De jongens uit Brazilië, uit 1976, is misschien wel het meest angstaanjagende boek uit het rijke oeuvre van Ira Levin. Ex-nazikamparts dr. Josef Mengele werkt, ondergedoken in Zuid-Amerika, aan een weezinwekkend project. Waarom stuurt Mengele zes voormalige SS-officiers af op vierennegentig onschuldige oude mannen? En waarom moeten zij op een bepaalde datum sterven? Nazi-jager Yakov Liebermann probeert in een race tegen de klok de waarheid te achterhalen. Levin was meesterlijk in het bespelen van de grootste angsten van een wereld in de greep van de Koude Oorlog.

'Zijn wij dan geen Mensen?' Edward Prendick is de enige overlevende van een schipbreuk. Hij wordt gered door Montgomery, de assistent van een zekere dokter Moreau. Op hun eiland, ver weg van bewoning, voeren de twee wetenschappers al een tiental jaar verschrikkelijke experimenten uit. Ze transplanteren en modificeren dieren genetisch om ze bewustzijn te schenken en te laten praten. De 'mens-dieren' gehoorzamen aan een geheel van regels, de Wet, die elk primitief gedrag veroordeelt, en vereren Moreau als een god. Maar Prendick ontdekt al snel dat de dierlijke impulsen van die wezens allesbehalve vergeten zijn...

Verhandeling door de Griekse wijsgeer (384-322 v.Chr.) over politiek en staatsinrichting.

Siddhartha Mukherjee onderzoekt aan de hand van zijn eigen familiegeschiedenis - een verleden vol geestesziekte en psychische aandoeningen - de menselijke erfelijkheid en het effect ervan op onze levens, persoonlijkheden, keuzes en lotsbestemmingen. In weergaloos proza beschrijft hij het eeuwenlange onderzoek naar de erfelijkheidskwestie - van Aristoteles en Pythagoras via Mendel en Darwin tot aan de revolutionaire eenentwintigste- eeuwse vernieuwers die het menselijk genoom in kaart brengen. In 'Het gen. Een intieme geschiedenis' verweeft Mukherjee wetenschap en sociale historie met een persoonlijk verhaal, om een onthullende en magistrale geschiedenis te schrijven waarin een wetenschappelijke abstractie tot leven komt. Het boek is onmisbaar voor iedereen die geïnteresseerd is in de morele complexiteit van de huidige wetenschappelijke mogelijkheden om het menselijk genoom te lezen en te schrijven, en voor iedereen die zich bezorgd afvraagt wat de toekomst van de mens behelst.

Aan de westkust van Turkije ligt het eiland Lesbos, dat door een lagune vrijwel in tweeën is verdeeld. Dit is de plek waar, 2400 jaar geleden, Aristoteles besloot zich te gaan verdiepen in de natuurlijke wereld. Iedereen kent Aristoteles als

filosoof – maar dat hij ook voor de biologie van enorm belang is geweest, is een beetje vergeten. Hij schreef alles op wat hij over de dierenwereld kon zeggen, teksten die bekendstaan onder de naam *Historia Animalium*. Eeuwenlang trokken wetenschappers er niet meer op uit om te kijken hoe de natuur erbij lag: ze sloegen simpelweg Aristoteles erop na. Vanaf de zeventiende eeuw kwam het tegengeluid: 'Bestudeer de natuur! Niet de boeken!' Zo verdween Aristoteles langzaam uit de wetenschappelijke canon. Nu is het tijd voor een herwaardering: Armand Leroi herstelt in dit boek de reputatie van Aristoteles de wetenschapper. Niet alleen was hij de eerste bioloog, hij is nog steeds een van de grootste. Met *De lagune* geeft Leroi werkelijk een nieuwe visie op leven en werk van de filosoof.

This imaginative cross-curricular resource is the perfect way to reinforce basic math skills as well as introduce the study of great "thinkers" to your class. It includes two short biographies: one for Leonardo da Vinci and one for Gregor Mendel. Both contain secret, embedded information. Students must study the biography and crack the code to answer a set of worksheet questions. Within these hidden codes, students will practice number sequences and place value. Level: Easy

Children are naturally inquisitive and eager to explore and learn about the world around them. It is important for their guardians, both Parents and Teachers, to satisfy their queries, and that too, in such a way that the children are able to understand and comprehend the concepts as well as learn from them. Also, there exists a gap in the level of information and knowledge provided to the children by the Parents vs. that provided by their Teachers. Discrepancies might also exist in the methodology(ies) through which the information and knowledge is relayed. This increases the possibility that the children might either not understand the concept clearly or become confused about the correct interpretation of the concepts. With these objectives in mind, and to build connectivity between the teaching methodologies by Parents and Teachers, we at Oswaal Books, have come up with this Manual for Teachers and Parents. Some benefits of using this manual are:

- It aims to aid the Teachers and Parents in simplifying the concepts studied by children as a part of their curriculum
- It equips the parents and teachers to enable the children to understand the subjects, and also evaluate their measure of understanding and creativity.
- It includes Learning and Understanding Aids along with a Lesson Plan for each Chapter
- It demonstrates Effective Teaching Techniques
- It also gives various Propositions for Step-wise Learning and Building up of Concepts

**IMPORTANT FEATURES OF THE BOOK:** Strictly based on latest NCERT Textbook

The manual is based on the latest NCERT Textbook 6 Exploratory Learning objectives These provide explicit instructions to parents and teachers to teach their wards

**Effective Teaching Techniques** The manual has tried and tested teaching techniques for higher success rate
