All-natural ingredients that lead to beauty from head to toe.

We have become exposed to an increasing number of chemicals in our food supply, the air we breathe, and through many common items, we use daily, including cosmetics and household cleaner. Among their potentially adverse effects, these chemicals can build up in our system and stall weight loss. While many factors often contribute, researchers find that environmental toxins play a role in being overweight or obese. That's where a well-designed detoxification plan can help.

When it comes to skincare, everyone knows that natural is best, but with chemical-ridden products being mislabeled as "all-natural" and so many homemade beauty regimens available online, keeping it natural can feel complicated. Whether you're a homemade product junkie looking for affordable options or just joining the natural skincare revolution- this book will get you and your skin back-to-basics-one natural product at a time.

The first step in picking out the correct products and in making homemade creams and a lotion is to use something that's right for you. Depending on your age, diet and genetics you will primarily fall into one of the following 5 skin types: 1.

# Access Free Make Your Own Cosmetics Recipes Skin Care Body Care Hair Care Perfumes And Fragrancing Herbs Essential Oils Cosmetic Ingredients Neals Yard Remedies

Normal Skin The simplest to maintain normal skin has little to no oily spots, maintains regular circulation with little to no trouble spots. It's fairly elastic and looks healthy with very little make-up and attention. 2. Oily Skin Most prone to breakouts, the trouble zones are usually in the T zone of your face (forehead, nose and chin); oily skin tends to have oversized pores and can look greasy or shiny. With the right creams and proper diet its oil levels can be maintained. Oily skin tends not to have much wrinkling or aging. 3. Dry Skin Most people with dry skin feel tightness after washing their face and easily flake around the mouth and nose with dry spots. Dry skin is prone to aging and wrinkling and it's important to properly moisturize and nourish it regularly. 4. Sensitive Skin The sensitive skin type becomes irritated easily, gets red and dry spots and breaks out easily. This skin type is like a historical map - it tends to wear all of its battles for all to see. The type of creams and lotions applied on sensitive skin is extremely important as an irritation or reaction can occur with certain ingredients and chemicals. 5. Combination Skin The most common skin type in women, combination skin is both oily and dry. Combination skin tends to be dry on the cheeks and around the eyes and oily spots on the forehead and nose. IT requires more cleansing in the oily areas and sensitive creams without too much oil in the dry areas. In this guide we focus on the three extreme skin cases grouping normal, combination and sensitive into a Sensitive Category. Because combination and normal skin is the most adaptable to most products, anything created for sensitive skin will only promote health and the look of younger, suppler skin with a clear complexion. The other two are oily and dry skin types. Ditch Damaging, Toxic Makeup & Enjoy Making Your Own Healthy, Organic Cosmetics At Home Today!
