Though decades ago school shootings were rare events, today they are becoming normalized. Active shooter drills have become more commonplace as pressure is placed on schools and law enforcement to prevent the next attack. Yet others argue the traumatizing effects of such exercises on the students. Additionally, violence between students continues to remain problematic as bullying pervades children's lives both at school and at home, leading to negative mental health impacts and, in extreme cases, suicide. Establishing safer school policies, promoting violence prevention programs, building healthier classroom environments, and providing better staff training are all vital for protecting students physically and mentally. The Research Anthology on School Shootings, Peer Victimization, and Solutions for Building Safer Educational Institutions examines the current sources of violence within educational systems, and it offers solutions on how to provide a safer space for both students and educators alike. Broken into four sections, the book examines the causes and impacts that peer victimization has on students and how this can lead to further violence and investigates strategies for detecting the warning signs. The book provides solutions that range from policies and programs that can be established to strategies for teaching nonviolence and promoting coexistence in the classroom. Highlighting a range of topics such as violence prevention, school climate, and bullying, this publication is an ideal reference source for school administrators, law enforcement, teachers, government and state officials, school boards, academicians, researchers, and upper-level students who are intent on stopping the persisting and unfortunate problem that is school violence.

Education and Disability in the Global South brings together new and established researchers from a variety of disciplines to explore the complexities and dilemmas encountered in providing education to children and young people with disabilities in countries in South Asia and Africa. Applying a range of methodological, theoretical and conceptual frameworks across different levels of education systems, from pre-school to higher education, the contributors examine not just the barriers but also the opportunities within the educational systems, in order to make strong policy recommendations. Together, the chapters offer a comprehensive overview of a range of issues, including a nuanced appreciation of the tensions between the local and global in relation to key developments in the field, critiquing a globalized notion of inclusive education, as well as proposing new methodological advancements in taking the research agenda forward. Empirical insights are captured not just from the perspectives of educators but also through engaging with children and young people with disabilities, who are uniquely powerful in providing insights for future developments.

"Postliberalization Indian Novels in English: Politics of Global Reception and Awards" is a critical handbook that focuses on trends in contemporary Indian novels and discusses the global reception of these works. The volume provides a systematic approach to the study of Indian novelists that have not been (with certain exceptions) extensively examined.

The three articles printed here point towards the need for a form of collaboration that is presently inoperative in neuroscience and is not functioning in the current sciences at all. The New Science is a division of labor and tasks that has the potential to increase the probabilities of cumulative and progressive results.

Interviewing war criminals and their victims, Neuffer explains, through the voices of people she follows over the course of a decade, how genocide erodes a nation's social and political environment. Her characters' stories and their competing notions of justice—from searching for the bodies of loved ones, to demanding war crime trials, to seeking bloody revenge—convince readers that crimes against humanity cannot

Since these questions are so common, hiring managers will expect you to be able to answer them smoothly and without hesitation. This eBook contains 288 questions and answers for job interview and as a BONUS web addresses to 289 video movies for a better understanding of the technological process. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

This book is a story of one village, Yantian, and its remarkable economic and social transformation. The village sits in the Pearl River Delta, the engine of China's emergence as the hub of global manufacturing and production. The village's success relied on the creation of new economic collectives, its ability to leverage networks, and its proximity to Hong Kong to transform forever the formerly sleepy rural area. The result of almost 20 years of field work by the authors, Chinese Village, Global Market shows how outcomes are shaped by a number of factors such as path dependence, social structures, economic resources and local entrepreneurship.

The job interview is probably the most important step you will take in your job search journey. SOCIOLOGY: A GLOBAL PERSPECTIVE, Ninth Edition, introduces readers to the concepts and theories of sociology, demonstrates how those concepts and theories can be used to think about the most significant and pressing global issues of our day, and uses powerful visual images to illustrate their impact on individuals, local communities, and society. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Now in its fifth edition, *Doing History* offers a unique perspective on teaching and learning history in the elementary and middle grades. Through case studies of teachers and students in diverse classrooms and from diverse backgrounds, it shows children engaging in authentic historical investigations, often in the context of an integrated social studies curriculum. The premise is that children can engage in valid forms of historical inquiry—collecting and analyzing data, examining the perspectives of people in the past, considering multiple interpretations, and creating evidence-based historical accounts. Grounded in contemporary sociocultural theory and research, the text features vignettes in each chapter showing communities of teachers and students doing history in environments rich in literature, art, writing, discussion, and debate. The authors explain how the teaching demonstrated in the vignettes reflects basic principles of contemporary learning theory. *Doing History* emphasizes diversity of perspectives in two ways: readers encounter students from a variety of backgrounds, and students themselves look at history from multiple perspectives. It provides clear guidance in using multiple forms of assessment to evaluate the specifically historical aspects of children's learning.

The job interview is probably the most important step you will take in your job search journey. The status of boundaries and borders, questions of global poverty and inequality, criteria for the legitimate uses of force, the value of international law, human rights, nationality, sovereignty, migration, territory, and citizenship: debates over these critical issues are central to contemporary understandings of world politics. Bringing together an interdisciplinary range of contributors, including historians, political theorists, lawyers, and international relations scholars, this is the first volume of its kind to explore the racial and imperial dimensions of normative debates over global justice.

The job interview is probably the most important step you will take in your job search journey. Foreign language teaching in America today falls into three distinct fields of influence and interest: public and private schools, college and other post-secondary programs, and courses for adult learners. At a time when academics and instructors in each of these fields seek to answer similar questions, too few published resources recognize and address the parallels among them. In response, Foreign Language Education in America is an edited book with contributions that represent the diversity in foreign language education today, including perspectives from elementary, middle schools, high schools, university-level courses, summer programs, federal government, and international learning. This is a practical guide to the state of the field that fills a much-needed gap for scholars, researchers, administrators, and practitioners who are looking for a resource that describes effective practices across the field.

Given the weaknesses of mainstream democratisation since the 1980s, the authors present a cutting edge examination of dynamics of political change in the direction of more substantive democracy. While focusing on the Global South, they also draw

comparisons from historical and contemporary experiences from Scandinavia.

This book offers you a brief, but very involved look into the operations in the drilling of an oil & gas wells that will help you to be prepared for job interview at oil & gas companies. From start to finish, you'll see a general prognosis of the drilling process. If you are new to the oil & gas industry, you'll enjoy having a leg up with the knowledge of these processes. If you are a seasoned oil & gas person, you'll enjoy reading what you may or may not know in these pages. This course provides a non-technical overview of the phases, operations and terminology used on offshore drilling platforms. It is intended also for non-drilling personnel who work in the offshore drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of drilling operations is required. This course will provide participants a better understanding of the issues faced in all aspects of drilling operations, with a particular focus on the unique aspects of offshore operations.

Exploring Key Issues in Early Childhood and Technology offers early childhood allies, both in the classroom and out, a cutting-edge overview of the most important topics related to technology and media use in the early years. In this powerful resource, international experts share their wealth of experience and unpack complex issues into a collection of accessibly written essays. This text is specifically geared towards practitioners looking for actionable information on screen time, cybersafety, makerspaces, coding, computational thinking, STEM, AI and other core issues related to technology and young children in educational settings. Influential thought leaders draw on their own experiences and perspectives, addressing the big ideas, opportunities and challenges around the use of technology and digital media in early childhood. Each chapter provides applications and inspiration, concluding with essential lessons learned, actionable next steps and a helpful list of recommended further reading and resources. This book is a must-read for anyone looking to explore what we know – and what we still need to know – about the intersection between young children, technology and media in the digital age.
