This book considers the identity, direction, and intentions embodied in post-apartheid South African Foreign Policy. It aims to deepen the understanding of this evolving post-apartheid foreign policy through an exploration of the nature and trajectory of key bilateral relationships from both the global 'South' (Brazil, China, Iran, the AU) and 'North' (Japan and the UK). This window on the country's international relations enriches understanding of the normative and structural factors that influence not only South African foreign policy, but those of what Jordaan (2003) calls emerging middle powers as they seek to position themselves as influential actors in international affairs. By sketching the contours of key South African relationships the contributors offer illuminating insights into the cross-pressures shaping South African foreign policy. In addition, they also add depth to the emerging middle power concept by exploring four areas where the tendencies and tensions of emerging middle power foreign policies are apparent: regionalism, multilateralism, reform of global governance, and approach to moral leadership. This book was previously published as a special issue of Commonwealth and Comparative Politics.

Almost every day sees new reports of information systems that have been hacked, broken into, compromised, and sometimes even destroyed. The prevalence of such stories reveals an overwhelming weakness in the security of the systems we increasingly rely on for everything: shopping, banking, health services, education, and even voting. That these problems persist even as the world rushes headlong into the Internet-of-Things and cloud based everything underscores the importance of understanding the current and potential aspects of information warfare, also known as cyberwarfare. Having passed through into the third generation of information warfare, we now must consider what the fourth generation might look like. Where we are now is not unlike trench warfare, only in cyberspace. Where we go next will emerge in an international landscape that is considering the implications of current capabilities on notions of just warfare, sovereignty, and individual freedoms. The papers in this book have been selected to provide the reader with a broad appreciation for the challenges that accompany the evolution of the use of information, information technologies, and connectedness in all things. The papers are important contributions, representing 8 different countries or regions, that create a truly global thought presentation.

Recent financial crises and instances of corporate malpractice have prompted many questions about how companies are run - and whether this tallies with how they should be run. This book systematically explores the factors that shape corporate governance, and discusses both those governance practices implemented by companies and those imposed by regulators. It also tries to determine how good corporate governance can help companies to create value for their shareholders. To illustrate that some practices are global while others are appropriate only in certain settings, case studies of individual companies from Europe, Asia, North and South America are discussed in each chapter. Corporate Governance: Theory and Practice is firmly grounded in academic literature and packed with empirical evidence from around the world, making it an ideal book for students of business, management, finance, accounting and law taking a one-term course in the subject. It offers considerable lecturer and student support, both in the text itself and on the accompanying website: www.palgrave.com/finance/padgett

As attention moves rapidly towards comparative approaches, the research and teaching of company law has somehow lagged behind. The overall purpose of this book is therefore to fill a gap in the literature by identifying whether conceptual differences between countries exist. Rather than concentrate on whether the institutional structure of the corporation varies across jurisdictions, the objective of this book will be pursued by focusing on specific cases and how different countries might treat each of these cases. The book also has a public policy dimension, because the existence or absence of differences may lead to the question of whether formal harmonisation of company law is necessary. The book covers 10 legal systems. With respect to countries of the European Union, it focuses on the most populous countries (Germany, France, the UK, Spain, Italy and Poland) as well as two smaller Member States (Finland and Latvia). In addition, the laws of two of the world's largest economies (the US and Japan) are included for the purposes of wider comparison. All of these jurisdictions are subjected to scrutiny by deploying a comparative case-based study. On the basis of these case solutions, various conclusions are reached, some of which challenge established orthodoxies in the field of comparative company law.

It also features discussion of the 2020 Coronavirus Act, with its implications for state power, and ahead of the forthcoming new SQE qualification, revised multiple choice questions on the Companion Website. Ideal for students studying constitutional and administrative law for the first time, this is an indispensable guide to the challenging concepts and legal rules in public law.

The communal idea is investigated theoretically and through contemporary experiences on the verge of the 21st century. This idea draws its vitality from potent civilizational codes, and while its realizations come up unavoidably to self-betrayal, its renewal from ashes is not less unavoidable.

Corporate governance around the world continues to develop rapidly and this new edition has been extensively rewritten to reflect these changes. The global financial crisis has led to a whole host of changes in corporate governance requirements, which are analysed by Bob Tricker.

Bringing creativity and innovation into all professions and types of auditing today, this book meets the needs of auditing practices in the future. Recent criticisms of auditing practices by financial regulators, the traditional 'expectation gaps' between auditors and auditees and the continuing advances in technology make it even more important today to motivate creativity and innovation in the professions of auditors, be they internal, external, quality, environmental, social, clinical and so on. In Creative and Innovative Auditing, Jeffrey Ridley studies all auditing practices, not just internal auditing, using an innovation model he has developed through research which is applicable to all auditing organisations and professions. He shows how motivating innovation in auditing practices will address the needs of today and tomorrow's auditing of governance, risk management and control.
