Finally, a book that presents the facts, dispels the myths, and shows you how to be green without having to compromise yourself and your home. The first book of its kind, this is a book just about the ins and outs of laundry. Carin began to research a greener way of life, not for profit or for business gain but to incorporate it with her most prized job, being a mother, grandmother, and wife. She explores the meaning of green, the fads and the facts, so that anyone can easily make their own decisions about what to do. This book is filled with tips and stories that will give you and your family a new perspective on that never-ending chore called laundry. Her biggest fear is that traditional washing and drying will become obsolete, replaced by overpriced appliances and thoughtless damaging laundry products. She has added laundry to the American Experience, with an alcove of rich stories about generations of laundry and love that she has collected on her journey to reconnect with Mother Nature. Love laundry or hate laundry, this collection of short stories will present you with endless reasons to make laundry a part of your life...and how!

Much of our daily lives intertwine with artificial intelligence. While AI may be seen as a panacea for enterprise

advancement and consumer convenience, it is still an emerging technology, and its explosive growth needs to be approached with proper care and preparation. How do we tackle the challenges it presents, and how do we make sure that it does precisely what it is supposed to do? In *Keeping Your AI Under Control*, author Anand Tamboli explores the inherent risk factors of the widespread implementation of artificial intelligence. The author delves into several real-life case studies of AI gone wrong, including Microsoft's 2016 chatbot disaster, Uber's autonomous vehicle fatally wounding a pedestrian, and an entire smart home in Germany dangerously malfunctioning because of one bad lightbulb. He expertly addresses the need to challenge our current assumptions about the infallibility of technology. The importance of data governance, rigorous testing before roll-out, a chain of human accountability, ethics, and much more are all detailed in *Keeping Your AI Under Control*. Artificial intelligence will not solve all of our problems for good, but it can (and will) present us with new solutions. These solutions can only be achieved with proper planning, continued maintenance, and above all, a foundation of attuned human supervision. For Cheryl Mendelson, laundering is the best part of housekeeping. It's full of physical pleasures—the look of favorite clothes restored to freshness and beauty, the tactile satisfaction of crisp linens in beautifully folded stacks. Good laundering preserves things you love and protects your pocketbook. It doesn't take much time or effort. What it takes is knowledge, and *Laundry* is the comprehensive, entertaining, and inspiring book on the art of laundering. Culled from the bestselling *Home Comforts*, with revised and updated information and a new introduction, *Laundry* is an indispensable guide to caring for all the cloth in one's home: from kitchen rags to bedding, hand-washables, and baby clothes to vintage linens. Mendelson offers detailed guidance on when to disregard labels, removing stains, making environmentally informed choices, sewing, and storing clothing and fabrics. A much-needed antidote to the standard-issue how-to manual, *Laundry* celebrates the satisfactions of ironing, folding, and caring for clothes and linens. Both pragmatic and eloquent, Mendelson provides beginning and veteran homemakers with a seamless combination of reliable instruction, time-tested advice, and fascinating personal narrative. As a farm girl in Pennsylvania, Mendelson—who is a philosopher, lawyer, and professor, as well as a homemaker, wife, and

Modern Consumer Law is a lively, concise, problem-focused text on contemporary consumer law. It is the only text on the market conceptualized after Dodd-Frank and its creation of the Consumer Financial Protection Bureau. The book takes a functional approach to consumer law, looking at types of transactions such as mortgages as well as kinds of laws such as disclosure rules. It examines core theoretical questions in an accessible way, revealing consumer law as a series of statutes built on the common law foundations of contract and tort. Organized into 28 class-sized assignments, the book is easy to adapt to a teacher's preferences in terms of focus and class credits.

The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers.
