Addition and Subtraction: Math Workbook For Kids Ages 4 - 8 Math Workbook for Kids Ages 4-8 Give your child a head start with our latest Math Workbook learning book that teaches the basics of math to toddlers. Our Math Workbook for Kids Ages 4-8 is a great way for your little one to learn basic math skills such as number recognition, number tracing, and counting. We've put together a variety of different activities that are both fun and educational! We've got little ones ourselves and know how important (and difficult!) it is to keep their attention! Keep kids' attention with a Math Workbook for Kids Ages 4-8.

Success in math requires children to make connections between the real world and math concepts in order to solve problems. Successful problem solvers will be ready for the challenges of mathematics as they advance to more complex topics. The activities in this workbook are designed to help your children catch up, keep up, and get ahead. Best of all, they'll have lots of fun doing it! Some of the great features you'll find inside are: Computation Station Students get lots of opportunities to build their confidence in multiplication and division of two- and three-digit numbers by one- and two-digit numbers. Fraction Subtraction After developing a solid understanding of fractions, students learn to apply their subtraction skills to fractions. Cash Crunch Calculating the value of money provides practical practice in adding and subtracting decimals. The Mighty Marlock Guessing any weight is The Mighty Marlock's gig, but sometimes he guesses wrong. Students decide where Marlock goes astray, reinforcing their knowledge of standard and metric measurement. Mystery Shape Students use process of elimination with hints about sides, angles, and vertices, to find a mystery polygon or three-dimensional shape. Give your child's confidence in math a boost with 4th Grade Basic Math Success.

fractions, and more!

Mental Maths is the maths we do in our heads without the use of calculators and without writing down the calculation. Mental Maths strategies are the 'tricks' we use to do Maths in our heads. There are different ways of finding the answer to any Mental Maths problem, and such strategies are the focus of this series. Even though calculators and computers play an enormous role in the modern world, we still need to go back to the basics % we do need to know how to check that the sales assistant at the counter is giving us the right change! Mental Maths has become more important than ever and new primary Maths syllabuses in Australia are reflecting this. For example, NSW has placed an emphasis on Mental Maths in its primary syllabus, and even the Year 10 School Certificate examination has a compulsory non-calculator section. Features of this book include: 32 double-page units of Mentals are included % 8 units for each school term each unit is divided into four sets (A,B,C and D) of 20 questions each each numbered question covers particular Maths topics throughout the book: for example, Question 1 always covers addition, while Question 20 always covers geometry a special 'eHelp' section,, at the front of the book gives different strategies and explanations to help students solve Mentals problems. These are also numbered so they link to the question numbers in each Mentals unit a eFun Spot,, unit, containing fun activities, and a eRevision,, unit are included at the end of each 8 units extra practice,, sections which reinforce particular strategies appear in the lower part of each
