Providing a combination of practical ideas, educational rationales and activities to stimulate personal thought and development, this book explores a wide range of issues pertinent to the teaching and learning of English in the 21st century"--

How do you approach teaching English in the modern classroom? What is expected of a would-be English teacher? This best-selling textbook combines theory and practice to present a broad introduction to the opportunities and challenges of teaching English in secondary school classrooms. Each chapter explains the background to debates about teaching the subject and provides tasks, practical teaching approaches and further reading to explore issues and ideas in relation to school experience. Already a major text for many university teacher education courses, this new edition has been thoroughly updated in the light of recent revisions to the National Curriculum for English, examination syllabuses and the Standards for Qualified Teacher Status. As well as containing critical explorations of the history and definitions of the subject and policies such as the Secondary National Strategy that are appropriate to Professional and Masters level PGCE study, other chapters present a broad range of effective, innovative approaches to teaching such crucial areas as: reading and writing, speaking and listening; drama; media studies and information and communications technology; grammar, poetry and language study; Shakespeare; post-16 English language and literature. Written particularly with the new and student teacher in mind, this book offers principles and practical examples of teaching and learning within a 21st Century context in which new notions of literacy compete with demands of national assessment. Taking these changing principles as a starting point, the text also addresses questions about the nature of initial teacher preparation and raises issues concerning standards-based teacher education, mentoring in schools and monitoring the development of a student teacher.

This book is the first in-depth examination of the application of theories of space to issues of second language learning. The author introduces the work of key thinkers on the theory of space and place and the relevance of their ideas to second language acquisition (SLA). He also outlines a new conceptual framework and set of terms for researching SLA that centre on the idea of 'language learning environments'. The book considers the spatial contexts in which language learning takes place and investigates how these spatial contexts are transformed into individualised language learning environments, as learners engage with a range of human and nonhuman, and physical and nonphysical, resources in their daily lives. Revisiting linguistics and language learning theory from a spatial perspective, the book demonstrates that the question of where people learn languages is equally as important as that of how they do so. This work is essential reading for any researcher wishing to research the role of the environment as an active player in SLA.

Even as Anglophone power wanes in Asia, and China and India rise, the role of the English language in the region continues to develop. How are students in Asian nations such as Vietnam, Malaysia and China itself being taught English? This much-needed overview analyzes the differing language education policies of selected countries that also include Indonesia, Japan and Sri Lanka. Noting ASEAN's adoption of English as its sole working language, it traces the influence of globalization on English language education in Asia: in many systems, it pushes local languages off the curriculum and is taught as a second language after the national one. Informed by a comprehensive review of current research and practice in English teaching in Asia, this volume considers the many different roles English is playing across the region, as well as offering an informed assessment of the prospects of English—and Chinese—being a universal language of communication.

Appropriate for those new to the topic and established scholars, this holistic text examines the nexus of advocacy and English-language teaching, beginning with theories of advocacy, covering constraints and challenges in practice, and offering a range of hands-on perspectives in different contexts and with different populations. Bringing together wide-ranging and diverse viewpoints in TESOL, this volume examines the role of advocacy through a social justice lens in a

range of contexts, including K-12 classrooms and schools, adult and higher education settings, families and communities, and teacher-education programs and professional organizations. *Advocacy in English Language Teaching and Learning* offers readers a deeper understanding of what advocacy is and can be, and gives teacher candidates and educators the tools to advocate for their students, their families and communities, and their profession.

This Handbook is a comprehensive overview of English language education in Bangladesh. Presenting descriptive, theoretical, and empirical chapters as well as case studies, this Handbook, on the one hand, provides a comprehensive view of the English language teaching and learning scenario in Bangladesh, and on the other hand comes up with suggestions for possible decolonisation and de-eliticisation of English in Bangladesh. The Handbook explores a wide range of diverse endogenous and exogenous topics, all related to English language teaching and learning in Bangladesh, and acquaints readers with different perspectives, operating from the macro to the micro levels. The theoretical frameworks used are drawn from applied linguistics, education, sociology, political science, critical geography, cultural studies, psychology, and economics. The chapters examine how much generalisability the theories have for the context of Bangladesh and how the empirical data can be interpreted through different theoretical lenses. There are six sections in the Handbook covering different dynamics of English language education practices in Bangladesh, from history, policy and practice to assessment, pedagogy and identity. It is an invaluable reference source for students, researchers, and policy makers interested in English language, ELT, TESOL, and applied linguistics.

