

## Instant Notes In Biochemistry

Instant Notes in Psychology contains the fundamental topics that are essential to the student. Each topic begins with a Key Notes panel containing concise summaries of the key points covered, which are expanded in the main text of the topic. Although each topic stands alone, it is the nature of the psychology that topics are interrelated. To help the student see these interrelationships the text provides numerous cross-references between topics.

Never HIGHLIGHT a Book Again! Virtually all of the testable terms, concepts, persons, places, and events from the textbook are included. Cram101 Just the FACTS101 studyguides give all of the outlines, highlights, notes, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Accompanys: 9780415367783 .

Instant Notes in Physical Chemistry introduces the various aspects of physical chemistry in an order that gives the opportunity for continuous reading from front to back. The background to a range of important techniques is incorporated to reflect the wide application of the subject matter. This book provides the key to the understanding and learning of physical chemistry.

Instant Notes in Sport and Exercise Physiology looks at the key topics in exercise physiology and examines how each of the physiological systems responds to acute and chronic exercise. As well as reviewing special topics such as nutrition, altitude, temperature, and ergogenic acids, it assesses the importance of exercise to health and quality of life and considers the importance of exercise to adults, children and the elderly.

Instant Notes in Biochemistry, 2/e provides an easy access to the fundamentals in this field. The book is a major update on the very successful first edition with expanded coverage of transcription, RNA processing and protein synthesis and many additional new topics. New illustrations have been added and much of the artwork has been enlarged or redrawn to aid comprehension.

Instant Notes in Molecular Biology, Fourth Edition is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts?an ideal revision checklist?followed by a description of the subject that focuses on core information, with clear, simple diagrams that are easy for students to understand and recall in essays and exams.

Never HIGHLIGHT a Book Again Includes all testable terms, concepts, persons, places, and events. Cram101 Just the FACTS101 studyguides gives all of the outlines, highlights, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Accompanies: 9780872893795. This item is printed on demand.

Instant Notes in Organic Chemistry Second Edition condenses the essentials of organic chemistry into a manageable text. It concentrates solely on the basics without going into exhaustive detail or repetitive examples, with the key notes at the start of each topic focusing the mind on the essentials. The first six sections cover structure, bonding, functional groups, stereochemistry, and basic reaction and mechanism theory. The rest of the book looks at the reactions and mechanisms of the common functional groups important in chemistry and biochemistry, with an additional section on spectroscopy and analysis.

BIOS Instant Notes in Microbiology, Fourth Edition, is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts-an ideal revision

checklist-followed by a description of the subject that focuses on core information, with clear, simple diagrams that are easy for students to understand and recall in essays and exams. Instant Notes in Motor Control, Learning and Development provides an overview of how the brain and nervous system control movement, and how new movements are learned and improved. The early chapters set the scene by defining the field and discussing the measurement of movement. This leads to chapters that explain how we control movement and learn to control movement. The final section considers the development of motor skills. The topics covered in this text provide foundation knowledge that is vital for any individual who is working in the movement context as a teacher, coach, or therapist. Each chapter can be read in isolation but links are made and related topics highlighted. Due to the wide range of information contained in the book, it will be relevant to students studying all sports-related courses, including sport coaching courses.

Inleiding tot de erfelijkheidsleer.

BIOS Instant Notes in Biochemistry, Fourth Edition, is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts-an ideal revision checklist-followed by a description of the subject that focuses on core information, with clear, simple diagrams that are easy for students to understand and recall in essays and exams. BIOS Instant Notes in Biochemistry, Fourth Edition, is fully up-to-date and covers: Cells Amino acids and proteins Studying proteins Enzymes Membranes and cell signalling DNA structure and replication RNA synthesis and processing Protein synthesis Recombinant DNA technology Carbohydrate metabolism Lipid metabolism Respiration and energy Nitrogen metabolism

A major update of the highly popular second edition, with changes in the content and organisation that reflect advances in the subject. New and expanded topics include cytoskeleton, molecular motors, bioimaging, biomembranes, cell signalling, protein structure, and enzyme regulation. As with the first two editions, the third edition of Instant Notes in Biochemistry provides the essential facts of biochemistry with detailed explanations and clear illustrations.

Instant Notes in Plant Biology covers all aspects of modern plant biology. The scope and depth of this text are suitable for a first and second year undergraduate student of plant biology, including molecular biologists and biotechnologists.

Instant Notes Sport and Exercise Biomechanics provides a comprehensive overview of the key concepts in exercise and sport biomechanics. The kinematics of motion are reviewed in detail, outlining the physics of motion. Mechanical characteristics of motion, the mechanisms of injury, and the analysis of the sport technique provides a source of valuable information.

The second edition of Instant Notes in Neuroscience covers neuroanatomy, cellular and molecular neuroscience, systems neuroscience, behavior, development of the nervous system, learning, memory, and common brain disorders. It gives rapid and easy access to the core of the subject in an affordable and manageable-sized text.

Instant Notes in Analytical Chemistry provides students with a thorough comprehension of analytical chemistry and its

applications. It supports the learning of principles and practice of analytical procedures and also covers the analytical techniques commonly used in laboratories today.

