Emphasizing a hands-on approach to tax education, every concept introduced in Fundamentals of Taxation includes meaningful exercises that allow students to reinforce what they are learning. This book is designed to not only expose beginning tax students to tax law, but to also teach the practical intricacies involved in the preparation of a tax return. To train tomorrow's tax preparers to handle the complex U.S. tax law, Fundamentals of Taxation's author team has devised four primary teaching advantages: 1.) The text is organized closely to follow the IRS tax forms. The authors introduce students to standard IRS forms early and reinforce their use throughout the text. Actual tax forms are incorporated throughout the text, giving students the opportunity to understand the principles behind tax law while they learn how to work with clients to obtain the information they will need to complete tax forms. 2.) Proper reporting of tax issues are illustrated. The authors present a tax issue, discuss the legal requirements, illustrate the proper tax form placement, and show the completed form in the text. By effectively leading the student through each issue, the authors demonstrate how tax form preparation is the result of a careful process that balances legal knowledge with practical experience. 3.) Integration of an individual income tax software package (TaxACT). The authors instruct students how to use the software to complete returns using sample "taxpayers" who appear from chapter to chapter. 4.) The authors supplement the text with citations of relevant tax authorities such as the Internal Revenue Code, Treasury Regulations, Revenue Rulings, Revenue Procedures, and court cases. These citations are almost always provided in footnotes. Thus, you and your students can easily use, or not use, the footnote material. Parties to cross-border disputes arising anywhere in the vast Portuguese-speaking world – a community of more than 230 million in a space that offers a wide array of investment opportunities across four continents – increasingly seek Portugal as their preferred seat of arbitration. A signatory to all relevant international conventions, Portugal has proven to be an 'arbitration-friendly' jurisdiction. This volume is the first and so far only book in English that provides a thorough, in-depth analysis of international arbitration law and practice in Portugal. Its contributing authors are among the most highly regarded legal names in the country, including scholars, arbitrators, and practitioners. The authors describe how international arbitration proceedings are conducted in Portugal, what cautions should be taken, and what procedural strategies may be suitable in particular cases. They provide insightful answers to questions such as the following: What matters can be submitted to arbitration under Portuguese law? What are the validity requirements for an arbitration agreement? How do the State courts interact with arbitration proceedings and what is the attitude of such courts toward international arbitration? What are the rules governing evidentiary matters in arbitration? How is an arbitration tribunal constituted? How are arbitrators appointed? How may they be challenged? How can an international arbitral award be recognized and enforced? How does the Portuguese legal system address the issue of damages and what specific damages are admitted? How are the costs of arbitration proceedings estimated and allocated? The book includes analyses of arbitration related to specific fields of the law, notably sports, administrative, tax, intellectual property rights (especially regarding reference and generic medicines), and corporate disputes. Each chapter provides, for the topics it addresses, an examination of the applicable laws, rules, arbitration practice, and views taken by arbitral tribunals and state courts as well as those of the most highly considered scholars. As a detailed examination of the legal framework and of all procedural steps of an arbitration in Portugal, from the drafting of an arbitration agreement to the enforcement of an award, this book constitutes an invaluable resource for parties involved in or considering an international arbitration in this country. The guidance that it seeks to provide in respect of any problem likely to arise in this context can be useful to arbitrators, judges, academics, and interested lawyers.

This volume presents a new approach to today's tax controversies, reflecting that debates about taxation often turn on the differing worldviews of the debate participants. For instance, a central tension in academic tax literature - which is filtering into everyday discussions of tax law - exists between 'mainstream' and 'critical' tax theorists. This tension results from a clash of perspectives: Is taxation primarily a matter of social science or of social justice? Should tax policy debates be grounded in economics or in critical race, feminist, queer, and other outsider perspectives? To capture and interrogate what often seems like a chasm between the different sides of tax debates, this collection comprises a series of pairs of essays. Each pair approaches a single area of controversy from two different perspectives - with one essay usually taking a 'mainstream' perspective and the other a 'critical' perspective. In writing their contributions, the authors read and incorporated reactions to each other's essays and paid specific attention to the influence of perspective on both the area of controversy and their contribution to the debate. With contributions from leading mainstream and critical tax scholars, this volume takes the first step toward bridging the gap between these differing perspectives on tax law and policy.