Diversity - social, cultural, linguistic and ethnic - poses a challenge to all educational systems. This book aims to address these issues by examining current policy and its implications, pedagogical practice and responses to the challenge of diversity that go beyond the language of schooling. Computer-based technologies can enhance language learning and help students embrace the complexities of an additional language. Due to rapid technological changes, innovative teaching approaches and strategies are necessary in order to successfully integrate new technologies within language teaching. Explorations of Language Teaching and Learning with Computational Assistance provides cutting-edge research which evaluates, improves, and applies effective pedagogy in the fields of computer-assisted language learning (CALL) and foreign language learning. It expands on the principles, theories, design, and implementation of computer-assisted language learning programs.

Human and material resources are two key elements that make up the language learning process. Regarding material resources, nowadays new technologies can be said to play a leading role in most language learning environments. However, we cannot forget that these relatively new tools still coexist with more traditional ones which are still widely used in the foreign language classroom. On the other hand, the progressive emergence of new 'human roles' in language learning means that human resources have also become a key medium through which the learner accesses knowledge and practice towards language acquisition. There is an obvious need to carry out research on these resources in order to assess their potential for an optimum learning experience. This book tries to meet such needs offering the research work that different authors have carried out in this field.

The author shows how teachers can enable their students to acquire skills and knowledge, as well as to recognize the value of aesthetic experience and emotional literacy.

The ongoing digitalization of social environments and personal lifeworlds has made it crucial to pinpoint the possibilities of digital teaching and learning also in the context of English language education. This book offers university students, trainee teachers, in-service teachers and teacher educators an in-depth exploration of the intricate relationship between English language education and digital teaching and learning. Located at the intersection of research, theory and teaching practice, it thoroughly legitimizes the use of digital media in English language education and provides concrete scenarios for their competence-oriented and task-based classroom use.

This book provides essential support and advice on using literature in the A level modern languages classroom, addressing key concerns such as ways to approach this task and how to maximise the benefit to students. There are strategies for understanding works of different genres as well as ways to analyse plot, characterisation, themes and style, all presented in a logical way that allows existing teaching methods to be built upon. Including a step-by-step approach to all aspects of planning, resourcing and teaching literature in modern languages at advanced levels, this book covers essential topics such as: Why teaching and studying literature is important How to choose the text Preparing and introducing the literary text Understanding the characters, themes, style and structure Writing examination essays Ways to spark creative language use before and beyond the set text Based on the latest A level modern languages syllabus, this practical book will help both new and experienced teachers approach teaching

literature with more confidence, which will enrich their students' language learning and inspire their creativity beyond examination requirements.

This book unites a range of approaches to the collection and digitization of diverse language corpora. Its specific focus is on best practices identified in the exploitation of these resources in landmark impact initiatives across different parts of the globe. The development of increasingly accessible digital corpora has coincided with improvements in the standards governing the collection, encoding and archiving of 'Big Data'. Less attention has been paid to the importance of developing standards for enriching and preserving other types of corpus data, such as that which captures the nuances of regional dialects, for example. This book takes these best practices another step forward by addressing innovative methods for enhancing and exploiting specialized corpora so that they become accessible to wider audiences beyond the academy.

- an evaluation of current approaches to the teaching

of grammar and linguistic form · a revised pedagogy based on principles from cognitive science and cognitive linguistics · a comprehensive set of activities and resources to support the teaching of key linguistic topics and text types · a detailed set of suggestions for further reading and a guide to available resources Arguing for the use of drama, role play, gesture, energy dynamics, and visual and spatial representations as ways of enabling students to understand grammatical features, this book explores and analyses language use in a range of text types, genres and contexts. This innovative approach to teaching aspects of grammar is aimed at English teachers, student teachers and teacher trainers.