Traditionally, endocrinology textbooks have been either short notes or multi-author, multi-volume monster, all of which present clinical material last and often only briefly. Endocrinology is different and used real cases to lead readers into the text and then describes the biochemistry, physiology, and anatomy they need to understand the case. The

The second edition of Instant Notes in Plant Biology, has been both updated and reorganized and gives an insight into the whole of plant science, integrating structure, function and physiology. A major addition is the section on understanding plants which introduces the major techniques in plant science and shows how advances are made.

Molecular techniques are used in all areas of plant science and are included throughout.

This book is designed to give students rapid and easy access to key ecological material to assist learning and revision. Key topics such as populations and interactions, ecosystems, population genetics, community patterns and many more are structured into manageable sections, each cross-referenced, to allow easy navigation through the information.

Instant Notes in Chemistry for Biologists is a concise book for undergraduates who have a limited background in chemistry. This book covers the main concepts in chemistry, provides simple explanations of chemical terminology, and illustrates underlying principles and phenomena in the life sciences with clear biological examples. Building on the success of the first edition, the second edition has been fully revised and updated and comprises new sections on water as a biological solvent, inorganic molecules and biological macromolecules.

BIOS Instant Notes in Biochemistry, Fourth Edition, is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts-an ideal revision checklist-followed by a description of the subject that focuses on core information, with clear, simple diagrams that are easy for students to understand and recall in essays and exams. BIOS Instant Notes in Biochemistry, Fourth Edition, is fully up-to-date and covers: Cells Amino acids and proteins Studying proteins Enzymes Membranes and cell signalling DNA structure and replication RNA synthesis and processing Protein synthesis Recombinant DNA technology Carbohydrate metabolism Lipid metabolism Respiration and energy Nitrogen metabolism

Instant Notes in Biochemistry, 2/e provides an easy access to the fundamentals in this field. The book is a major update on the very successful first edition with expanded coverage of transcription, RNA processing and protein synthesis and many.

Instant Notes in Medical Microbiology covers medical microbiology from the molecular biology of infectious agents right through to the clinical management of the infected patient, including disease pathogenesis, diagnosis, and the use of antimicrobial therapy. The first section covers how micro-organisms spread and cause disease in humans, and how the human body responds to infection in general. The next three sections give a broad outline of the important properties of human infectious pathogens; split into viruses, bacteria, and eukaryotic organisms. The final sections cover laboratory diagnosis, antimicrobial chemotherapy, prevention strategies, and infection from the point of view of the patient.

The new edition of Instant Notes in Molecular Biology has been revised and updated to include information on micro RNAs, RNA inhibition, functional genomics, proteomics, imaging, stem cells and bioinformatics. Written in an accessible style, the book will be a highly useful tool for studying molecular biology.

Instant Notes in Human Physiology will be valuable to students in whatever context they are studying physiology. It explains fundamental concepts and the major physiological systems, showing how they are integrated, without overloading the reader with information.

Providing researchers and students with easy access to the key facts in a format specially designed for ease of use and rapid revision, this book in the acclaimed "Instant Notes" series covers studying cells and macromolecules, protein structure, nucleic acids composition properties and structures, and gene manipulation, and bacteriophage and viruses, tumor viruses and oncogenes, and applications. 220 illus. Providing researchers and students with easy access to the key facts in a format specially designed for ease of use and rapid revision, this book in the acclaimed "Instant Notes" series covers cells and their structure, amino acids and proteins, enzymes, antibodies, membrane structure and function, DNA structure and replication, and RNA synthesis and processing.

BIOS Instant Notes Chemistry for Biologists, Third Edition, is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts-an ideal revision checklist-followed by a description of the subject that focuses on core information, with clear, simple diagrams that are easy for students to understand and recall in essays and exams. BIOS Instant Notes Chemistry for Biologists, Third Edition, is fully up-to-date and covers: The elements Chemical bonds and molecular shape Water-the biological solvent Carbon, the basis for life on Earth 3D-molecular structure of organic compounds Small inorganic molecules of biological importance Some metals in biology Molecular interactions Common reaction types of carbon based compounds Organic compounds by chemical class Aromatic compounds Chemical synthesis of biological molecules Important biological macromolecules by class Aqueous behaviour Elementary thermodynamics Kinetics Spectroscopy Units and calculations

Instant Notes in Organic Chemistry provides concise yet comprehensive coverage of organic chemistry at an undergraduate level, providing easy access to the core information in the field. The book covers all the important areas of organic chemistry in a format which is ideal for learning and rapid revision.

The second edition of Instant Notes in Bioinformatics introduced the readers to the themes and terminology of bioinformatics. It is divided into three parts: the first being an introduction to bioinformatics in biology; the second covering the physical, mathematical, statistical and computational basis of bioinformatics, using biological examples wherever possible; the third describing applications, giving specific detail and including data standards. The applications covered are sequence analysis and annotation, transcriptomics, proteomics, metabolite study, supramolecular organization, systems biology and the integration of-omic data, physiology, image analysis, and text analysis.

This book "provides a fast way for the reader to acquaint themselves with the main facts and concepts of the subject. Expanded topics include cell structure and imaging, microarrays, proteomics and signal transduction."-- back cover.
