How is legislation crafted? How do you lose an election? What do “bundler,” “quorum call” and “omnibus” mean? Why do some of the White House’s most important meetings occur at a Starbucks? Why are Washington insiders obsessed with something called Jumbo Slice? What, exactly, is a “skintern?” Eliot Nelson, one of Washington’s funniest and most admired young journalists, knows how the sausage factory works and his new book, *The Beltway Bible*, is every citizen’s must-have owner’s manual. Arranged from A to Z, *The Beltway Bible* provides an insider’s perspective of politics and government, breaking down both into easily-digested entries on subjects like how legislation is formed, the scope of the president’s power and an overview of federal agencies. Nelson also looks at D.C.’s less-well-known power structures: the internal pecking order of White House aides, the high school cafeteria power struggles behind party invites and the petty congressional arguments over how highway on-ramps are named. *The Beltway Bible* makes our complex government accessible in a way that will please everyone from Jon Stewart to John Doe. Eliot Nelson’s *The Beltway Bible* is tailor-made for Election 2016.

How to accommodate contemporary life in a historic house. This book does not repeat basic information that is readily available in many standard DIY books about carpentry, wiring, and plumbing. Rather, it shows how to adapt those DIY skills to the specialized needs of a historic house. Although there are other books about renovating old houses, this is the first that prioritizes the identification and preservation of the historic, character-defining features of a house as a starting point in the process. That is the purpose of this book: to describe and illustrate a best-practices approach for updating historic homes for modern life in ways that do not attempt to turn an old house into a new one. The book also suggests many ways to save money in the process, without settling for cheap or inappropriate solutions. Scott Hanson is a historic-building preservation professional and has 40 years’ experience rehabilitating historic houses. He has illustrated this authoritative book with hundreds of step-by-step photos, illustrations, charts, and decision-making guides. Interspersed throughout are photo essays of 13 restored historic houses representing a range of periods and architectural styles: Italianate, Victorian, Queen Anne, Federal, Colonial, Colonial Revival, Greek Revival, Ranch, Adobe, Craftsman, Shingle, and Rustic. With interior and exterior photography by David Clough, these multi-page features show what can be achieved when a historic home is renovated with a desire to preserve or restore as much historic character as possible. Innovation is increasingly recognized as a vitally important social and economic phenomenon worthy of serious research study. Firms are concerned about their innovation ability, particularly relative to their competitors. Politicians care about innovation, too, because of its presumed social and economic impact. However, to recognize that innovation is desirable is not sufficient. What is required is systematic and reliable knowledge about how best to influence innovation and to exploit its effects to the full. Gaining such knowledge is the aim of the field of innovation studies, which is now at least half a century old. Hence, it is an opportune time to ask what has been achieved and what we still need to know more about. This is what this book sets out to explore. Written by a number of central contributors to the field, it critically examines the current state of the art and identifies issues that merit greater attention. The focus is mainly on how society can derive the greatest benefit from innovation and what needs to be done to achieve this. However, to learn more about how society can benefit more from innovation, one also needs to understand innovation processes in firms and how these interact with broader social, institutional and political factors. Such issues are therefore also central to the discussion here.
