that he calls 'cosmopolitan sexualities'. He asks: how can we connect our differences with collective values, our uniqueness with multiple group belonging, our sexual and gendered individualities with a broader common humanity? Showing how a foundation for this new ethics, politics and imagination are evolving across the world, he discusses the many possible pitfalls being encountered. He highlights the complexity of sexual and gender cultures, the ubiquity of human conflict, the difficulties of dialogue and the problems with finding any common ground for our humanity. *Cosmopolitan Sexualities* takes a bold critical humanist view and argues the need for positive norms to guide us into the future. Highlighting the vulnerability of the human being, Plummer goes in search of historically grounded and potentially global human values like empathy and sympathy, care and kindness, dignity and rights, human flourishing and social justice. These harbour visions of what is acceptable and unacceptable in the sexual and intimate life. Clearly written, the book speaks to important issues of our time and will interest all those who are struggling to finding ways to live together well in spite of our different genders and sexualities.

Who are the key thinkers in education? What are the hot topics in education? Where will education go from here? The Routledge Companion to Education presents the most comprehensive, up-to-date guide available to the key theories, themes and topics in education. Forty specially commissioned chapters, covering all aspects of education, introduce you to the ideas, research and issues that have shaped this most diverse, dynamic and fluid field. Part one provides an introduction to the key theories, thinkers and disciplines within education Part two covers ideas and issues about how, what and why learning takes place Part three includes analysis on particular approaches to education and explores the issues that attract much contemporary interest. Written by an international team of expert contributors, the chapters all include a descriptive introduction, an analysis of the key ideas and debates, an overview of the latest research, key questions for research and carefully selected further reading. The Routledge Companion to Education is a succinct, detailed, authoritative overview of the topics which are at the forefront of educational research and discourse today. This classic collection is a bookshelf essential for every student and scholar serious about the study

of education.

The first textbook to present world history via social history, drawing on social science methods and research. This interdisciplinary, comprehensive, and comparative textbook is authored by distinguished scholars and experienced teachers, and offers expert scholarship on global history that is ideal for undergraduate students. Volume 2 takes us from the early modern period to speculation about the world in 2050, visiting diverse civilizations, nation-states, ecologies, and people along the journey through time and place. The book pays particular attention to the ways in which ordinary people lived through the great changes of their times, and how everyday experience connects to great political events and the commercial exchanges of an interconnected world. With 75 maps, 65 illustrations, timelines, boxes, and primary source extracts, the book enables students to use historical material and social science methodologies to analyze the events of the past, present, and future.

SOCIETIES, NETWORKS, AND TRANSITIONS connects the different regions of the world within and across chapters, and explores broader global themes in part-opening essays. This innovative structure combines the accessibility of a regional approach with the rigor of comparative scholarship to show students world history in a truly global framework. The “tree, tree, tree, forest” organization assures that students stay engaged and in tune with when and where they are in their study of world history. The text also features a strong focus on culture and religion. Author and veteran teacher Craig Lockard engages students with a unique approach to cultural artifacts, such as music and art. Pedagogical features—including chapter outlines with focus questions, section summaries, pronunciation guides, and marginal key term definitions—support students and instructors as they explore the interconnectedness of different people, places, and periods in the global past. The Third Edition has been extensively revised to sharpen the narrative and incorporate recent scholarship. Available in the following split options: SOCIETIES, NETWORKS, AND TRANSITIONS, Third Edition (Chapters 1-31), ISBN: 9781285783123; Volume I: To 1500 (Chapters 1-14), ISBN 9781285783086; Volume II: Since 1450 (Chapters 15-31), ISBN 9781285733852. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Throughout the Middle Ages and early modern Europe theological uniformity was synonymous with social cohesion in societies that regarded themselves as bound together at their most fundamental levels by a religion. To maintain a belief in opposition to the orthodoxy was to set oneself in opposition not merely to church and state but to a whole culture in all of its manifestations. From the eleventh century to the fifteenth, however, dissenting movements appeared with greater frequency, attracted more followers, acquired philosophical as well as theological dimensions, and occupied more and more the time and the minds of religious and civil authorities. In the perception of dissent and in the steps taken to deal with it lies the history of medieval heresy and the force it exerted on religious, social, and political communities long after the Middle Ages. In this volume, Edward Peters makes available the most compact and wide-ranging collection of source materials in translation on medieval orthodoxy and heterodoxy in social context.

Winner of the Bancroft Prize The world of the California Gold Rush that comes down to us through fiction and film is one of half-truths. In this brilliant work of social history, Susan Lee Johnson enters the well-worked diggings of Gold Rush history and strikes a rich lode. Johnson explores the dynamic social world created by the Gold Rush in the Sierra Nevada foothills east of Stockton, charting the surprising ways in which the conventions of identity—ethnic, national, and sexual—were reshaped. With a keen eye for character and story, she shows us how this peculiar world evolved over time, and how our cultural memory of the Gold Rush took root.

