Over a century has passed and yet there is growing evidence that knowledge workers across the globe today are as constrained by F.W. Taylor's much-maligned *The Principles of Scientific Management*, as factory workers were in the early twentieth century. *Re-Tayloring Management* looks critically at Taylor's philosophy on management and contrasts it with other perspectives that have since emerged, along with the professionalization of management and the growth in business and management education. The contributors demonstrate that despite the complexity and uncertainty that organizations face, instead of designing work systems where knowledge and service workers have the freedom to apply knowledge and skills at the point they are most needed, managers are obsessed with maintaining tighter control. This approach conflicts with contemporary job design principles, which emphasise 'job crafting', whereby individuals are encouraged to craft their role in a way that is congruent with their identity. Drawing on insights from academics with diverse backgrounds and interests, and organised around 'past', 'present' and 'future' themes, this book is a thought-provoking read for professional managers, as well as for postgraduate students and academics teaching and researching organizational studies and management.

Chapter authors provide theoretical and practice-based perspectives across international contexts regarding common destructive practices that occur in educational organisations, such as negligence and mistreatment of people, professional dishonesty, fraud and embezzlement, abuse of power, and corrupt organisational cultures. *International Perspectives on Maladministration in Education* shines a light on this complex topic by examining various practices at individual, group, organisational, and system levels; the contexts and influences that give rise to them; and potential remedies to ensure more accountable, just, and safe institutions.

As part of the discovery of cognitive science, teachers are waking up to the powers of dual coding - combining words with visuals in your teaching. But cognitive scientists aren't graphic designers, and so their books don't show teachers how to be competent in producing effective visuals. There is a huge gap between what we know about dual coding and the skills needed to practice it effectively in the classroom. Until now. *Dual Coding With Teachers* is a breakthrough educational book. No other book has been designed with both cognitive science and graphic principles in mind. Every page contains diagrams, infographics, illustrations and graphic organisers. The book is designed to cater for both the busy teacher in a rush, as well as the research-hungry colleague. Over 35 teachers, teacher developers, psychologists and information designers are profiled, each with a double-page spread, highlighting their dual coding practice. The author, Oliver Caviglioli, is uniquely placed to bridge the gap between education and graphic design. A former special school head teacher, Oliver learned design principles from an early age from his architect and typographer father. Four decades of reading educational research has found its visual expression in this spectacular, image-rich book.

Recognising this progress, Associate Professor Anna Kilderry and Honorary Professor Bridie Raban lead a team of 34 notable contributors from 13 universities and institutions throughout Australia, who focus on the challenges of access, equity and quality that remain across the sector. With a Foreword by Professor Alison Elliott, Strong Foundations brings together knowledge and insights from research in education, health, social care, child safety, science, mathematics and the arts. Terwijl de Franse Revolutie nog volop in beweging was, schreef de oermoeder van het feminisme, Mary Wollstonecraft, in 1792 haar Pleidooi voor de rechten van de vrouw. Daarin trok zij ten strijde tegen de achterstelling die vrouwen al sinds mensenheugenis moesten ondergaan en tegen de vooroordelen die vooraanstaande denkers uit die tijd over vrouwen koesterden. Vrouwen moesten wat haar betreft in alle opzichten dezelfde kansen krijgen als mannen. Ze moesten beroepen kunnen uitoefenen en bijvoorbeeld medicus of vroedvrouw kunnen worden. En vrouwen hoorden vertegenwoordigd te zijn in de politiek, zodat ze zich de wet niet langer hoefden te laten voorschrijven door mannelijke politici.
