Norms of Word Association contains a heterogeneous collection of word association norms. This book brings together nine sets of association norms that were collected independently at different times during a 15-year period. Each chapter is a self-contained unit. The order in which the norms are presented is arbitrary, although an attempt is made to group together norms that seem to belong together. The 1952 Minnesota norms are presented first, due to "age" and in recognition of the fact that a number of the norms that follow are direct outgrowths of this work. The next three norms in this collection are responses to the Russell-Jenkins stimuli obtained from subjects representing different linguistic communities. A summary of association norms collected from British and Australian subjects are reported along with

association norms from German and French college students and French workmen. Four sets of norms that are not directly related to the 1952 Minnesota collection are included. The text will be of interest to historians and researchers in the field of verbal learning and verbal behavior.

Terwijl de Franse Revolutie nog volop in beweging was, schreef de oermoeder van het feminisme, Mary Wollstonecraft, in 1792 haar Pleidooi voor de rechten van de vrouw. Daarin trok zij ten strijde tegen de achterstelling die vrouwen al sinds mensenheugenis moesten ondergaan en tegen de vooroordelen die vooraanstaande denkers uit die tijd over vrouwen koesterden. Vrouwen moesten wat haar betreft in alle opzichten dezelfde kansen krijgen als mannen. Ze moesten beroepen kunnen uitoefenen en bijvoorbeeld medicus of vroedvrouw kunnen worden. En vrouwen hoorden vertegenwoordigd te zijn in de politiek, zodat ze zich de wet niet langer hoefden te laten voorschrijven door mannelijke politici.