The latest edition of Pamela Farris’s popular, value-priced text continues to offer pre- and in-service teachers creative strategies and proven techniques sensitive to the needs of all elementary and middle school learners. Coverage includes the C3 Framework and the four sets of learning from the National Curriculum Standards for Social Studies. Farris, together with contributors who specialize in implementing successful teaching methods and theories, demonstrate how classroom teachers can excite and inspire their students to be engaged learners.

This book follows environmental changes—including those caused by human actions, as well as those resulting from natural circumstances—and provides a process to manage their impact on the future. * Contributors from across disciplines, including geology, biology, hydrology and climatology * A list of reasons why environmental change is inevitable * An exploration of psychological disorders and physical illnesses triggered by disasters

Bringing together scholars from around the world, this first book in the Palgrave Macmillan Transnational History Series raises the question of how we can get away from the contemporary language of globalization, so as to identify meaningful, global ways of defining historical events and processes in the late Nineteenth and Twentieth centuries.

Textbooks in history, geography and the social sciences provide important insights into the ways in which nation-states project themselves. Based on case studies of France, Germany, the Netherlands, Spain, Greece, Turkey Bulgaria, Russia, and the United States, this volume shows the role that concepts of space and time play in the narration of ‘our country’ and the wider world in which it is located. It explores ways in which in western European countries the nation is reinterpreted through European lenses to replace national approaches in the writing of history. On the other hand, in an effort to overcome Eurocentric views, ‘world history’ has gained prominence in the United States. Yet again, East European countries, coming recently out of a transnational political union, have their own issues with the concept of nation to contend with. These recent developments in the field of textbooks and curricula open up new and fascinating perspectives on the changing patterns of the re-positioning process of nation-states in West as well as Eastern Europe and the United States in an age of growing importance of transnational organizations and globalization.

Addressed to K-12 teachers, discusses enhancing student achievement through project-based learning with multimedia and offers principles and guidelines to insure that multimedia projects address curriculum standards.

‘Think globally, act locally’ has become a call to environmentalist mobilization, proposing a closer connection between global concerns, local issues and individual responsibility. A History of Environmentalism explores this dialectic relationship, with ten contributors from a range of disciplines providing a history of environmentalism which frames global themes and narrates local stories. Each of the chapters in this volume addresses specific struggles in the history of environmental movements, for example over national parks, species protection, forests, waste, contamination, nuclear energy and expropriation. A diverse range of environments and environmental actors are covered, including the

communities in the Amazonian Forest, the antelope in Tibet, atomic power plants in Europe and oil and politics in the Niger Delta. The chapters demonstrate how these conflicts make visible the intricate connections between local and global, the body and the environment, and power and nature. A History of Environmentalism tells us much about transformations of cultural perceptions and ways of production and consuming, as well as ecological and social changes. More than offering an exhaustive picture of the entire environmentalist movement, A History of Environmentalism highlights the importance of the experience of environmentalism within local communities. It offers a worldwide and polyphonic perspective, making it key reading for students and scholars of global and environmental history and political ecology.

Over the past decade there has been radical reform at all levels of China's education system as it attempts to meet changing economic and social needs and aspirations. Changes have been made to pedagogy and teacher professional learning and also to the curriculum - both at the basic education level, from kindergarten to year 12, and at the higher education level. This book focuses on reform at the early childhood, primary and secondary levels, and is the companion book to China's Higher Education Reform and Internationalisation, which covers reform at the higher education level. Education Reform in China outlines the systematic transformation that has occurred of school curriculum goals, structure and content, teaching and learning approaches, and assessment and administrative structures, including the increasing devolvement of control from the centre to provincial, district and school levels. As well as illustrating the changes that are occurring within classrooms, it demonstrates the continuity of cultural and educational ideas and values in the midst of these changes, showing that reform does not just involve the adoption of foreign ideas, but builds on and even resurrects traditional Chinese educational values. Importantly, it considers how exchanges of people and ideas can contribute to new ways of working between Western and Chinese educational systems.

This fully revised and updated second edition of Migration in World History traces the connections among regions brought about by the movement of people, diseases, crops, technology and ideas. Drawing on examples from a wide range of geographical regions and thematic areas, noted world historian Patrick Manning guides the reader through: the earliest human migrations, including the earliest hominids, their development and spread, and the controversy surrounding the rise of homo sapiens the rise and spread of major language groups (illustrated with original maps) an examination of civilizations, farmers and pastoralists from 3000 BCE to 500 CE trade patterns including the early Silk Road and maritime trade in the Mediterranean and Indian Ocean the effect of migration on empire and industry between 1700 and 1900 the resurgence of migration in the later twentieth century, including movement to cities, refugees and diasporas the various leading theories and debates surrounding the subject of migration.

Offers activities to students that describe the major themes in world history between 1000 and 1500 C.E., including the increased trade and travel between the countries of Asia, Europe, and Africa.
