El texto que presentamos bajo el título "Manual de mecanización de los aprovechamientos forestales" proporciona información imprescindible para la aplicación de los importantes avances tecnológicos de los últimos años a la gestión forestal sostenible. Es, por tanto, una herramienta necesaria tanto para los técnicos que planifican y dirigen las operaciones forestales como para los

operarios que desarrollan esas tareas. Igualmente, se convierte en un texto muy indicado para apoyar y complementar la formación de los estudiantes universitarios de disciplinas forestales y medioambientales, y también para los de estudios profesionales relacionados con el sector forestal, muy especialmente los correspondientes al Certificado de Profesionalidad AGAR 0108:

Aprovechamientos Forestales. También complementa y amplía los libros de esta misma editorial (bajo el sello Paraninfo, perteneciente al mismo Grupo Editorial) sobre mecanización y aprovechamientos correspondientes a las Unidades Formativas UF 0267, UF 0269, UF 0270, UF 0273, UF 0274. El libro proporciona información detallada sobre la maquinaria portátil y automotriz empleada en el monte, describe sus características y técnicas de uso, propone normas de organización de los trabajos que se realizan con ellas y analiza las consecuencias de esos trabajos sobre el entorno. También se recogen y explicitan las principales normativas que los regulan, haciendo especial hincapié en los aspectos medioambientales y de seguridad y salud. Se incluyen recomendaciones de mantenimiento y utilización de motosierras, desbrozadoras, tractores forestales, autocargadores, cosechadoras y procesadoras, se analizan en detalle sus componentes y su mecánica y se desglosa su empleo en aprovechamientos madereros para trabajar correctamente. Todos los contenidos

se enfocan y desarrollan de forma eminentemente práctica, buscando que sean de fácil aplicación y se acompañan de fotografías, dibujos, ilustraciones y gráficos que complementan con claridad lo expuesto en el texto.

Marketing Manipulation deals with the tactics and strategies used by marketers that prey on human cognitive, social and memory based biases ultimately influencing consumer behavior in their favor. Kamins focuses on examples from academic research where consumers have been found to be susceptible to bias and therefore have made less than optimal purchase decisions. Particularly, academic research in the area of Pricing, Product, Promotion, Sales and marketing research. Written in an accessible manner, this book puts the consumer (you!) in the center and aims to help making all of us a better decision maker when confronted with a range of stimuli in a marketing environment.

This individual Shop Manual is one unit of a series on agricultural wheel type tractors. Contained in it are the necessary specifications and the brief but terse procedural data needed by a mechanic when repairing a tractor on which he has had no previous actual experience. The material is arranged in a systematic order beginning with an index which is followed immediately by a Table of Condensed Service Specifications. These specifications include dimensions, fits, clearances and timing instructions. Next in order of arrangement is the procedures section. In the procedures section, the order of presentation starts with the front

axle system and steering and proceeds toward the rear axle. The last portion of the procedures section is devoted to the power take-off and power lift systems. Interspersed where needed in this section are additional tabular specifications pertaining to wear limits, torquing, etc.