Capturing the core challenges faced by the international tax regime, this timely Research Handbook assesses the impacts of these challenges on a range of stakeholders, evaluating various paths to reform at a time when international tax policy is a topic high on politicians' agendas.

Recent developments in direct taxes and VAT/GST Taxes – in general – have become the topic of broad legal and policy discussions. VAT and GST are often said to be the fiscal success story of the 20th century, as almost all developed countries levy VAT or GST or similar all-encompassing broad-based consumption taxes. Global trends in direct taxes are visible at the level of international players, such as the OECD. Due to the OECD's BEPS project, national tax systems are being significantly modified. This book aims at identifying and discussing the current global trends in both VAT/GST and direct taxes. In daily practice, VAT/GST and direct taxes should be regarded simultaneously. Therefore, the Master's theses contained in this book deal with and highlight numerous issues, challenges and opportunities found in both direct taxes and in the VAT/GST area, ranging from nexus in direct taxes and VAT/GST, recent developments in certain policy areas, the definition of taxable persons, tax abuse, non-discrimination rules, charities, transfer pricing, European State aid, immovable property, share deals etc. While the construction of VAT/GST and direct taxes differs, both taxes have similarities. The

contributions in this book make a legal comparison of the recent developments in direct taxes and VAT/GST in the relevant fields, provide an analysis of the similarities and differences of the two taxation systems and highlight global trends in taxation.

The topics of double non-taxation and hybrid entities have acquired a particular importance in a context where transformations within the tax world seem to be leading to an international commitment most materially manifested in the OECD Base Erosion and Profit Shifting (BEPS) project. In what is the first systematic in-depth critique of the BEPS Action Plan 2 with regard to hybrid entities, this timely book provides a critical review of the OECD's approach and proposes a deeply informed alternative method based on the tax policy aims of simplicity, coherence and ease of administration. The author analyses the interaction between the double non-taxation outcome and the use of hybrid entities in an approach not strictly linked to any specific tax jurisdiction. To this end, the analysis includes case studies and examples from a range of jurisdictions emphasizing the international tax context, including the application of tax treaties. Among the seminal matters covered are the following: – foundations of the concepts of double non-taxation and hybrid entities, absent of the specific limitations of domestic tax legislation; – extensive analysis based on the rules of characterization of foreign entities for tax purposes in the United States, Spain, Denmark and Germany, as well as on the Poland/United States and Canada/United States tax treaties; – detailed analysis on the implications of Article 1(2) OECD Model Tax Convention and Article 3(1) Multilateral Instrument, especially having in mind the position of developing (source) countries; and – EU tax law as part of the international context, including an extensive analysis on the EU Anti-Tax Avoidance Directive (ATAD) I and ATAD II. Detailed comparisons between the author's proposal and other existing rules elucidate common points and deviations. If merely for its unparalleled clarification of the issues, this book will prove of immeasurable value to practitioners, tax authorities, policymakers and academics concerned with international tax law. Beyond that, as an authoritative guide that promises to reorient the discussion to what really matters in the debate regarding double non-taxation and hybrid entities, this analysis elaborates solutions applicable to a generality of cases worldwide, and thus

hugely promotes the urgent quest for alternative solutions.

The report Tackling Corporate Tax Avoidance In A Global Economy: Is A New Approach Needed? (HL 48) examines the problem of the avoidance of corporation tax by multinational companies. The UK faces a serious problem of avoidance of corporation tax, due in part to the complexity of the tax regime in the UK, but mainly because the international tax system gives multinational companies opportunities to shift profits between countries in ways that reduce their liabilities in the UK. This damages the economy and undermines trust in the tax system. The Committee supports the case for fundamental reform of the international corporate tax framework being pursued in the OECD, but it not clear that the reforms will be effective or whether they can be achieved within the proposed two year timescale.