Praise for the previous edition: 'This is a text that should accompany every student teacher of English and find its way on to the shelf of all practising teachers. This book excited me. It is written in a style that makes you want to try out activities and take up challenges. This book will encourage the student teacher to embrace the subject of English along with its associated values and debates' - ESCalate 'If I was training to teach English today, this is the book I would want - an extraordinarily professional handbook of good practice' - Geoff Barton, Times Educational Supplement, Teacher Magazine This essential companion for aspiring secondary English teachers has been extensively reworked to help students meet the very latest professional and academic standards, while also equipping them with the knowledge and skills they will need for the beginning of their teaching career. Focusing on the essentials needed to be a successful English teacher, the authors combine subject knowledge with ideas, examples and approaches for creating an effective, vibrant learning environment, and real examples of lesson plans and schemes of work. Each chapter clearly links practice to theoretical and critical perspectives on teaching, making this an ideal text for students working towards M-level credits or a Masters in Teaching and Learning. There are also brand new chapters which explore in greater depth specific areas of contention and challenging issues, including: - Diversities, including global perspectives on teaching English - The application and implications of using ICT - Multi-agency provision in personalising learning - Research methodologies - Transition from the training year and the first year as a teacher The latest requirements for Qualified Teacher Status are clearly signposted throughout, and activities at the end of each chapter help to reinforce knowledge and encourage reflection. Written by a team of highly respected authors, this new edition should be on every secondary English student's bookshelf.

Knowing About Language is an essential and comprehensive introduction to and discussion of the value of linguistics in the secondary and post 16 curriculum. Split into three easily accessible parts, each chapter draws on theoretical and practical reasons for developing language awareness for the teacher and student, the impact of government and institutional policy on teaching and teacher knowledge, and explores recent research about the value of linguistic knowledge to support student attainment. Expert contributors show how recent innovations in linguistics can support language teaching by providing a range of practical ideas that can be used in the classroom. Knowing About Language is a valuable theoretical, critical and practical guide for the teacher and researcher, and anyone interested in applied linguistics and the study of language in education. Written by authors who are passionate about the value of language study both as a classroom topic and more generally, this book acts as a resource to inform

and support teachers in wider aspects of their role by demonstrating the powerfully enabling nature and inherent value of language study and linguistics in secondary and post-16 curricula.

A report on the two year web-based teaching project called Multimedia English Learning Web. Specifically it demonstrates the use of information technology on English language teaching. Additionally a CD-ROM accompanies the book to illustrate the system design of the web-based project.

Grounded in research and practical expertise, this volume helps K–6 teachers skillfully support all of their English language learners (ELLs)—from a single student to an entire classroom. Ideas for teaching ELLs across different grade and proficiency levels include ways to link instruction to students' lived experiences, use a variety of motivating print and electronic texts and materials, engage families, and conduct effective assessments. Chapters are packed with tools and activities for promoting ELLs' development in oral language, phonics, fluency, vocabulary, comprehension, writing, and grammar. Handy reproducibles and “Voice from the Classroom” teacher vignettes enhance the utility of the book.

Language not only expresses identities but also constructs them. Starting from that point, *Language and Identity* examines the interrelationships between language and identities. It finds that they are so closely interwoven, that words themselves are inscribed with ideological meanings. Words and language constitute meanings within discourses and discourses vary in power. The powerful ones reproduce more powerful meanings, colonize other discourses and marginalize or silence the least powerful languages and cultures. Language and culture death occur in extreme cases of marginalization. This book also demonstrates the socio-economic opportunities offered by language choice and the cultural allegiances of language, where groups have been able to create new lives for themselves by embracing new languages in new countries. Language can be a 'double-edged sword' of opportunity and marginalization. *Language and Identity* argues that bilingualism and in some cases multilingualism can both promote socio-economic opportunity and combat culture death and marginalization. With sound theoretical perspectives drawing upon the work of Bakhtin, Vygotsky, Gumperz, Foucault and others, this book provides readers with a rationale to redress social injustice in the world by supporting minority linguistic and cultural identities and an acknowledgement that access to language can provide opportunity.

The Routledge Handbook of Chinese Language Teaching defines Chinese language teaching in a pedagogical, historical, and contemporary context. Throughout the volume, teaching methods are discussed, including the traditional China-based approach, and Western methods such as communicative teaching and the immersion program. The Handbook also presents a pedagogical model covering pronunciation, tones, characters, vocabulary, grammar, and the

teaching of listening, speaking, reading, and writing. The remaining chapters explore topics of language assessment, technology enhanced instruction, teaching materials and resources, Chinese for specific purposes, classroom implementation, social contexts of language teaching and language teaching policies, and pragmatics and culture. Ideal for scholars and researchers of Chinese language teaching, the Handbook will benefit educators and teacher training programs. This is the first comprehensive volume exploring the growing area of Chinese language pedagogy.
